SURVEY BACKGROUND

About The National Citizen SurveyTM

The National Citizen Survey $^{\text{\tiny TM}}$ (The NCS $^{\text{\tiny TM}}$) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA).

The survey and its administration are standardized to assure high quality survey methods and comparable results across The National Citizen Survey™ jurisdictions. Participating households are selected at random and the household member who responds is selected without bias. Multiple mailings give each household more than one chance to participate with self-addressed and postage paid envelopes. Results are statistically weighted to reflect the proper demographic composition of the entire community.

The National Citizen Survey[™] customized for this jurisdiction was developed in close cooperation with local jurisdiction staff. The City of Sedona staff selected items from a menu of questions about services and community problems; they defined the jurisdiction boundaries NRC used for sampling; and they provided the appropriate letterhead and signatures for mailings. City of Sedona staff also determined local interest in a variety of add-on options to The National Citizen Survey[™] Basic Service.

UNDERSTANDING THE RESULTS

Survey Administration

Following the mailing of a pre-survey notification postcard to a random sample of 1,200 households, surveys were mailed to the same residences approximately one week later. A reminder letter and a new survey were sent to the same households after two weeks. Of the mailed postcards, 278 were undeliverable due to vacant or "not found" addresses. Completed surveys were received from 536 residents, for a response rate of 58%. Typically, the response rates obtained on citizen surveys range from 25% to 40%.

It is customary to describe the precision of estimates made from surveys by a "level of confidence" (or margin of error). The 95 percent confidence level for this survey of 536 residents is generally no greater than plus or minus 5 percentage points around any given percent reported for the entire sample.

The results were weighted to reflect the demographic profile of all residents in the City of Sedona. (For more information on the survey methodology, see Appendix B. A copy of the survey materials can be found in Appendix C.)

Survey Validity

The question of survey validity has two parts: 1) how can we be confident that the results from our sample are representative of the results we would have gotten had we administered the survey to the entire population? and 2) how closely do the perspectives recorded on the survey reflect what residents really believe or do?

To answer the first question, we use the best survey research practices for the resources spent to assure that the results from the sample reflect the opinions of residents in the entire jurisdiction. These practices include:

- 1. Using a mail-out/mail-back methodology, which typically gets a higher response rate than phone for the same dollars spent.
- 2. Selecting households at random within the jurisdiction.
- 3. Over-sampling attached units to improve response from hard-to-reach, lower income, or younger apartment dwellers.

Understanding the Results

- 4. Selecting the respondent within the household using an unbiased sampling procedure¹.
- 5. Contacting potential respondents three times to encourage response from people who may have different opinions or habits than those who would respond with only a single prompt.
- 6. Soliciting response on jurisdiction letterhead signed by the highest ranking elected official or staff member.
- 7. Providing a self-addressed, postage-paid return envelope.
- 8. Offering the survey in Spanish when appropriate and requested by City officials.
- 9. Using the most recent available information about the characteristics of jurisdiction residents to weight the data to reflect the demographics of the population.

The answer to the second question about how closely the perspectives recorded on the survey reflect what residents really believe or do is more complex. Resident responses to surveys are influenced by a variety of factors. For questions about service quality, residents' expectations for service quality play a role as well as the "objective" quality of the service provided, the way the resident perceives the entire community (that is, the context in which the service is provided), the scale on which the resident is asked to record her opinion and, of course, the opinion, itself, that a resident holds about the service. Similarly a resident's report of certain behaviors is colored by what he or she believes is the socially desirable response (e.g. reporting tolerant behaviors toward "oppressed groups," likelihood of voting a tax increase for services to poor people, use of alternative modes of travel to work besides the single occupancy vehicle), her memory of the actual behavior (if it is not a question speculating about future actions, like a vote), her confidence that she can be honest without suffering any negative consequences (thus the need for anonymity) as well as the actual behavior itself.

