

Announcement of Intent to begin Qualification-Based Selection of Engineering Consultant for the Coffee Pot Drainage Basin Improvements Design

The City of Sedona is announcing that it intends to begin review of the Consultant Information Request Forms, after August 1, 2014, as a basis for requesting Statements of Qualifications for design of the Coffee Pot Drainage Basin Improvements. The purpose of the project is to upgrade the existing drainage facilities within the Coffee Pot Drainage Basin north of SR 89A to 25-year drainage capacity per the City's existing Storm Water Master Plan. It is anticipated that the project will require preparation of construction documents and engineer's cost estimate, as well as interaction with private property owners and regulatory agencies. Parties interested in being considered during the review are requested to submit a completed FY 2014/2015 Consultant Information Request Form, if they have not submitted one already. Forms must be submitted by August 1, 2014 to be considered. These forms can be found on the City of Sedona website [here](#).
