City Requests Public Comment Regarding Draft Revised Storm Water Quality Management Program

The City of Sedona Public Works Department is requesting public comment regarding its Storm Water Quality Management Program. The Program affects the entire City, including construction sites, existing developments, government agencies, and activities by residents or tourists that may result in water pollution. The Arizona Department of Environmental Quality requires the Program document, which is a plan identifying steps the City will take to enhance the quality of storm water draining from its stormwater system. The plan does not deal with the volume of water the system handles.

The Storm Water Quality Management Program document was last revised by the City Council's at the July 22, 2008 meeting. The updated program was submitted to ADEQ August 27, 2008 and approved September 5, 2008.

The program document is available at Sedona City Library and on the City Website under the "Stormwater in Sedona" subject on the Public Works Department page. Comments may be submitted to City of Sedona Public Works Department at 102 Roadrunner Drive or by e-mail to Dpeck@SedonaAZ.gov. Comments are requested by May 29, 2009.