How closely survey results come to recording the way a person really feels or behaves often is measured by the coincidence of reported behavior with observed current behavior (e.g. driving habits), reported intentions to behave with observed future behavior (e.g. voting choices) or reported opinions about current community quality with objective characteristics of the community (e.g. feelings of safety correlated with rates of crime). There is a body of scientific literature that has investigated the relationship between reported behaviors and actual behaviors. Well-conducted surveys, by and large, do capture true respondent behaviors or intentions to act with great accuracy. Predictions of voting outcomes tend to be quite accurate using survey research, as do reported behaviors that are not about highly sensitive issues (e.g. family abuse or other

¹ The birthday method requests that the respondent in the household be the adult (18 years old or older) who most recently had a birthday, irrespective of year of birth.

The National Citizen Survey™ by National Research Center, Inc.

illegal or morally sanctioned activities). For self-reports about highly sensitive issues, statistical adjustments can be made to correct for the respondents' tendency to report what they think the "correct" response should be.

Research on the correlation of resident opinion about service quality and "objective" ratings of service quality tend to be ambiguous, some showing stronger relationships than others. NRC's own research has demonstrated that residents who report the lowest ratings of street repair live in communities with objectively worse street conditions than those who report high ratings of street repair (based on road quality, delay in street repair, number of road repair employees). Similarly, the lowest rated fire services appear to be "objectively" worse than the highest rated fire services (expenditures per capita, response time, "professional" status of fire fighters, breadth of services and training provided). Whether some research confirms or disconfirms that relationship between what residents think about a community and what can be seen "objectively" in a community, we have argued that resident opinion is a perspective that cannot be ignored by government administrators. Elsewhere we have written, "If you collect trash three times a day but residents think that your trash haul is lousy, you still have a problem."

Use of the "Excellent, Good, Fair, Poor" Response Scale

The scale on which respondents are asked to record their opinions about service and community quality is "excellent," "good," "fair" or "poor" (EGFP). This scale has important advantages over other scale possibilities (very good to very bad; very satisfied to very dissatisfied; strongly agree to strongly disagree, as examples). EGFP is used by the plurality of jurisdictions conducting citizen surveys across the U.S. The advantage of familiarity is one we did not want to dismiss because elected officials, staff and residents already are acquainted with opinion surveys measured this way. EGFP also has the advantage of offering three positive options, rather than only two, over which a resident can offer an opinion. While symmetrical scales often are the right choice in other measurement tasks, we have found that ratings of almost every local government service in almost every jurisdiction tend, on average, to be positive (that is, above the scale midpoint). Therefore, to permit finer distinctions among positively rated services, EGFP offers three options across which to spread those ratings. EGFP is more neutral because it requires no positive statement of service quality to judge (as agree-disagree scales require) and, finally, EGFP intends to measure absolute quality of service delivery or community quality (unlike satisfaction scales which ignore residents' perceptions of quality in favor of their report on the acceptability of the level of service offered).

On many of the questions in the survey respondents may answer "don't know." The proportion of respondents giving this reply is shown in the full set of responses included in Appendix A. However, these responses have been removed from the analyses presented in the body of the report. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item.

For two of the items related to crime victimization and crime reporting, "don't know" responses were not removed. These questions were not evaluative; rather, respondents were asked if they or any member of their household had been a victim of a crime within the last year. If they were, they were then asked whether the crime had been reported to police.

Putting Evaluations Onto a 100-Point Scale

Although responses to many of the evaluative questions were made on a 4 point scale with 1 representing the best rating and 4 the worst, many of the results in this summary are reported on a common scale where 0 is the worst possible rating and 100 is the best possible rating. If everyone reported "excellent," then the result would be 100 on the 100-point scale. Likewise, if all respondents gave a "poor" rating, the result would be 0 on the 100-point scale. If the average rating for quality of life was "good," then the result would be 67 on a 100-point scale; "fair" would be 33 on the 100-point scale. The 95 percent confidence interval around an average score on the 100-point scale is no greater than plus or minus 3 points based on all respondents.

