

Q1 How would you like to review and provide feedback on the strategies and actions?

Answered: 225 Skipped: 0

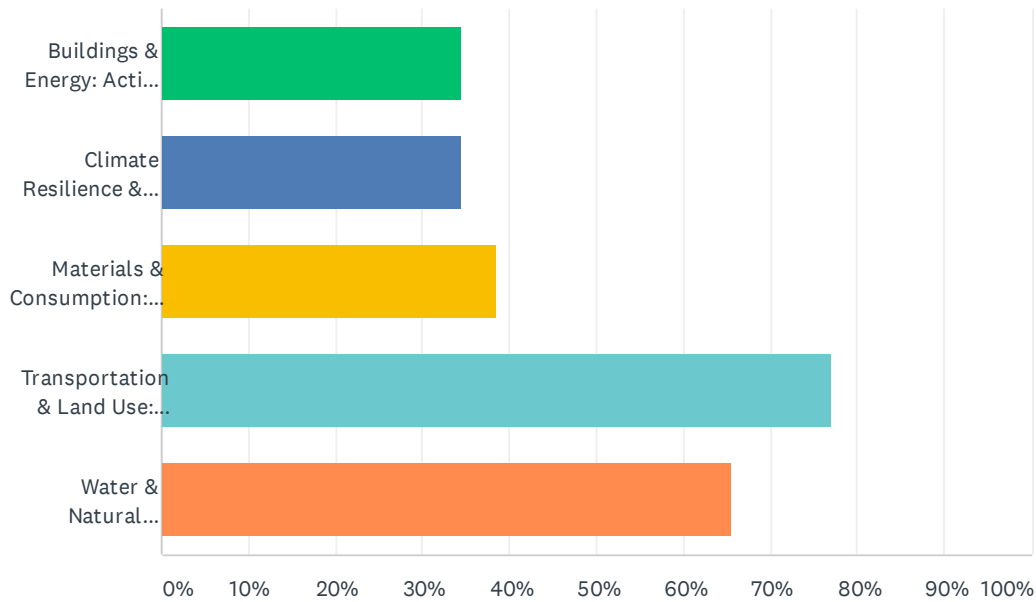

ANSWER CHOICES	RESPONSES
I would like to review and comment on the strategies and actions for ALL sectors (buildings and energy, climate resilience and cross cutting solutions, transportation and land-use, materials and consumption, water and natural systems).	87.56% 197
I would like to ONLY review and comment on the strategies and actions for SPECIFIC SECTORS.	12.44% 28
Other (please specify)	0.00% 0
TOTAL	225

#	OTHER (PLEASE SPECIFY)	DATE
	There are no responses.	

Q2 Please indicate for which focus areas you would like to review the strategies and actions. Check all that apply

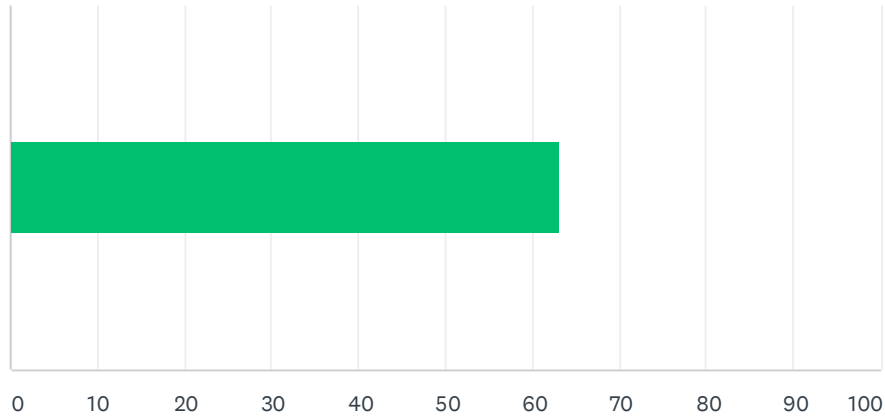

Answered: 26 Skipped: 199

ANSWER CHOICES	RESPONSES	
Buildings & Energy: Actions to increase sustainable buildings practices, renewable energy use, energy efficiency, and energy resiliency.	34.62%	9
Climate Resilience & Cross-Cutting Solutions: Actions to integrate climate action across operations and ensuring residents, businesses, facilities, and services are well-prepared and can withstand climate and non-climate emergencies.	34.62%	9
Materials & Consumption: Actions to move towards more sustainable consumption, low-carbon diets, and zero waste.	38.46%	10
Transportation & Land Use: Actions to reduce transportation emissions and enhance community mobility.	76.92%	20
Water & Natural Systems: Actions to protect and conserve water resources, including water quality and quantity. Actions to manage, restore, and foster resilient ecosystems, landscapes, and resources.	65.38%	17
Total Respondents: 26		

Q3 What is your level of support for these strategies?

Answered: 166 Skipped: 59

ANSWER CHOICES	AVERAGE NUMBER	TOTAL NUMBER	RESPONSES
	63	10,475	166
Total Respondents: 166

Q4 Please indicate your LEVEL OF SUPPORT for the following potential actions for carrying out the above strategies:

Answered: 192 Skipped: 33

Sedona Community Survey - Strategies and Actions

- LOW - I have major concerns
- MEDIUM - I have some concerns but generally support
- HIGH - I have no concerns and strongly support
- UNKNOWN/ UNSURE

	LOW - I HAVE MAJOR CONCERNS	MEDIUM - I HAVE SOME CONCERNS BUT GENERALLY SUPPORT	HIGH - I HAVE NO CONCERNS AND STRONGLY SUPPORT	UNKNOWN/ UNSURE	TOTAL	WEIGHTED AVERAGE
Incentivize upgrading to electric appliances in existing construction.	36.46% 70	22.40% 43	35.94% 69	5.21% 10	192	1.89
Incentivize electrical panel updates needed for on-site solar panel installation and powering electric appliances and vehicles.	29.32% 56	18.85% 36	50.26% 96	1.57% 3	191	2.18
Incentivize installation of solar on existing construction.	27.75% 53	15.18% 29	55.50% 106	1.57% 3	191	2.25
Educate and incentivize businesses and residents to reduce energy and water use.	23.56% 45	20.42% 39	54.97% 105	1.05% 2	191	2.29
Require large commercial and/or multifamily buildings to perform energy savings upgrades.	35.45% 67	17.99% 34	44.44% 84	2.12% 4	189	2.05
Require installation of solar on new construction.	38.42% 73	18.42% 35	40.53% 77	2.63% 5	190	1.97

Q5 What would be needed for you to fully support these strategies and actions?

Answered: 120 Skipped: 105

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	Enforcement plans, financial incentives	8/27/2020 1:09 PM
2	Incentivize and subsidize for those who require financial assistance.	8/26/2020 8:06 PM
3	I support everything but requiring solar installation on new construction, it puts an unfair cost burden on new construction	8/26/2020 12:50 PM
4	Requiring solar installation now would be going into a system that is broken at APS. There is no incentive from APS for the average person. Until that is fixed this is not a great solution and will create bad will and resentment	8/26/2020 9:34 AM
5	These strategies use taxes from moderate and low income individuals to subsidize wealthy. I cannot support	8/25/2020 5:02 PM
6	affordability of solar!	8/25/2020 2:28 PM
7	Don't use government funds to incentivize private affairs. As renewables prove themselves then the population will adapt them. It's not the government, and especially city government role to provide financial incentives for renewables.	8/24/2020 8:40 PM
8	would need to know what is meant by "incentivize" specifically,	8/24/2020 6:25 PM
9	Specific guidelines/regulations, including a cost/benefit analysis.	8/24/2020 6:04 PM
10	We're solar now and have electric car. We are in 100 % agreement to become a cooler greener world	8/24/2020 5:13 PM
11	For one, know the cost of solar. It can take years to "break even" on this cost. Also, incentives are great as long as those who choose not do something are not punished.	8/24/2020 12:09 PM
12	understand contra-indicators	8/24/2020 10:04 AM
13	just do it	8/23/2020 11:50 PM
14	Converting existing structures can cause more harm than good. Decades of exposure to radiation is now reflected in declining public health which scientists warned us about when e-meters went on out homes from the power company. See this Silicon-valley engineer turned technology health advocate: Jeromy Johnson discusses our attachment to technology and the health hazards such an addiction may hold. Jeromy Johnson is an expert in mitigating the negative impacts of Electromagnetic Field (EMF) exposure. He has a leading website on the topic and consults with individuals, families and organizations around the world to implement solutions that reduce and eliminate EMF pollution. Jeromy has an advanced degree in Civil Engineering and has worked in Silicon Valley for 15 years. After becoming what medical doctors call "Electro-hypersensitive" (EHS) in 2011 after extensive exposure to EMF radiation, he embarked on a journey of regaining his own health and educating others to critically evaluate theirs. Wireless WakeUp Call Jeromy Johnson Berkeley CA https://youtu.be/FONEaPTu9oI Published on Feb 18, 2016	8/23/2020 4:25 PM
15	Switching to electric appliances is beneficial only if there is a supply of electricity generated renewably. Solar installation on individual homes will only provide maximum benefits if electric companies have appropriate grid capabilities. Requiring large commercial and residential buildings to perform upgrades may be difficult and meet with objections during a severe economic downturn.	8/23/2020 2:17 PM
16	More education on the strategies.	8/23/2020 11:36 AM
17	Action.	8/23/2020 11:16 AM
18	Net metering needs to be brought back and supported by electric utilities. Change codes to require reduced energy systems on new construction and provide incentives for remodeling, such as reduced fees.	8/22/2020 7:26 PM
19	Incentives that provide funding dollars for residential and commercial building conversion to solar - AZ has a lot of sun!	8/22/2020 1:54 PM
20	Funds for incentives, willingness to deal with legal challenges	8/22/2020 1:32 PM
21	Nothing...	8/22/2020 12:41 PM

