Comments:

### Low Flush Toilet Rebate Policy

The intent of the Low-Flow Rebate is to reduce the amount of indoor water use by Sedona sewer customers through the conversion to toilets that do not exceed 1.6 gallons per flush. The Rebate will be in effect based upon the availability of funding. Models of low-flow toilets are available in a wide range of colors and styles. Less expensive models may perform poorly and have an inferior grade of china susceptible to discoloring and cracking.

### Requirements for Rebate

- To be eligible for the rebate, the installation must meet the specifications and recommendations as determined by the Wastewater Department and be inspected by the Wastewater Inspector.
- A rebate will be issued for 50% of the purchase price less any discount. The refund will not exceed \$50.00 per toilet. The receipt must be dated within 90 days.
- To be eligible for a rebate applicants must be Sedona sewer customers with current accounts.
- The rebate is for the replacement of existing high-flow toilets (3.5 gallons per flush or greater) with toilets that do not exceed 1.6 gallons of water per flush.
- Applicants must provide an original sales receipt for the purchase of each toilet to verify actual cost to the customer at the approved address. The date on the receipt cannot exceed 90 days. The rebate does not cover sales tax or additional parts and/or labor for the installation.