Interpreting Comparisons to Previous Years

This report contains comparisons with prior years' results; found primarily in the graphic representations of the data. In these graphs, data from 2007 are compared to data from 2002 and 2004. The table following a graph contains 2007 data only, and is titled accordingly. Differences between years can be considered "statistically significant" if they are greater than 5 percentage points or 3 points on a 100 point scale.

COMMUNITY LIFE

The National Citizen Survey[™] contained many questions related to the life of residents in the community. Survey participants were asked to rate their overall quality of life, as well as other aspects of quality of life in Sedona. They also evaluated characteristics of the community, and gave their perceptions of safety in the City of Sedona. The questionnaire assessed use of the amenities of the community and involvement by respondents in the civic and economic life of Sedona.

Quality of Life

When asked to rate the overall quality of life in Sedona, 30% of respondents thought it was "excellent." Only 2% rated overall quality of life as "poor."

Figure 1: Overall Quality of Life in Sedona

The average rating of overall quality of life on a 100-point scale was 71 in 2002 as well as in 2004. In 2007, the rating was also 71. Sedona as a place to raise children received an average rating of 58 on a 100-point scale in 2002 and 54 in 2004, compared to 53 in 2007. Other ratings can be seen in the charts below.

Note: "don't know" response	s have been re	emoved.				

In 2007, the highest rated characteristics of Sedona were overall appearance, recreational opportunities, and opportunities to attend cultural activities. The average rating on a 100-point scale given to overall appearance of Sedona in 2007 was 70 compared to 66 in 2002 and 71 in 2004. Average ratings given to all the characteristics are shown in Figures 3, 4 and 5.

Note: "don't know" responses have been removed.									

When asked about potential problems in Sedona, the three concerns rated by the highest proportion of respondents as a "major problem" in 2007 were traffic congestion, too much growth, and taxes. In 2007 42% rated traffic congestion as a "major problem" compared to 44% in 2002 and 34% in 2004.

Figure 6: Ratings of Potential Problems in Sedona

In 2007, the rate of population growth in Sedona was viewed as "too fast" by 61% of respondents, while 19% thought it was "too slow."

Community Life

In 2007, 23% of respondents felt the impact of the economy would be positive on their family income in the next 12 months, while 32% felt it would be negative. In 2002, 13% of respondents and in 2004, 36% felt the impact of the economy would be positive.

Figure 8a: 2007 Perceptions of Economy

What impact, if any, do you think the economy will have on your family income in the next 6 months? Do you think the impact will be...

Figure 8b: Comparisons of Perceptions of Economy by Year

Note: Responses of "neutral" were omitted.

When evaluating safety in the community, 86% of respondents felt "somewhat" or "very safe" from violent crimes in Sedona in 2007, compared to 82% in 2002 and 80% in 2004. In their neighborhood after dark, 87% of survey participants felt "somewhat" or "very safe" in 2007, compared to 91% in 2002 and 84% in 2004.

In 2007, as assessed by the survey, 10% of households reported that at least one member had been the victim of one or more crimes in the past year. In 2002, 12% of households had reported that at least one member had been a crime victim, while 6% reported so in 2004. Of those who had been the victim of a crime in 2007, 63% had reported it to police.

Community Life

Community Participation

Participation in the civic, social and economic life of Sedona during the past year was assessed on the survey. The proportion of respondents engaging in various activities is shown in the chart below, with comparisons made between 2007, 2004 and 2002. Among those completing the questionnaire in 2007, 67% reported volunteering in the past year compared to 63% in 2002 and 66% in 2004. Voter status was also estimated, and is shown on the next page.²

LOCAL GOVERNMENT

Several aspects of the government of the City of Sedona were evaluated by residents completing The National Citizen Survey™. They were asked how much trust they placed in their local government, and what they felt about the services they receive from the City of Sedona. Those who had any contact with a City of Sedona employee in the past year gave their impressions of the most recent encounter.