Sedona Community Survey - Strategies and Actions

22	Buildings require either maximum insulation and/or passive solar features in order for electrical winter heating to be economical compared to gas. Passive solar features are simple in concept, never need repair, and can be tremendously effective in our sunny climate.	8/22/2020 10:13 AM
23	Start on an initiative paired with an education campaign.	8/22/2020 9:48 AM
24	Assurance that the latest solar technology is available at a reasonable cost.	8/22/2020 9:30 AM
25	Lower taxes. These things would cost too much and there isn't strong evidence to support IMMEDIATE climate change actions.	8/22/2020 7:47 AM
26	Incentives are OK, but many of these items will easily pay for themselves. Set the bar high and innovative people will find ways to achieve them. Required solar should only come after required extreme efficiency measures. First reduce the load, then fewer solar panels are needed. And there should be exceptions for very shaded homes of course.	8/22/2020 7:42 AM
27	unsure	8/22/2020 7:35 AM
28	I've already done these on my place	8/22/2020 7:12 AM
29	Additional information on costs	8/22/2020 6:37 AM
30	We are second home owners in Sedona, so the cost to do energy upgrades could not be justified.	8/22/2020 6:36 AM
31	already fully support	8/22/2020 6:12 AM
32	I do not see any of this as a problem. Such silliness. Address the real problem of Sedona, traffic and tourists!!!	8/21/2020 2:59 PM
33	I don't think it's right to "require" these things. That implies that businesses (and residents?) will be fined or otherwise punished for choosing not to have solar energy. This doesn't seem right.	8/21/2020 1:39 PM
34	Solar energy is not the only renewable energy, wind works well here in Sedona. I think all options should be available and accepted in new buildings	8/20/2020 8:33 PM
35	I feel that you are pro electric, and the amount of space required to produce the electric power is extensive. You feel that the production of electricity produces less pollutants. You just out source it and have some other place produce it. Natural gas for water heater and furnaces is still appropriate.	8/20/2020 7:47 PM
36	I have trouble with "Requiring"	8/20/2020 12:38 PM
37	What does "incentivize" mean, and what multi-faceted approaches do you envision in order to make these actions inclusive?	8/20/2020 9:26 AM
38	Solar panels create high dirty electricity outputs. This strongly affects health (documented even if you don't believe it!!!)	8/19/2020 10:15 PM
39	Measurable annual objectives that show reductions in GHG and clearly are meeting net zero buildings. Work needs to ensure that construction wastes are not wasted but are reused, repurposed and recycled or up cycled. building new as well as retrofit need to keep their waste tending towards zero waste.	8/19/2020 3:56 PM
40	Mandate that a high percentage of the work has to be local companies.	8/19/2020 12:14 PM
41	Accessibility, affordability.	8/19/2020 8:49 AM
42	Would not support	8/18/2020 1:01 PM
43	No draconian measures to "punish" those who do not get on board.	8/18/2020 10:00 AM
44	Energy cost is working just fine to incentivize energy conservation. What would it take for you to stop being an authoritarian government in areas you know nothing about and to stop paying consultants to tell you what you want to hear? Solve the traffic congestion problem instead. That will drop carbon emissions significantly.	8/17/2020 6:08 PM
45	Nothing. I do not support government intervention that I am reading in this Survey	8/17/2020 1:49 PM
46	Proof that fossil fuels influence climate change	8/17/2020 12:22 PM

Sedona Community Survey - Strategies and Actions

47	None. While I see the necessity of energy savings. It should be done individually. Not FORCED!!!!	8/17/2020 11:31 AM
48	Who is going to pay for all of this	8/16/2020 9:59 PM
49	It would help if there was some rebate or reduction in energy cost but I would support it anyway	8/16/2020 6:35 PM
50	Don't do it.	8/16/2020 11:49 AM
51	Do not waste our money	8/16/2020 11:34 AM
52	I do NOT support these strategies & actions at all!	8/16/2020 6:51 AM
53	This is simply a burden on low income home owners and a waste of our tax dollars. We are a small community with a 'run away' city council. Fix our roads, fix the 'bottle neck' on 179 by some sort of cross walk bridge or tunnel on 179.	8/16/2020 1:01 AM
54	Truthfully I'm a long way from giving any support to this	8/15/2020 8:21 PM
55	Enforcement	8/15/2020 7:44 PM
56	Never	8/15/2020 5:37 PM
57	Building codes should include the best practices for energy efficiency that are cost neutral but forcing major cost additions on new or current installations should not happen.	8/15/2020 5:32 PM
58	Kill this CAP. Start over. Start small.	8/15/2020 4:21 PM
59	Not a priority	8/15/2020 4:15 PM
60	Low cost, fully reliable	8/15/2020 4:13 PM
61	None - I don't think this is the City's business. This is for individuals and individual businesses only.	8/15/2020 3:45 PM
62	I can't support big tyrannical government	8/15/2020 3:43 PM
63	Never. We need to have different and less wasteful and politically charged priorities	8/15/2020 2:31 PM
64	Its hard enough to build in town adding mandatory solar only makes it far more expensive	8/15/2020 8:07 AM
65	this sounds like a program that is being pushed by APS who has done many underhanded things in the past. First they make it sound like they care about our environment. Then you invest and they change their minds and want to remove the incentives and increase your bill.	8/14/2020 8:50 PM
66	In the current economy all businesses are experiencing financial hardship. Even when things are good here many are still struggling to keep up with high rents. Upgrades, should be incentives only not required. Also, requiring new construction required green technologies should be technologies that are proven to work for the use and not experimental or not proven to work for the long term.	8/14/2020 8:20 PM
67	Why no mention of solar on residential??? Confounds me given how much sunshine there is. Know we have a lot of retirees on fixed budgets but as the new generation of folks moving here who plan to be here for 30-40 years, I will be desperate to reduce energy costs when most summer days are 100+ degrees, as they will be in the next 10-20 years.	8/14/2020 6:51 PM
68	WHEN YOU STOP ALL ATV RENTALS AND THE DESTRUCTION OF OUR FOREST AND TRAILS, YOU WILL HAVE SHOWN A WILLINGNESS TO ACTUALLY DO SOMETHING OTHER THEN WASTE MONEY ON PIPE DREAMS THAT ARE NOT COST VS REDUCTION FACT BASED STRATEGIES.	8/14/2020 6:14 PM
69	Solar efficiency increases, Electric supply from a source other than solar, with the same level of environmental footprint	8/14/2020 4:13 PM
70	More specifics and discussions	8/14/2020 2:10 PM
71	Nothing would convince me to fully support these strategies	8/14/2020 1:57 PM
72	Better tech solar units and off peak storage.	8/14/2020 12:49 PM
73	No government mandates	8/14/2020 12:25 PM

Sedona Community Survey - Strategies and Actions

74	Find a way to do this without any cost to residence. This is really a waste of time and money.	8/14/2020 11:59 AM
75	There needs to be more information about the financial impacts to some already stressed households during this time. In the last item it is worded as "Require". That sounds like a demand with consequences, which could financially strap or cause financial hardships for many small businesses. At this time in our economy, this could be devastating.	8/14/2020 10:09 AM
76	Greater confidence in city leadership to actually lead any initiative like this.	8/14/2020 9:16 AM
77	There are multiple issues with going to a solar grid such as, waste disposal of old batteries, battery manufacturing methods, the lack of integration with the existing grid to utilize over-production of electricity, etc..	8/14/2020 8:51 AM
78	need statistics	8/14/2020 8:43 AM
79	Reality. Don't believe any "Climate Change" plan will have anything to do with changing climate: just a 'feel good' effort	8/14/2020 7:31 AM
80	The City needs to get their own act together. Stop allowing tourist to park on scenic roads (Soldier Pass, Dry Creek, Etc). Stop allowing these same tourist to dump their trash along these areas (soiled diapers, used toilet paper, etc). The City needs to start being a steward and stop being a problem!	8/14/2020 5:55 AM
81	Better understanding of economics and costs to citizens. And understanding of power grid stability	8/14/2020 5:48 AM
82	more information on how incentivizing would work	8/14/2020 5:18 AM
83	Cooking on electric is not something I support. Solar panels create waste and will fill our landfills, they are far from perfect and create a whole new set of problems. Panels are expensive, do not power the house they only back feed the grid. They create dirty electricity because the inverters are usually poorly made and this back feeds into the entire grid. Your neighbors' inverters affect your house.	8/13/2020 10:29 PM
84	Refer	8/13/2020 9:41 PM
85	There needs to be clear information as to the cost to the taxpayers of Sedona.	8/13/2020 5:50 PM
86	Will never support such actions	8/13/2020 5:49 PM
87	Encourage electric power plants to use natural gas at the state level. Otherwise, use education and free markets to reduce emissions. U.S. CO2 emissions are one of the only major countries to decline over the past few years because of the use of natural gas in power plants and market forces.	8/13/2020 4:37 PM
88	The current code has risen the cost of construction by 20% and due to COVID-19 the cost of lumber has risen over 40%. This plan would be catastrophic to the local businesses.	8/13/2020 4:26 PM
89	Incentives for installation of solar devices should not include those which require batteries for storage unless the batteries can be recycled readily and inexpensively.	8/13/2020 2:22 PM
90	Requiring upgrades to existing buildings is a tough one. There would have to be such good incentives that the cost could be kept reasonable. Requiring solar on new construction is a similar issue for me. Having said that, we just built and did put in solar.	8/13/2020 1:42 PM
91	Just clarification of solar efficiency of powering electric appliances being the absolute correct ecological and financially viable choice - especially for commercial buildings.	8/13/2020 1:33 PM
92	As one who is very EMF sensitive, the down side of solar is the massive amount of dirty electricity that emanates from the panels. I would like to see an upgrade in amount of EMF's thrown off solar panels. I could not live in a house with them on my roof. Inverters are also culprits. So many details.	8/12/2020 8:27 AM
93	There would be serious push-back on any requirements. Arizonans don't like to be told what to do. I know the City doesn't have the ability to make it cost more to build inefficiently, but that's the way to go.	8/10/2020 2:17 PM
94	a plan that would allow the community to convert in phases	8/10/2020 2:12 PM
95	SOLAR NEEDS TO BE MORE EFFICIENT AND LESS COSTLY, YOU NEED TO LOOK AT COST VS IMPACT	8/10/2020 12:56 PM