Public Trust

When asked to evaluate whether they were pleased with the overall direction taken by the City of Sedona, residents gave an average rating of 47 on a 100-point scale in 2007, compared to 46 in 2002 and 47 in 2004.

The City of Sedona Employees

Impressions of the City of Sedona employees were assessed on the questionnaire. In 2007, those who had been in contact with a City of Sedona employee in the past year (71%) rated their overall impression as 71 on a 100-point scale, compared to an average rating of 70 received in 2002 as well as in 2004.

APPENDIX B: SURVEY METHODOLOGY

The National Citizen SurveyTM was developed to provide local jurisdictions an accurate, affordable and easy way to assess and interpret resident opinion about important community issues. While standardization of question wording and survey methods provide the rigor to assure valid results, each jurisdiction has enough flexibility to construct a customized version of The National Citizen SurveyTM that asks residents about key local services and important local issues.

Results offer insight into residents' perspectives about local government performance and as such provide important benchmarks for jurisdictions working on performance measurement. The National Citizen Survey™ is designed to help with budget, land use and strategic planning as well as to communicate with local residents. The National Citizen Survey™ permits questions to test support for local policies and answers to its questions also speak to community trust and involvement in community-building activities as well as to resident demographic characteristics.

The methods detailed in the following section are for the 2007 administration of The NCS in the City of Sedona. Information about the implementation in previous years can be found in past reports.

Sampling

Approximately 1,200 households were selected to participate in the survey using a stratified systematic sampling method.³ An individual within each household was selected using the birthday method.⁴

Survey Administration

Selected households received three mailings, one week apart, beginning April 23, 2007. The first mailing was a prenotification postcard announcing the upcoming survey. The next mailing contained a letter from the Mayor inviting the household to participate, a questionnaire and postage-paid return envelope. The final mailing contained a reminder letter and another survey and postage-paid return envelope. Completed surveys were collected over the following five weeks.

³ Systematic sampling is a method that closely approximates random sampling by selecting every Nth address until the desired number of households is chosen.

⁴ The birthday method is a process to remove bias in the selection of a person within the household by asking the "person whose birthday has most recently passed" to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys but leaving selection of respondent to household members will lead to bias.

Response Rate and Confidence Intervals

Of the 922 eligible households, 536 completed the survey providing a response rate of 58%. Approximately 278 addresses sampled were "vacant" or "not found.⁵" In general, the response rates obtained on citizen surveys range from 25% to 40%. The sample of households was selected systematically and impartially from a list of residences in the United States maintained by the U.S. postal service and sold to NRC through an independent vendor. The sample drawn for Sedona used USPS data to approximate the geographic boundaries of the jurisdiction, though some households just outside the city limits may have received surveys. The survey completers who technically do not reside in the jurisdiction may choose to respond to the survey because they feel an affiliation with the jurisdiction and its services. Local governments often have a sphere of influence – providing in-jurisdiction services that perimeter-residents use or even providing services outside the jurisdiction boundaries.

In theory, in 95 cases out of 100, the results based on such samples will differ by no more than 5 percentage points in either direction from what would have been obtained had responses been collected from all Sedona adults. This difference is also called a "margin of error.⁶" This difference from the presumed population finding is referred to as the sampling error. For subgroups of responses, the margin of sampling error is larger. In addition to sampling error, the practical difficulties of conducting any survey of the public may introduce other sources of error. For example, the failure of some of the selected adults to participate in the sample or the difficulty of including all sectors of the population, such as residents of some institutions or group residences, may lead to somewhat different results.

Weighting and Analyzing the Data

The surveys were analyzed using the SPSS statistical package. Frequency distributions and average (mean) ratings are presented in the body of the report.

The demographic characteristics of the sample were compared to those of the City of Sedona as reflected in the information sent by staff to National Research Center, Inc. When necessary, survey results were statistically adjusted to reflect the known population profile.