Sedona Community Survey - Strategies and Actions

96	Stop forcing you way into private people and businesses life. There is no role for the City in any of these things.	8/10/2020 11:52 AM
97	The city should be focused on the impact of tourism and vacation rentals.	8/10/2020 9:13 AM
98	4. I'm leery of education programs, because they have been tried before without dramatic results, and they can give the impression of just providing lip service, rather than action. 5. For requiring buildings to perform energy savings upgrades, the city should be willing to provide interest-free loans that pay back as the savings are realized.	8/9/2020 7:52 PM
99	Incentivize not Penalize—that gets us nowhere	8/9/2020 2:34 PM
100	Incentives are a great way to go, but I would not want to mandate updates on current buildings or appliances, especially for low income workers.	8/8/2020 11:43 AM
101	There are too many paranoid people in this town who will not support anything that is mandated. They resist authority, don't believe in science and so attempting to educate them would likely be a waste of time and money.	8/7/2020 10:20 PM
102	Ensure ALL businesses, including short-term rentals (STRs), comply and that compliance is prioritized so that the biggest and easiest targets are addressed first, but that ALL businesses must comply within a reasonable timeline.	8/7/2020 7:58 PM
103	The conversion of solar DC energy into AC creates high levels of Electromagnetic Interference (EMI or "Dirty Electricity") on the grid, which is biologically harmful. Sedona already has very high levels of EMI. Any solar facilities should be required to install line conditioners or filters so as to prevent this "dirt" on the electric lines.	8/7/2020 3:50 PM
104	better solar panals	8/7/2020 7:55 AM
105	The elimination of the term "require" that adds significantly to the cost of living in a town that's already too expensive for the middle class and the service industry employees.	8/7/2020 6:15 AM
106	Adequate fiscal and budget resources. I would be especially supportive if money was redirected from the Chamber toward these initiatives.	8/6/2020 8:06 PM
107	"Solar panels glimmering in the sun are an icon of all that is green. But while generating electricity through photovoltaics is indeed better for the environment than burning fossil fuels, several incidents have linked the manufacture of these shining symbols of environmental virtue to a trail of chemical pollution. And it turns out that the time it takes to compensate for the energy used and the greenhouse gases emitted in photovoltaic panel production varies substantially by technology and geography. ...today nearly half the world's photovoltaics are manufactured in China", not known for being environmentally sensitive. THIS WOULD NEED TO BE MITIGATED (Source: https://spectrum.ieee.org/green-tech/solar/solar-energy-isnt-always-as-green-as-you-think)	8/6/2020 10:48 AM
108	1 A clearly written and vetted policy for implementing the above. 2 A comprehensive program to educate all as to the critical importance of the above.	8/6/2020 6:39 AM
109	More time in the day	8/6/2020 6:08 AM
110	Nothing. Let the free market do it.	8/5/2020 9:49 PM
111	No requirements for existing biz and homeowners... only incentives	8/5/2020 5:29 PM
112	Faith in local government.	8/5/2020 4:03 PM
113	business and governmental support	8/5/2020 2:31 PM
114	No one should be absolutely forced.	8/5/2020 1:18 PM
115	An analysis of cost effectiveness. Who's paying for the incentives? Re solar on new construction, in general that would be okay but what if they don't have good solar access? Might be better to incentivize community solar. Sounds like that might be more possible with ACC and APS.	8/5/2020 12:17 PM
116	I do fully support them.	8/5/2020 11:27 AM
117	Also include incentives for ICF residential new construction.	8/5/2020 11:24 AM
118	I already support these strategies.	8/5/2020 11:21 AM

Sedona Community Survey - Strategies and Actions

119	I already do	8/5/2020 8:58 AM
120	Fully support already.	8/5/2020 8:40 AM

Q6 Do you have any other comments related to these strategies and actions?

Answered: 86 Skipped: 139

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	Since APS is a solar obstructionist for individual buildings. perhaps Sedona should explore the creation of an independent municipal utility. The City owned property out 89A could house a solar farm with batery storage.	8/26/2020 7:25 PM
2	Again APS needs to be fixed regarding energy incentives for the average household. Requiring solar is not fair or in the best economic interests of the average household. Support shifting from fossil fuel and natural gas sources however	8/26/2020 9:34 AM
3	They're foolish	8/25/2020 5:02 PM
4	Just get on it ASAP.	8/25/2020 2:28 PM
5	Current fire sprinkler code implementation conflicts greatly with energy-saving construction methods. The codes need to not conflict.	8/24/2020 9:01 PM
6	Just to consider planting more trees and or using different asphalt on our roads that are cooler and or charge vehicles.	8/24/2020 5:13 PM
7	Relying on increased generation from renewable sources like solar, wind will only increase potential of blackouts or rolling brownouts through the system. Look what is happening in a neighboring state.	8/24/2020 5:06 PM
8	I think I am missing something regarding natural gas. Do you want to move away from gas to electric?	8/24/2020 12:09 PM
9	no	8/23/2020 11:50 PM
10	While many states have made renewable energy law, California is now having rolling blackouts...again, because they are moving toward a 100% renewable plan that is impossible. The leader of the renewable movement recently testified before Congress and also tells the results of decades of investment here: Why renewables can't save the planet Michael Shellenberger TEDxDanubia 561K views https://m.youtube.com/watch?v=N-yALPEpV4w	8/23/2020 4:25 PM
11	Electric companies need to adopt policies that are more favorable to dispersed electric installations.	8/23/2020 2:17 PM
12	No.	8/23/2020 11:16 AM
13	I do not support incentivizing to change from gas appliances to electric, but there are plenty of electrical appliances and electronic equipment in our homes and businesses to benefit from using alternative energy sources, such as solar.	8/22/2020 7:26 PM
14	We tried incentives before, but the city had no funding	8/22/2020 1:32 PM
15	.electric is very expensive...natural gas is very cost effective...	8/22/2020 12:41 PM
16	Financial (building fee reductions), and free design assistance could incentivize energy efficiency in new private home construction.	8/22/2020 10:13 AM
17	no	8/22/2020 9:30 AM
18	See above	8/22/2020 7:47 AM
19	Remove the requirement for solar building permits for all but non standard (>15kW) installs. Just as Yavapai county has done.	8/22/2020 7:12 AM
20	Requiring solar may impose some economic stress to businesses or residents	8/22/2020 6:37 AM
21	All hot water systems for new construction should be solar. With over 300 days of sunshine, these systems should have be standard in all Arizona homes years ago.	8/22/2020 6:36 AM
22	Sedona's major problem is traffic not this nonsense. Quit giving the Chamber of Commerce 2.5 MILLION \$ per year. Our roads can't handle and tourists are destroying forest land!!!!	8/21/2020 2:59 PM
23	Incentives need to be appropriate.	8/21/2020 1:39 PM
24	I think the power companies should have to give people who are supplying them with power more.	8/20/2020 8:33 PM
25	Why such a strong push for the use of more electrical appliances? There needs to be more	8/20/2020 7:47 PM

Sedona Community Survey - Strategies and Actions

	incentives to place solar panels.	
26	Education and economic evaluations are key. We saw that solar was a smart and secure investment, and provided more income than other retirement options. This is an intrinsic incentive. The bonuses were that it was reducing our carbon footprint, supporting green jobs and helping the planet.	8/20/2020 9:26 AM
27	Contact Ben Lonetree- an electrical engineer and he will explain it 928 202 6599	8/19/2020 10:15 PM
28	Conservation of water. Gray water would be plumbed into the new or old buildings to conserve. Capture rain water for on site and shade promotion. Cool roofs and cool temperature colors. No gas installations for new construction and retrofits only electric appliances. High efficiency to stay cool in summer and warm in winter with net zero energy. Passive heating by sun for winter and cooled by the earth. Efficient windows and doors.	8/19/2020 3:56 PM
29	Mandate that a high percentage of the work has to be local companies.	8/19/2020 12:14 PM
30	Incentives and tax benefits as well as education are key to getting residents and businesses on board.	8/18/2020 10:00 AM
31	Solar costs 10 cents per kWh to generate versus 2 - 4 cents for hydro or coal. Why don't you wait until it is economically viable before imposing it on others.	8/17/2020 6:08 PM
32	I see a loss of individual freedoms, huge monetary cost to residents and businesses. Our country has an abundance of natural gas. It is CLEAN ENERGY AND INEXPENSIVE. We do not need your strategies and actions	8/17/2020 1:49 PM
33	I would make it illegal to burn wood even in old structures	8/16/2020 6:35 PM
34	Do not force seniors to spend their money.	8/16/2020 12:02 PM
35	Do not waste out money.	8/16/2020 11:49 AM
36	Maintain roads instead	8/16/2020 11:34 AM
37	Why are we moving toward a 'green new deal' when the main problem is 'day trippers' created 'in part' by the chamber of commerce. Why does the city contribute millions of dollars to an organization that is helping to create our community problems. Why doesn't the city council support the residences and not the visitors. Is it because the power of the city council comes from the 'sales tax' generated by day trippers?	8/16/2020 1:01 AM
38	Money should be spent maintenance of the roads traffic problems etc. way before you start going green guys	8/15/2020 8:21 PM
39	you people are nuts	8/15/2020 5:37 PM
40	Natural gas is clean, plentiful and cheap. Why in the world would you push homes to go all electric?!?!?	8/15/2020 5:32 PM
41	Build the roads first and sidewalk	8/15/2020 4:15 PM
42	The local government of Sedona needs to focus on the immediate problems like traffic and noise pollution and stop wasting time and money on the "Green New Deal"	8/15/2020 4:13 PM
43	I dislike the focus. Let's see this council do something tangible. This is aspirational and should be handled by non profits. Yes, the city is a non profit but it is not the correct entity to do this - why? Because it is for the individual or individual business.	8/15/2020 3:45 PM
44	Stop being retarded	8/15/2020 3:43 PM
45	Do not waste your time or OUR MONEY. Fix the roads instead and reduce day tripper traffic by stopping the tax incentives.	8/15/2020 2:31 PM
46	How about tax breaks for going solar	8/15/2020 8:07 AM
47	I would never, never trust anyone or any company that wants to force more costs on construction companies. This would drive up the price of homes and may put small productive companies out of business. Let's look at the whole picture and not be led like sheep. Look at how APS has fought to remove the rate advantages of those of us who invested in Solar ten years ago. Look how many times they tried to lower the rate of the energy we produce or tax	8/14/2020 8:50 PM

Sedona Community Survey - Strategies and Actions

us. Do NOT trust anyone who wants to increase electricity use. Think about what has to happen to produce the electricity. Let's be smart.

48	.	8/14/2020 8:20 PM
49	What are 'electric fuels'? I'm pretty hip on alternative fuels but this is a new one to me. Not sure it makes sense to ask citizens to make decisions about these things as their level of understanding around the trade offs of requiring stores and existing buildings to integrate energy efficient fixtures are low.	8/14/2020 6:51 PM
50	CONTROL AT ZERO COST THE THINGS YOU CAN LIKE STOP GIVING MONEY TO THE CHAMBER WHO GETS US MOSTLY DAY TRIPPERS AND GET LONG TERM VACATIONERS. BETTER FOR THE TOURIST INDUSTRY WE DEPEND ON AND LESS TRAFFIC CARBON FOOT PRINT. UNTIL YOU ACTUALLY DO THE EASY AND GREATEST BENEFIT THINGS YOU ARE JUST WASTING OUR MONEY. OR IS IT FREE MONEY FOR YOU FAMILY OR FRIENDS?	8/14/2020 6:14 PM
51	These ideas are outside the scope of city government.	8/14/2020 1:57 PM
52	The best way to reduce our footprint is to invite fewer tourists.	8/14/2020 12:25 PM
53	I question the comment above where it states shifting to electric fuels. This statement is not quite clear and should be made more clear. Electric is far more expensive and still does contain a large carbon footprint. It seems the statement is moving away from Natural gas, which is far more efficient than electric fuels.	8/14/2020 10:09 AM
54	We need a new form of city government that has the ability to lead.	8/14/2020 9:16 AM
55	We need to be careful not to over regulate Sedona, or to gentrify the area and drive out the very few remaining families and lower income people here. We are already an extremely narrow societal cross section as it is.	8/14/2020 8:51 AM
56	Solar has yet to provide a replacement for electrical generation.	8/14/2020 7:31 AM
57	Cut funding to the Chamber and promote responsible actions by those that visit Sedona!	8/14/2020 5:55 AM
58	Mandating some of these items is not proper. Incentivizing is fine.	8/14/2020 5:48 AM
59	Use solar hot water heaters.	8/13/2020 10:29 PM
60	As the city, do what you want. Let businesses do what they want (to an extent).	8/13/2020 9:41 PM
61	Why doesn't anyone discuss or mention water as a resource in the face of continuing development. It is a finite resource and far more important than converting to solar.	8/13/2020 5:50 PM
62	Fire the Sustainability Coordinator	8/13/2020 5:49 PM
63	It is not the role of government (ESPECIALLY local government) to "incentivize" the economic decisions of businesses or consumers.	8/13/2020 4:37 PM
64	Incentives should be given for other renewable energy systems and strategies such as wind power and geothermal.	8/13/2020 2:22 PM
65	no	8/13/2020 1:33 PM
66	With the low cost of solar and APS support for homeowners this is easier than before.	8/12/2020 10:09 AM
67	We've been working on these strategies for as long as we've been in the state. Part of the problem is APS and the ACC (which APS currently owns). Also, it's difficult to give incentives when the City doesn't have meaningful incentives to give.	8/10/2020 2:17 PM
68	It think anything we can do to make our planet cleaner and safer is a good thing	8/10/2020 2:12 PM
69	If there is insufficient will to require buildings to perform upgrades, even with financial assistance, the city should still have a voluntary program with financial incentives, as was done with low-flow toilets.	8/9/2020 7:52 PM
70	Ban wood burning chimney use in Sedona in the winter please...	8/9/2020 2:34 PM
71	Hooray for solar!	8/8/2020 12:40 PM
72	Commercial building upgrades could be done in stages over years for landlords that are	8/8/2020 11:43 AM

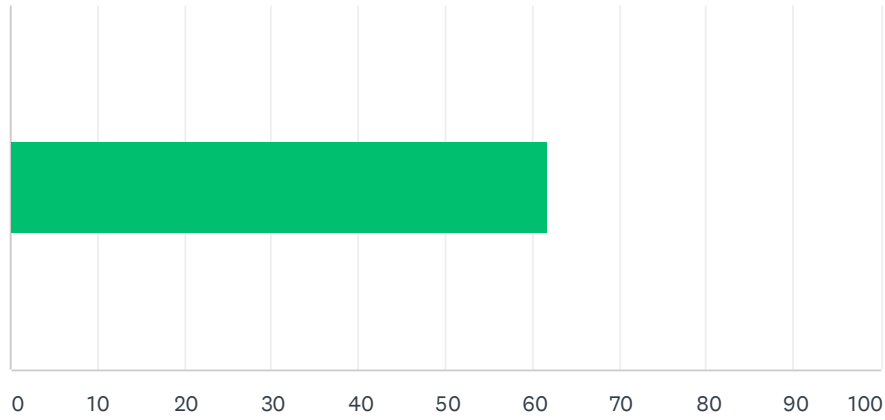

Sedona Community Survey - Strategies and Actions

impacted by Covid-related decreases in income. Separating commercial and multifamily buildings may help mitigate the impact on landlords that can't afford upgrades.

73	Don't be so oppressive with your regulations. We are already drowning in them.	8/8/2020 1:05 AM
74	Higher efficiency appliance, more support.	8/7/2020 5:57 PM
75	One way to drastically reduce energy use is to reject further wireless facilities. Wire the city with fiber optics to the premises, and cut energy use by 10x. Reject small cells and 5G. Legally, the city only has to allow enough facilities to place a phone call. Openly microwaving the atmosphere is harming our climate and the environment. Wireless is NOT SUSTAINABLE.	8/7/2020 3:50 PM
76	The technologies stated are one to one conversion energy processes. Inefficient and costly. This isn't a plan, it's a pipe dream we can't afford.	8/7/2020 6:15 AM
77	The future and world are rapidly adopting renewable energies - especially electric and solar. Sedona must develop strategies to keep up and even lead in order to better steward and protect our deteriorating resources and environment.	8/6/2020 8:06 PM
78	The strategies must be "required" not just "suggested".	8/6/2020 6:39 AM
79	Nice to see action taken. Thank you	8/6/2020 6:08 AM
80	The small amount you possibly will lower the world's carbon footprint is not worth the money and the increased taxes and COGs that will funnel down to the citizens and the consumers	8/5/2020 9:49 PM
81	How much of our money did you already waste on this survey?	8/5/2020 4:03 PM
82	We need to retrofit low income housing, which has co-benefits. So I would support significant incentives for that.	8/5/2020 12:17 PM
83	I like gas stoves better than electric.	8/5/2020 11:27 AM
84	ICF construction provides much better insulation, quicker construction times, as well as provides better protection from fire, than traditional wood frame construction.	8/5/2020 11:24 AM
85	Locating needed funding needs to be creative and keep equity as a priority	8/5/2020 8:58 AM
86	These are all sensible and important actions. Would love to see us make significant progress in this area.	8/5/2020 8:40 AM

Q7 What is your level of support for these strategies?

Q8 Please indicate your LEVEL OF SUPPORT for the following potential actions for carrying out the above strategies:

Answered: 181 Skipped: 44

Sedona Community Survey - Strategies and Actions

Sedona Community Survey - Strategies and Actions

	LOW – I HAVE MAJOR CONCERNS	MEDIUM – I HAVE SOME CONCERNS BUT GENERALLY SUPPORT	HIGH – I HAVE NO CONCERNS AND STRONGLY SUPPORT	UNKNOWN/ UNSURE	TOTAL	WEIGHTED AVERAGE
Educate the community about eating lower down on the food chain and provide information on plant-based foods.	39.23% 71	20.44% 37	39.23% 71	1.10% 2	181	1.98
Educate the community about on avoiding food-waste and provide information on right-sizing meals and food storage.	33.70% 61	18.78% 34	46.96% 85	0.55% 1	181	2.12
Establish a robust food recovery program to support community members and protect against disruptions to our food supply.	29.28% 53	18.23% 33	45.30% 82	7.18% 13	181	2.02
Implement a city-wide community organics program (i.e., food waste, yard waste).	29.83% 54	14.92% 27	51.38% 93	3.87% 7	181	2.14

Q9 What would be needed for you to fully support these strategies and actions?

Answered: 99 Skipped: 126

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	ease of food/yard waste collection	8/27/2020 1:55 PM
2	I am vegan myself, but hesitant about backlash of a municipal government promoting individual food choices. Would rather concentrate on community wide composting and other programs to reduce waste.	8/26/2020 7:58 PM
3	My concerns would be removed with careful implementation. (I think the push-back you can get from improperly enacted "education" programs can actually cause the opposite effect.)	8/26/2020 12:54 PM
4	Even though I try to eat vegan, I don't think it is the city's role to educate people about eating plant-based foods. However you could incorporate education into the food waste recycling program where residents can see for themselves the challenges. This topic is personal and opposition may threaten the rest of what you are trying to do. How does meat eating show up in the pie chart for carbon emissions. It's not clear. Again just a political reality but the actions and programs are right on target! Food waste and education storage should be done perhaps by Ag extension or the Home Economics. Seems duplication. Think that they could be requested to offer this-	8/26/2020 9:42 AM
5	If they weren't so inane, I might be able to comment. A robust food recovery program is only effective in large communities with a large low-income population.	8/25/2020 9:07 PM
6	Will not support	8/25/2020 3:23 PM
7	I support this.	8/25/2020 2:35 PM
8	What and how people eat is not the city government's business. Waste, however, is a city issue and should be approached with a sustainability mindset.	8/24/2020 9:07 PM
9	You could offer disposal methods but should not mandate them. This is a low result area of emissions. The theory of reducing red meat is a joke. Sure cows emit greenhouse gases, but to say reducing meat consumption would have any meaningful impact is ridiculous.	8/24/2020 8:44 PM
10	Cost/benefit analysis of specific proposals	8/24/2020 6:05 PM
11	Simply more information. What does the food recovery program look like? What is a city-wide community organics program?	8/24/2020 12:12 PM
12	please proceed	8/23/2020 11:51 PM
13	This is severely low level remediation. There is a point at which some ideas need to be cast aside for better ones.	8/23/2020 4:28 PM
14	I don't understand how a "food recovery" program or a "food waste" program works. I do fully support a yard waste program if the waste is used for compost.	8/23/2020 2:22 PM
15	Action.	8/23/2020 11:17 AM
16	Make composting easy. Incentivize growers, resorts, hotels, and grocery stores to offer unused food to food banks. Monetarily support the food banks, so they can quickly distribute unused food.	8/22/2020 7:36 PM
17	Local bins to deposit organic waste and buy-in from the commercial trash haulers.	8/22/2020 1:55 PM
18	This is easier and not too expensive.	8/22/2020 1:35 PM
19	I'm no sure what this means....	8/22/2020 9:35 AM
20	Like was done in Boulder, CO, limit Sedona and surrounding area growth - that would limit waste and almost all the problems in this survey.	8/22/2020 7:52 AM
21	Education is always good, but the people who need to take the most action usually don't pay attention. You have to implement programs that make it easier to do the right thing. Being wasteful is easier now.	8/22/2020 7:44 AM
22	unsure	8/22/2020 7:42 AM
23	I'm already a long time vegetarian	8/22/2020 7:16 AM
24	I have an engineering background, and support environmental preservation on all levels	8/22/2020 6:39 AM