Generally, only two variables are used in a weighting scheme. Known population characteristics are compared to the characteristics of survey respondents. Generally, characteristics chosen as weighting variables are selected because they are not in proportion to what is shown in a jurisdiction's demographic profile and because differences in opinion are observed between subgroups of these characteristics. The two

⁵ "Eligible" households refer to addresses that belong to residences that are not vacant within the City of Sedona.

⁶ The margin of error was calculated using the following formula: 1.96 * square root (0.25/400). This margin of error is calculated in the most conservative way. The standard error was assumed to be the greatest for a binomial distribution: 50%/50%.

The National Citizen SurveyTM by National Research Center, Inc.

The City of Sedona Citizen Survey

Appendix B: Survey Methodology

socioeconomic characteristics that were used to weight the survey results were tenure and age. Other discrepancies between the whole population and the sample were also aided by the weighting due to the intercorrelation of many socioeconomic characteristics, although the percentages are not always identical in the sample compared to the population norms. The results of the weighting scheme are presented in the table on the following page.

APPENDIX C: SURVEY MATERIALS

The following pages contain copies of the survey materials sent to randomly selected households within the City of Sedona. All households selected for inclusion in the study were first sent a prenotification postcard informing them that they would be receiving a questionnaire within the following week. A week later, a cover letter and survey were sent, with a postage paid return envelope. Two weeks later a second cover letter and survey were sent. The second cover letter asked that those who had responded not do so again, while urging those who had not yet returned their surveys to please do so.

Dear Sedona Resident,

Fud Colgital

Your household has been selected at random to participate in an anonymous citizen survey about the City of Sedona. You will receive a copy of the survey next week in the mail with instructions for completing and returning it. Thank you in advance for helping us with this important project!

Sincerely,

Pud Colquitt Mayor

102 Roadrunner Drive Sedona, Arizona 86336 (928) 282-3113 TDD (928) 204-7102 Fax (928) 204-7105

April 2007

Dear Sedona Resident:

The City of Sedona wants to know what you think about our community and municipal government. You have been randomly selected to participate in the City of Sedona's 2007 Citizen Survey.

Please take a few minutes to fill out the enclosed Citizen Survey. Your answers will help the City of Sedona make decisions that affect our community. You should find the questions interesting and we will definitely find your answers useful. We ask that you please participate!

In order to get a representative sample of Sedona residents, the adult (anyone 18 years or older) in your household who most recently had a birthday should complete this survey. The year of birth of the adult does not matter.

Please have the appropriate member of the household spend a few minutes to answer all the questions and return the survey in the enclosed postage-paid envelope. **Your responses will remain completely anonymous.**

Your participation in this survey is very important – especially since your household is one of only a small number of households being surveyed. If you have any questions about the Citizen Survey, please call the City Manager's office at (928) 204-7127.

Please help us shape the future of Sedona. Thank you for your time and participation.

Sincerely,

Pud Colquitt

Mayor

May 2007

Dear Sedona Resident:

About one week ago, you should have received a copy of the enclosed survey. If you completed it and sent it back, we thank you for your time and ask you to discard this survey. Please do not respond twice. If you have not had a chance to complete the survey, we would appreciate your response. The City of Sedona wants to know what you think about our community and municipal government. You have been randomly selected to participate in the City of Sedona Citizen Survey.

Please take a few minutes to fill out the enclosed Citizen Survey. Your answers will help the City of Sedona make decisions that affect our community. You should find the questions interesting and we will definitely find your answers useful. We ask that you please participate!

In order to get a representative sample of Sedona residents, the adult (anyone 18 years or older) in your household who most recently had a birthday should complete this survey. The year of birth of the adult does not matter.

Please have the appropriate member of the household spend a few minutes to answer all the questions and return the survey in the enclosed postage-paid envelope. Your responses will remain completely anonymous.