Sedona Community Survey - Strategies and Actions

25	What a waste of time and money. Get to work and deal with the real issues in and for Sedona.	8/21/2020 3:01 PM
26	This sounds good, but how these things are established or implemented would be my only concerns.	8/21/2020 1:41 PM
27	I do not know what a robust food recovery program is.	8/20/2020 8:39 PM
28	I believe that meat is still one of the food groups. I do agree that it need to be used sparingly, but I'm worried you may take more then the inch that you are give.	8/20/2020 7:54 PM
29	All of this effort for 1%????????	8/20/2020 12:41 PM
30	I think education and effective examples are key to helping the community realize that these strategies are not too difficult to achieve.	8/20/2020 9:29 AM
31	You have NO right to tell any individual how to eat!! Every BODY is different.	8/19/2020 10:21 PM
32	Incentives for zero waste in communities, homes and construction. Encourage health benefits of plant based diets. Have restaurants promote right sizing of meals with plate sizes appropriate for caloric and nutritious artistic and delicious meals. Reduce sugar and supersize options. Let left over foods go to those that are hunger and not to the dump to contaminate other recyclables and produce methane. Develop composting for the city to give back to gardeners and farmers the compost. support a wide variety of methods from worms to bacteria and promote house hold reduction of waste. Promote residents to live with idea of zero waste.	8/19/2020 4:08 PM
33	no sure	8/19/2020 12:16 PM
34	A community garden would help all of these strategies.	8/19/2020 8:50 AM
35	Would not support	8/18/2020 1:01 PM
36	Education is one thing, but I have found that educators in this area are so one direction oriented that they pressure people to their point of view. This "education" assumes that people are not already educated in these strategies.	8/18/2020 10:54 AM
37	It would need to forget my molecular biology education, in order to support a low protein and low protein utilization diet. It would also require me to impose my views on others through propaganda and imposed regulations, which is something I cannot do.	8/17/2020 6:48 PM
38	NOTHING	8/17/2020 1:56 PM
39	Don't do it.	8/16/2020 12:04 PM
40	Don't do it.	8/16/2020 11:45 AM
41	I would NEVER support this	8/16/2020 6:53 AM
42	These programs sound like 'forced education' , the very kind of 1984 programs to re-educate the population. For example, how much meat I eat is my business, not the governments.	8/16/2020 1:08 AM
43	Nothing what do you want is the power to make the decisions that individuals should be making	8/15/2020 8:23 PM
44	never	8/15/2020 5:38 PM
45	Limit to encouraging use of existing food waste collection companies. Utilize the city waste water for community gardens across from the Waste Treatment Plant.	8/15/2020 5:38 PM
46	Waste of time.	8/15/2020 4:22 PM
47	Not a priority	8/15/2020 4:18 PM
48	Nothing. Not the province of local government	8/15/2020 4:16 PM
49	None - I don't support this at all. 0% support.	8/15/2020 3:46 PM
50	If you dumbasses want to pay for this out of your own pockets, go for it. Don't force us to do it.	8/15/2020 3:44 PM
51	Never.	8/15/2020 2:34 PM
52	Not sure how you can even implement those things	8/15/2020 8:10 AM
53	I agree as long as you stick with actions that support the words you are using such as educate	8/14/2020 8:55 PM

Sedona Community Survey - Strategies and Actions

and establish. The word "implement" scares me a little. That could sound like insist of force.

54	I support the city taking action to support efforts to provide for people in need. I think any effort to "educate" people about eating lower on the food chain is mostly ideological and won't have much effect. I very well educated in the area and that's been my experience. Has the city actually identified where the greatest food waste is? I would presume restaurants. I just don't think it's appropriate for the city of our size to preach about personal food choices. Composting program could be useful if you can muster the volunteers. How many people would really benefit from such a service, use the compost, where to store the stinky stuff...	8/14/2020 8:37 PM
55	As a Californian transplanted to Sedona, it is confounding that we don't recycle glass. It is far more recyclable than plastic and paper. People throw all plastic and paper in the bin and feel virtuous, they don't realize how little of it is actually recyclable. Waste companies can make money reselling glass, I think? Composting is missing also. So Much landscaping takes place around here, can't waste companies resell to others? Can't we push the waste companies to collect these two things, or allow them to support our citizens unless they do this?	8/14/2020 6:51 PM
56	THIS IS NOT YOUR JOB OR THE JOB OF THE CITY. IF YOU HAVE A FEW EVENTS SO THAT PEOPLE WHO WANT TO TALK ABOUT OR LEARN ABOUT BETTER EATING IS HELD AT CITY BUILDINGS, OK. BUT IT IS NOT WHAT OUR TAX MONEY IS FOR. YOU CAN NOT KEEP HOLES OUT OF OUR STREETS OR THE DRAINAGE CLEAR OF PLANTS AND DIRT SO THAT OUR STREETS AND HOMES FLOOD. PUSHING YOUR FOOD PREFERENCE AND FEEL GOOD STUFF WITH TAX MONEY, SHOULD GET YOU SUED.	8/14/2020 6:28 PM
57	These activities do not significantly move the needle on GHG and are unlikely to be economically viable	8/14/2020 4:16 PM
58	More details, discussion and cost analysis	8/14/2020 2:13 PM
59	not much could convince me that we need city government always trying to educate the public on their current dogma like eating lower on the food chain	8/14/2020 2:01 PM
60	Again, this is just added cost to the residence of Sedona, a total waste of time and money.	8/14/2020 12:00 PM
61	We have needed for a very long time truth in presentations to all this material. I think this is paramount. Both sides of our political system has shed truth on ecological impacts and our part in them and other sides tell it all to be a hoax. If we need real action, then we the people need to see and understand the truth, now it is the truth and prove that if our actions do not change, our world will be difficult to survive in.	8/14/2020 10:14 AM
62	Again, poor leadership t the city level will likely result in failure of these specific efforts.	8/14/2020 9:17 AM
63	This is Orwellian and is a VAST overstep of the boundaries between a representative government that serves the populace and a government that is dictating social engineering. I strongly oppose this level of government intrusion.	8/14/2020 8:55 AM
64	more info	8/14/2020 8:44 AM
65	a strong education program	8/14/2020 8:41 AM
66	Action and not words.	8/14/2020 5:58 AM
67	I would never support such extreme measures for an issue of such low significance. <1%	8/14/2020 5:50 AM
68	A plant based diet is ludicrous, grains cause inflammation, (high CRP) and autoimmunity. Meat and dairy are only bad for the environment and humans when they are not grass fed.	8/13/2020 10:30 PM
69	Not so much government control.	8/13/2020 5:51 PM
70	Will never support these	8/13/2020 5:49 PM
71	Limit local government spending to education. If individuals want to join and pay for an organics collection program, fine. But the community at large should not subsidize food recovery costs.	8/13/2020 4:58 PM
72	Partner with other organizations/gov't entities to share information and costs. We don't need to re-invent the wheel here.	8/13/2020 2:27 PM
73	community garden locations in each area of the city and outlying areas might be a good idea - Uptown - West - VOC - VV - Page Springs - The Canyon, etc.	8/13/2020 1:45 PM

Sedona Community Survey - Strategies and Actions

74	A central location needs to be developed for landscapers to drop off fall leaves for composting.	8/13/2020 12:42 PM
75	much more publicity	8/12/2020 10:10 AM
76	I would love to see plants planted that can truly thrive under the sewage waste water -- many of the junipers out there are turning yellow and dying from the water. Ideally, over time, we create a massive community garden and orchard, with city compost, water, etc. for food security for all	8/12/2020 8:29 AM
77	We do fully support these strategies and actions.	8/10/2020 2:22 PM
78	phasing it in	8/10/2020 2:14 PM
79	I think people understand this issue. We eat the foods we know are good for us. I do not want government forcing me to eat what they think i should eat.	8/10/2020 12:59 PM
80	Stop trying to get involved with people's day to day choices and life. It is none of the City of Sedona's business.	8/10/2020 11:53 AM
81	The city of Sedona has no business governing what we choose to eat.	8/10/2020 9:15 AM
82	3. I would gladly fully support a food recovery program, but only if it was limited to plant-based foods. We can't promote less meat and dairy consumption while giving such items to those in need.	8/9/2020 7:59 PM
83	City composting strategy for homes, businesses, and government.	8/9/2020 7:48 PM
84	I would need more information about food recovery programs (no idea what that means) and what a city-wide community organics program would look like. Are you talking about a community garden here?	8/8/2020 11:50 AM
85	You can't educate people who resist change. All attempts to educate the public to give up anything would be a waste of time and money.	8/7/2020 10:23 PM
86	You cannot increase waste diversion if you don't get proper data from end source companies such as waste haulers, recycling companies, waste water treatment operations, and landfills. Such data—amount of materials received, type of materials received, materials composted/recycled, etc.—must be part of the education program for households and businesses and a measure of the program's success.	8/7/2020 8:09 PM
87	Clear decisive action and plan that is easy and feasible on a wide scale.	8/7/2020 5:40 PM
88	None of the cities business, I never would	8/7/2020 7:56 AM
89	Stay out of our lives.	8/7/2020 6:19 AM
90	Effectiveness Cost-Effectiveness Affordability Fair distribution of benefits feasibility - tech considerations co-benefits or synergies improvements to public health, quality of life, employment and or infrastructure and services	8/6/2020 8:11 PM
91	The American diet is NOT healthy overall, but most people don't see the connection between what they ingest and their health or the health of the planet.	8/6/2020 5:31 PM
92	All strategies need to be clearly explained and easily implemented for the program to be successful.	8/6/2020 6:48 AM
93	Same as previous comments	8/5/2020 9:50 PM
94	I don't think government telling people what to eat would be welcome. Let Healthy World Sedona and others be the messenger on that.	8/5/2020 12:20 PM
95	I'm already advocating for these strategies.	8/5/2020 11:24 AM
96	Provide incentives for using modern septic systems that do not add to the city's wastewater treatment.	8/5/2020 11:24 AM
97	Hell frozen over?	8/5/2020 9:14 AM
98	Work to reduce defensive posturing by those who may feel this is a threat to lifestyle choice. Implement a community asset model until there is a cultural shift - expand and localize farmers markets to more remote communities and offer ethnically based foods that expand the non meat/ dairy pallet	8/5/2020 9:04 AM

99

Already support.

8/5/2020 8:40 AM

Q10 Do you have any other comments related to these strategies and actions?

Answered: 89 Skipped: 136

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	partner with Rotary Clubs	8/27/2020 1:55 PM
2	This is fuzzy -headed group-think. When the well-to-do try to assuage their liberal guilt, silly ideas abound.	8/25/2020 9:07 PM
3	Where is the funding for these actions?	8/25/2020 4:26 PM
4	Government should stay out of our private lives, especially when it comes to our food choices.	8/25/2020 3:23 PM
5	I'm sure there will be objections to changing peoples food choices; but maybe compromise would be possible to somedegree.	8/25/2020 2:35 PM
6	You are imposing these potential actions and strategies when , for the most part, our residents are older, and use less of all products you refer to. Landfill is over 30 miles away, and recycling is Presently available to all residents .	8/24/2020 5:12 PM
7	My understanding is that recycling programs are closing. How will we move forward if we don't have simple recycling?	8/24/2020 12:12 PM
8	Very much appreciate the inclusion of strategies regarding yard waste.	8/24/2020 10:58 AM
9	no	8/23/2020 11:51 PM
10	Organics must be put in the ground in order to make the soil sustain healthy life. Removing or keeping organics out of the ground can result in poor vegetation growth and the "dust bowl" effect seen all over the southwest in the 1930s.	8/23/2020 4:28 PM
11	I think you will need to do much community education on these programs.	8/23/2020 2:22 PM
12	No.	8/23/2020 11:17 AM
13	Anything beyond written information is going to take money to implement.	8/22/2020 7:36 PM
14	City will need to raise taxes to fund this process.	8/22/2020 1:35 PM
15	The government is way too involved on how people should live their live already...this would only increase that action...for a un-proven non peer reviewed global warming philosophy.	8/22/2020 12:45 PM
16	The city cannot become the food police. They will lose all residential support. However, they can incentivize these actions with things like free garden waste composting and free compost pickup.	8/22/2020 10:22 AM
17	I strongly favor a free yard waste site where free composted mulch is available to the public.	8/22/2020 9:35 AM
18	See above	8/22/2020 7:52 AM
19	Do more to encourage local farmers markets. The big impediment to growing local food is an effective way to market it.	8/22/2020 7:16 AM
20	Get er done!	8/22/2020 6:39 AM
21	These are generally low-cost solutions and should be implemented.	8/22/2020 6:13 AM
22	How ridiculous this whole thing is. Deal with real issues not this nonsense.	8/21/2020 3:01 PM
23	I'm against government pushing any agenda.	8/21/2020 1:41 PM
24	Mowing lawns, Christmas trees and other trimmings could be collected by neighborhoods, and redistributed as mulch for gardens. Almost every neighborhood has a park where the exchange could be made.	8/20/2020 8:39 PM
25	Give incentive for people to have personal gardens.	8/20/2020 7:54 PM
26	Freedom is important.	8/20/2020 12:41 PM
27	It is important that the City create and support infrastructure changes, businesses and organizations that provide these services. This would also require a change in waste collection services.	8/20/2020 9:29 AM
28	Want to minimize greenhouse emissions? Cut back on tourism with all the cars flooding us!!! (HA- never right? Forget the residence, go or the money right??)Reduce numbers and stop the	8/19/2020 10:21 PM

Sedona Community Survey - Strategies and Actions

	spread of expansion.	
29	Eventually we need to require manufactures to take back all material to be recycled and reused again. Milk bottles or soft drink bottles refilled instead of a one time use. Deposit on all containers to ensure they are reused. Promote sustainable packaging.	8/19/2020 4:08 PM
30	i think food related education is better served through schools and non profit. we can't even get the waste water plant to go wetlands constructed. that would be way better for everything.	8/19/2020 12:16 PM
31	All strategies should be voluntary with incentives and not mandatory.	8/18/2020 10:54 AM
32	How about solving the traffic congestion problem instead of terrorizing the citizens with your nutritional fantasies?	8/17/2020 6:48 PM
33	Stay out of people's lives. All of what you want to do (above) is discussed every where. It is not my city's place to tell me how and what to eat. Government has no place to be intruding in our lives like what you're suggesting.	8/17/2020 1:56 PM
34	Great ideas! I can imagine that education is key in getting others who are on the fence to support these strategies. So a good community education plan is key!	8/17/2020 12:10 AM
35	I totally support better ways to deal with yard waste. Not as supportive of composting organics. Lot of work for little gain	8/16/2020 6:39 PM
36	What people eat is their ownpersonal business.	8/16/2020 12:04 PM
37	Our choice in eating should be our own personal business.	8/16/2020 11:45 AM
38	Labeling things "organic" for the most part is an excuse to raise the price of items.	8/16/2020 6:53 AM
39	This 'planned program' scares me; the government directing the individual on how to live. And it is a huge waste of tax payer dollars: why is a 'city wide' organics program a governmental function? It certainly shouldn't be.	8/16/2020 1:08 AM
40	Nothing what do you want is the power to make the decisions that individuals should be making	8/15/2020 8:23 PM
41	no	8/15/2020 5:38 PM
42	Don't waste city money lecturing residents on what they should eat. We get enough from other sources.	8/15/2020 5:38 PM
43	To build the roads and roadsides first	8/15/2020 4:18 PM
44	Why should the city spend money doing these things? It is up to the individual.	8/15/2020 4:18 PM
45	These are not the right strategies and actions for Sedona government.	8/15/2020 4:16 PM
46	Same comment as made - not the city's business and should not be the focus.	8/15/2020 3:46 PM
47	You are dumb.	8/15/2020 3:44 PM
48	Focus on making the community safe and maintaining the roads.	8/15/2020 2:34 PM
49	I have found that no matter how much information you give to people, they will usually just stick with what they have been doing all their lives. You can try but don't count on anyone changing until something personal happens in their lives that wakes them up.	8/14/2020 8:55 PM
50	You are merging a lot of things that should be separated. Reducing meat eating is such a controversial topic, esp in a red state, and asking people to consider it in the same sentence as construction Materials doesn't make sense. Should separate by business action and consumer actions. Businesses can pass on the burden of regulations to consumers in a spread out way, while direct consumer actions listed contribute little. Eating less meat, buying more fuel efficient transport and buying less stuff in general is part of a communications campaign you should be doing anyway, asking residents to support it doesn't make sense.	8/14/2020 6:51 PM
51	JUST DUMB. NOT WHY YOU ARE THERE. 12 FOOT LONG BOARDS OR BUMPER PARTS SIT IN THE ROUND ABOUTS FOR TWO WEEKS FOR US TO LOOK AT. THE WEEDS HAVE OVER GROWN MANY OF THE CITY BUILDING AT POSSE GROUNDS AND OUR SCHOOLS. FIX THIS AND SHOW YOU CAN ACTUALLY DO WHAT YOUR JOBS ARE BEFORE YOU DO ALL THE FEEL GOOD STUFF THAT ONLY A TINY GROUP WILL DO.	8/14/2020 6:28 PM

Sedona Community Survey - Strategies and Actions

WE HAVE ONE VEGAN/VEGETARIAN RESTAURANT. TINY GROUP EVEN WITH ALL THE TOURISTS. IF ONLY THE LOCALS, THEY WOULD GO OUT OF BUSINESS.