Your participation in this survey is very important – especially since your household is one of only a small number of households being surveyed. If you have any questions about the Citizen Survey, please call the City Manager's office at (928) 204-7127.

Please help us shape the future of Sedona. Thank you for your time and participation.

Sincerely,

Pud Colquitt

Mayor

THE CITY OF SEDONA 2007 CITIZEN SURVEY

Please complete this questionnaire if you are the adult (age 18 or older) in the household who most recently had a birthday. The adult's year of birth does not matter. Please circle the response that most closely represents your opinion for each question. Your responses are anonymous and will be reported in group form only.

1. Please circle the number that comes closest to your opinion for each of the following questions:

How do you rate the overall quality of life in Sedona?1	2	3	4	5

2. Please rate each of the following characteristics as they relate to Sedona as a whole:

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't</u> know
Sense of community	1	2	3	4	5
Overall appearance of Sedona	1	2	3	4	5
Opportunities to attend cultural activities	1	2	3	4	5
Recreational opportunities	1	2	3	4	5
Access to affordable quality housing		2	3	4	5
Access to affordable quality child care	1	2	3	4	5
Access to affordable quality health care	1	2	3	4	5
Ease of car travel in Sedona	1	2	3	4	5
Ease of bicycle travel in Sedona	1	2	3	4	5
Ease of walking in Sedona	1	2	3	4	5

3. Please rate the speed of growth in the following categories in Sedona over the past 2 years:

	Much	Somewhat	Right	Somewhat	Much	Don't	
	too slow	too slow	<u>amount</u>	too fast	too fast	<u>know</u>	
Population growth	1	2	3	4	5	6	
Retail growth (stores, restaurants etc.)	1	2	3	4	5	6	
Jobs growth	1	2	3	4	5	6	

4. To what degree, if at all, are the following problems in Sedona:

	Not a	Minor	Moderate	Major	Don't
	<u>problem</u>	<u>problem</u>	<u>problem</u>	<u>problem</u>	<u>know</u>
Crime	1	2	3	4	5
Drugs	1	2	3	4	5
Too much growth	1	2	3	4	5
Noise	1	2	3	4	5
Run down buildings, weed lots, or junk vehicles	1	2	3	4	5
Taxes	1	2	3	4	5
Traffic congestion	1	2	3	4	5
Weeds	1	2	3	4	5

3	Very	Somewhat	Neither safe	Somewhat	Very	Don't
	<u>safe</u>	<u>safe</u>	<u>nor unsafe</u>	<u>unsafe</u>	<u>unsafe</u>	<u>know</u>
Violent crime (e.g., rape, assault, robbery)	1	2	3	4	5	6
Property crimes (e.g., burglary, theft)	1	2	3	4	5	6
Fire	1	2	3	4	5	6

6. Please rate how safe you feel:

O No

	Very	Somewhat	Neither safe	Somewhat	Very	Don't
	<u>safe</u>	<u>safe</u>	<u>nor unsafe</u>	<u>unsafe</u>	<u>unsafe</u>	<u>know</u>
In your neighborhood during the day		2	3	4	5	6
In your neighborhood after dark	1	2	3	4	5	6
In Sedona's Uptown area during the day	1	2	3	4	5	6
In Sedona's Uptown area after dark		2	3	4	5	6
In Sedona's parks during the day	1	2	3	4	5	6
In Sedona's parks after dark	1	2	3	4	5	6

7. During the past twelve months, were you or anyone in your household the victim of any crime?
 ○ No → Go to question #9
 ○ Yes → Go to question #8
 ○ Don't know

O	No → Go to question #9	O	Yes	→	Go to question #8
8.	If yes, was this crime (these crimes) repo	rted t	o the	ро	lice?

Yes

9. In the last 12 months, about how many times, if ever, have you or other household members participated in the following activities in Sedona?

O Don't know

No	Once or	3 to 12	13 to 26	More than
<u>Never</u>	<u>twice</u>	<u>times</u>	<u>times</u>	<u>26 times</u>