52	food recovery (whatever that really means?), food waste, yard waste, composting, is probably something that we could do locally to good effect	8/14/2020 2:01 PM
53	Studies provided need to be from neutral sources, not anyone or any organization that is far left or far right. We need real scientific evidence from sources that are proven neutral and not connected to any city, state or political system.	8/14/2020 10:14 AM
54	Please reconsider this initiative and look for ways to remove the government from such extreme levels of social intrusion. These are all items that are personal choice and have far reaching implications.	8/14/2020 8:55 AM
55	no	8/14/2020 8:41 AM
56	Education is fine. But likely you will not get support to change citizens diets	8/14/2020 5:50 AM
57	I do not need the city to educate me on nutrition. That is way over the line and sounds like an Agenda 2030 UN program. I do support people having less children, less people, less diapers, less population, less over crowding. Promote population control.	8/13/2020 10:30 PM
58	No.	8/13/2020 5:51 PM
59	Fire the Sustainability Coordinator	8/13/2020 5:49 PM
60	There are programs that currently do the above. The City has real issues that they need to address. For example, the City has yet to underground the electrical lines that are still unfunded. Also neighborhoods that have flooding issues.	8/13/2020 4:29 PM
61	Composting would be a great use of the appropriate food scraps and yard waste. Perhaps the city could facilitate this.	8/13/2020 2:27 PM
62	I just remember Boulder, CO having a prolific community garden program when I lived in Colorado... maybe something like that. https://growinggardens.org/communitygardens/	8/13/2020 1:45 PM
63	Love this!	8/13/2020 1:36 PM
64	City wastewater bills need to be sent without return envelopes. I recycle almost 30 envelopes per month.	8/13/2020 12:42 PM
65	VOC is starting a community garden at Big Park school which is a major step here.	8/12/2020 10:10 AM
66	for 1%??	8/10/2020 5:47 PM
67	There are nonprofits attempting to minimize food waste and recovery. There are myths about legal liabilities for businesses donating food. They need to be cleared up officially. We've wanted a City composting program for years. We think residents should pay the City for waste management and the City should contract the best hauler, Sedona Recycles and a composter. That way, everyone pays for waste minimization whether they recycle and compost or not.	8/10/2020 2:22 PM
68	Positives for people who comply, not negatives for those who done	8/10/2020 2:14 PM
69	again too much government oversight	8/10/2020 12:59 PM
70	Perhaps instead of all of these wasteful programs, you can gut the sustainability position and save money for the upcoming recession.	8/10/2020 11:53 AM
71	I don't see an item about reducing waste, except organic waste. Shouldn't we also be encouraging less consumption generally?	8/9/2020 7:59 PM
72	Keep working on the state so we can ban plastic bags.	8/9/2020 7:48 PM
73	Develop a community food composting program and give mature compost to citizens for free	8/9/2020 2:37 PM
74	It is sad that in Sedona, yard waste, which can be composted, is thrown into the trash where it will mingle with non-degradable materials, like plastics, batteries, etc., and be useless. I would love it if Sedona had a special place where residents could bring plant waste (and for that matter, food waste, although that's another issue). I lived in a community once that had such a center where we could bring branches, leaves, any plant trimmings. There was a wood chipper and we could obtain wood chips, and the yard waste was otherwise composted. It would be a	8/8/2020 12:45 PM

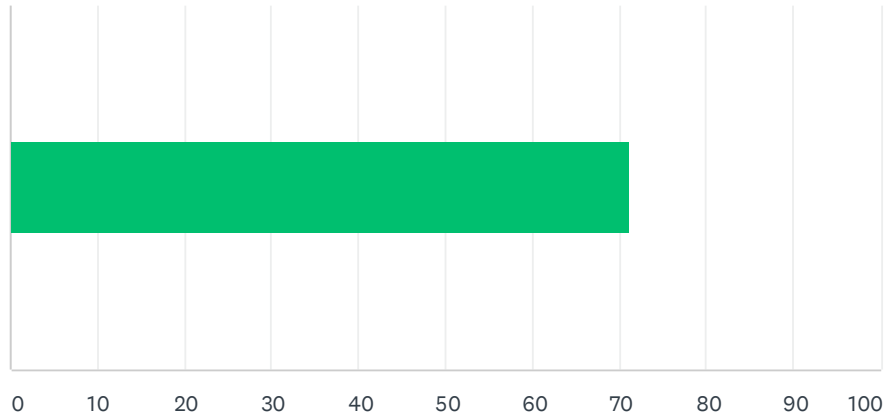

Sedona Community Survey - Strategies and Actions

HUGE benefit to residents, a wonderful blessing to the ecosystem, and not likely to meet with any opposition.

75	Not everyone's body is compatible with a completely plant-based diet. Information on limiting meat consumption (how much meat is good for different body types, for example) may be more effective than trying to mandate that all people eliminate meat consumption.	8/8/2020 11:50 AM
76	OMG...	8/8/2020 1:09 AM
77	Living in the rural area we do, household composting programs must be executed and supported in a manner that does not permit and promote access to composting materials by wildlife, drawing them into populated areas and promoting their reliance on human sources for food. As for businesses, encouraged use of naturally compostable packaging, cups, plates and utensils should be required, as well as a coordinated program to ensure leftover or unused foods are directed to the area's under-served, disadvantaged populations.	8/7/2020 8:09 PM
78	Concerned how this gets promoted and implemented.	8/7/2020 5:40 PM
79	Provide the services of a city government. Telling us what to eat, how and when isn't one of them. You want an environmentally cleaner Sedona? Stop funding unsustainable tourism. That's where our pollution and other issues are emanating from.	8/7/2020 6:19 AM
80	I believe these initiatives would not be cost-effective nor effective. I don't believe it's the city's place to educate in this way, nor that the public would be receptive and I wouldn't want my tax dollars spent on this. For only a 1% contribution to GHG emissions, it's not worth the cost or effort to implement these programs. There are better and more impactful areas to focus on that matter more.	8/6/2020 8:11 PM
81	Is it feasible to have recycling, food waste, yard waste, and education mobile units? I envision 3 or 4 trucks/buses, each towing an identified receptacle. Inside the buses, current staff or volunteers would hand food to the insecure and education for any who entered. These entourages would have a schedule that includes parking lots at high schools, supermarket shopping areas, and faith-based properties so they would meet residents in THEIR "hangouts." Maybe the entourage would stay put 2 days at a time, maybe longer. They would be brightly colored to call attention to themselves and their purpose. Those residents with "donations" could drive right up - as we do at Sedona Recycles on Shelby. During COVID-19 restrictions, no one would enter the buses - this is all completed outside - although some food and the workers would need an air-conditioned bus - perhaps an RV would be better.	8/6/2020 5:31 PM
82	A major concern is the very large amount of tourists that visit here daily and how to educate them.	8/6/2020 6:48 AM
83	A community garden area in the city	8/6/2020 6:10 AM
84	Same as previous comments	8/5/2020 9:50 PM
85	I support free will of people's individual food choices	8/5/2020 1:21 PM
86	Of the options below, the food recovery program probably has the best co-benefits, but diverting organics from the landfill is also important for GHGs	8/5/2020 12:20 PM
87	Food waste recovery programs require sustainable funding from government.	8/5/2020 11:24 AM
88	Maybe change joyful not blaming	8/5/2020 9:04 AM
89	Particularly strong support for reducing food waste and strengthening food recovery systems.	8/5/2020 8:40 AM

Q11 What is your LEVEL OF SUPPORT for these strategies?

- MEDIUM - I have some concerns but generally support
- HIGH - I have no concerns and strongly support
- UNKNOWN/ UNSURE

	LOW - I HAVE MAJOR CONCERNS	MEDIUM - I HAVE SOME CONCERNS BUT GENERALLY SUPPORT	HIGH - I HAVE NO CONCERNS AND STRONGLY SUPPORT	UNKNOWN/ UNSURE	TOTAL	WEIGHTED AVERAGE
Update municipal development codes, where feasible, to encourage transit-oriented/mixed-use development and more compact and affordable housing.	31.49% 57	22.10% 40	42.54% 77	3.87% 7	181	2.03
Advocate for the expansion of incentives for electric vehicles.	31.49% 57	16.02% 29	51.38% 93	1.10% 2	181	2.18
Introduce local incentives to accelerate the adoption of electric vehicles.	32.60% 59	18.23% 33	48.62% 88	0.55% 1	181	2.15
Enhance transit coverage, service quality, and/or speed.	23.08% 42	22.53% 41	53.30% 97	1.10% 2	182	2.28
Develop an EV Infrastructure Plan to promote and expand the construction of charging infrastructure and electric-powered bikes and vehicles.	31.87% 58	14.84% 27	52.75% 96	0.55% 1	182	2.20
Develop a municipal Green Fleet Policy to right size fleet, maximize efficiency, and accelerate the transition to electric vehicles.	27.07% 49	20.44% 37	48.62% 88	3.87% 7	181	2.14

Q13 What would be needed for you to fully support these strategies and actions?

Answered: 103 Skipped: 122

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	Infrastructure must be updated to acknowledge the traffic problem from Sedona into VOC and VOC into Sedona	8/27/2020 1:57 PM
2	Even though I am an urban and environmental planner by profession, I am not a strong advocate of super dense development in Sedona. Why? Because part of the beauty and charm of Sedona is the retention of m=ative plants in among the buildings, so it looks like the buildings are tucked into the natural landscape rather than a more urban structure. So there should be density of building and walkability, but judiciously placed so that the natural areas still have a prominent voice in the urban fabric. One of the things I would love to see is the reduction of the highway feel of 89A. A planted median, where possible, would do wonders for giving the town less of an arterial road feel and more of a destination. Also, please, we need pedestrian activated crossing signals mid block before people will get out of their cars. The Sedona blocks on 89A are too long for pedestrians to walk to a proper crossing, and jay walking is very dangerous on that road.	8/26/2020 8:05 PM
3	I support them	8/26/2020 12:58 PM
4	Unclear on what Mixed use development looks like-I don't want to lose the community feeling of neighborhoods. It would be good to clarify what this really means. How does this affect the current zoning. I like the idea of lofts and business being co-located in already high density areas but it seems clear to those buyers, the environment they are choosing. I am leery of lights, noise and traffic in conjunction with a current residential area. Think it would be good to paint a picture of what this mixed use development really looks like to alleviate fears and put in context of existing residential zoning.	8/26/2020 10:14 AM
5	Again, you're subsidizing wealthy people through taxes on the lower income citizens. Does anyone ever think of the additional electric grid demand from EVs?	8/25/2020 9:10 PM
6	Will not support.	8/25/2020 3:26 PM
7	I support these changes.	8/25/2020 2:38 PM
8	I don't know what a green fleet is.	8/24/2020 9:16 PM
9	Electric vehicles are not the answer.	8/24/2020 8:46 PM
10	cost/benefit analysis of specific proposals	8/24/2020 6:08 PM
11	I 100% support electric buses because they are much much quieter than the current buses. I will not support curb side drop off to private houses on streets at 11 p.m. The more bus stops you have as you are driving people from place to place, the more it will encourage drinking out at bars later into the evening. I have seen it happen in the other location where I live.	8/24/2020 12:21 PM
12	nothing more	8/23/2020 11:52 PM
13	Adding EV and construction causes waste and produces very little benefit. See Zion National Park Bus System. They move millions of visitors through beautiful parks easily and with minimal pollution either by vehicle or litter.	8/23/2020 4:47 PM
14	This plan is over kill. Much of these ideas/suggestions will have little or no effect on Climate Change	8/23/2020 3:22 PM
15	The transition to electric vehicles is only valuable if the needed electricity is generated sustainably. I only support denser housing if it is paired with planned open spaces.	8/23/2020 2:26 PM
16	More understanding.	8/23/2020 11:46 AM
17	Action.	8/23/2020 11:19 AM
18	Government needs to be the leader in using electric vehicles themselves, including police vehicles. Be an example.	8/22/2020 7:40 PM
19	Crack down on soot spewing altered diesel pick up trucks that blatantly "ICE" (internal combustion engine) exhaust other vehicles and streets of Sedona VOC - crack down on non electric cars that park in EV charging spaces. Make more EV charging spaces.	8/22/2020 1:58 PM
20	strong zoning and design criteria and enforcement for mixed use/high density development. Tlaquepaque is a good model, if expensive!	8/22/2020 1:46 PM

Sedona Community Survey - Strategies and Actions

21	Show City has the funding. Past transit and current systems fail for lack of funding.	8/22/2020 1:39 PM
22	Nothing	8/22/2020 12:47 PM
23	Transit needs not only to be more efficient, but to extend further out. In city, gas powered ATV rentals need to be prohibited and ATV rental centers need to be established out-of-town in places like the intersection of 89A and FR 525. This will improve the wild-west experience that tourists somehow get from driving on a dirt road in a noisy vehicle. This will reduce traffic and noise in the city along with reducing energy consumption.	8/22/2020 10:39 AM
24	Start a small project. Recruit Chamber to promote Sedona's green campaign.	8/22/2020 9:54 AM
25	A visitor shuttle service from uptown to all the hiking destinations in the canyon - to be paid for by the tourist industry.	8/22/2020 9:42 AM
26	reduce the amount of population influx from tourism and being respectful to Sedonan residents and their property through general consensus via voting on any strategies to be implemented	8/22/2020 8:01 AM
27	See previous comment regarding limiting growth to solve these problems.	8/22/2020 7:54 AM
28	It's hard to get people out of cars. Sedona could be a very good biking town - especially with electric bikes. The safe infrastructure has to be there to make it work. Mass transit is difficult, but with just two main roads Sedona can cover the main corridors well - and look at bikes to cover the last mile issues.	8/22/2020 7:48 AM
29	Grants	8/22/2020 7:25 AM
30	I already drive a Chevy BoltEV and am probably the only person to have tried out the new chargers at city hall. Virtually every one will be driving EVs over the next 10 years - lets incentivize it....	8/22/2020 7:22 AM
31	Can the current electric grid handle the significant increase in demand if this transition takes place? I don't think so.	8/22/2020 6:43 AM
32	Already support.	8/22/2020 6:15 AM
33	I do not support any of these. Deal with traffic...ROADS not this nonsense.	8/21/2020 3:03 PM
34	There can't be any punishment for individuals who decide that they don't want an electric vehicle. It's not right.	8/21/2020 1:42 PM
35	Green fleet?	8/20/2020 8:43 PM
36	Do you like nuclear power? Your electric vehicle are like nuclear power plants, what do you do with the used batteries? You act that they don't produce pollution like electricity is just there with out pollutants. You give me the break down from birth to grave and how that is better then the existing means. The carbon foot print that you are now producing with the huge electrical push is huge.	8/20/2020 8:10 PM
37	There must be a transition plan. It makes no sense to completely abandon vehicles that have already been built; their carbon footprint is pre-existing, and abandoning them prematurely would increase resource depletion, additional waste and toxic by-products, even if recycled. We must enable their longevity and gradual extinction and subsequent replacement by EV's.	8/20/2020 9:38 AM
38	Electric vehicles are more costly. Do not make it difficult for those who cannot afford to change over. What about tourists that bring in most of the pollution? Ban polluting tourists from coming here!!! What about the big busses that idle with their diesel?	8/19/2020 10:28 PM
39	We need to repave streets white to reduce the heat island effects. For all new paving and repairs. It becomes the norm. Not the same old black heat absorbing pavement. Have cut curbs to let home owners have water for garden, bioswells and to prevent excessive water run off that collects oil form parking lots and streets. Have police and emt's move to electric vehicles for their fleets and fire. Promote smart grids where car batteries and other batteries help the grid when there are peak loads. Design	8/19/2020 4:23 PM
40	nothing its coming whether people like it or not	8/19/2020 12:16 PM
41	I need an electric car to really support these strategies.	8/19/2020 8:54 AM
42	Would not support	8/18/2020 1:02 PM

Sedona Community Survey - Strategies and Actions

43	Need a better understanding of "updating development codes..." and I don't understand how "compact and affordable housing" fits into any of this.	8/18/2020 11:01 AM
44	It would take me becoming a tyrannical a-hole that imposes some misguided view of a personal utopia on others, to fully support these actions. I don't think I can do that.	8/17/2020 6:49 PM
45	NOTHING	8/17/2020 2:01 PM
46	I do not want to give up my car	8/17/2020 12:24 PM
47	Nothing. I totally support this and already trying to do my part	8/16/2020 6:43 PM
48	Don't waste our money.	8/16/2020 12:06 PM
49	Nothing, I won't support this!	8/16/2020 6:55 AM
50	For me I do not support these strategies; they are simply a mis-directed expenditures of city tax revenues.	8/16/2020 1:14 AM
51	You're taking individual rights away from citizens and taxpayers ...You were voted in you work for the people don't ever forget that	8/15/2020 8:30 PM
52	Electric city vehicles..	8/15/2020 7:18 PM
53	Electric vehicles are not "green". They require charging from the electrical grid. They require toxic batteries that only have a 6 year life. The answer is to reduce the number of vehicles on the Sedona roads. Incentivize tourists to park their car and use city transportation (which would have to be greatly improved). Use the Chamber of Commerce money to reward hotels and their customers to turn over there keys and use Hop On, Hop Off transportation to uptown, trailheads and Slide Rock.	8/15/2020 5:56 PM
54	Sedona city council has no business involving itself in these items. Fix the housing and AirBNB problems. Pull back on the Chamber spending money to attract day trippers.	8/15/2020 4:23 PM
55	Cost to turn to electric cars	8/15/2020 4:23 PM
56	I would never support Sedona City government involving itself in these efforts—too stupid. Waste of taxpayers money.	8/15/2020 4:19 PM
57	None - the city should not try to work its zoning to match this concept. Electric bikes are dangerous. There will be lawsuits.	8/15/2020 3:48 PM
58	I could get onboard some kind of trolley car. There is too much traffic for sure.	8/15/2020 3:44 PM
59	Never	8/15/2020 2:36 PM
60	We have transportation problems for 20 year and have done little to fix it....Jut kick the can down the road always	8/15/2020 8:13 AM
61	I support charging of electric bikes but not cars. There is no advantage to electric cars because of the power plants needed to create the electricity. It is a wash. Then you have spent all that money with no gain.	8/14/2020 9:00 PM
62	Well, having lived here for 23 years I don't see much of a demand for transit. I can't think of anything you need to do to support ebikes. I have looked into ebike sharing programs for a city of this size, and I couldn't find one that could service such a small town. Also, ebikes do not have universal chargers. Riders can carry their chargers with them but all they need is standard outlet. Lastly, e technology changes very fast and within a very short time you can find the equipment becomes obsolete quickly. Expensive.	8/14/2020 8:58 PM
63	Again, this is outside of the scope of our small city. You are making something that will benefit only the rich. I do not own a Tesla. But you want all this stuff for folks who can buy a 100k car. If it was viable the private business would make charging stations. If anything you are competing with private business just like you want to do with having the city get into the rental business. How about the folks who worked their whole lives to buy and extra house to use as a rental to support them in the retirements. And then you undercut them, they can't rent their house and may even lose it. Great job!	8/14/2020 6:40 PM
64	More details and cost discussions	8/14/2020 2:16 PM
65	Nothing, this is way outside the scope of city government	8/14/2020 2:05 PM

Sedona Community Survey - Strategies and Actions

66	Let the marketplace help make these decisions.	8/14/2020 12:29 PM
67	Have these charging stations receive payment from the users. To generate electricity, we have to use fossil fuels and that is what the electric car owners are trying to avoid. Why should the citizens of Sedona give free power to these owners. Waste of money for residents, but sure is wonderful for owners of these vehicles.	8/14/2020 12:03 PM
68	All ideas sound wonderful, but they all have consequences and the statements do not reveal those consequences. My biggest concern is statement #1. What does this mean to the communities and how will developers and profit minded rental properties alter and or maximize any code changes, making it easier to flood areas of single residences into multiple/ high density residences.	8/14/2020 10:20 AM
69	Strong leadership which does not currently exist at the city level.	8/14/2020 9:23 AM
70	Much more technical data on how the waste products are handled, how the batteries are manufactured, where the money for the incentives will be taken or diverted from, and many more questions.	8/14/2020 9:01 AM
71	EV not necessarily fuel saving.	8/14/2020 8:45 AM
72	much more education & what it will cost	8/14/2020 8:42 AM
73	These are personal choices not "Governments"	8/14/2020 8:38 AM
74	Reduce the impact production of electric have on the environment.	8/14/2020 6:02 AM
75	Impractical in many applications. Citizens will go to electric vehicles if the economics and benefits make sense to them. You can't regulate such issues.	8/14/2020 5:51 AM
76	Transit oriented, mixed use development and compact affordable housing. This is how poor people in cities live. Exclusive/wealthy communities don't need mixed use, transit, or compact, affordable housing. These are the hallmarks of poverty, uneducated, people with no assets who require that kind of assistance.	8/13/2020 10:30 PM
77	Government needs to be less invasive.	8/13/2020 5:53 PM
78	Will never support these	8/13/2020 5:50 PM
79	Show that we have the budget to support this and will not reduce other critical needs.	8/13/2020 5:45 PM
80	The role of local (city) government should be to encourage entrepreneurs to do the right things and eliminate red tape. Not to fund or subsidize. If EV's are more cost effective, they will be adopted. Government subsidies only distort markets, cost taxpayers mor, and lead to unanticipated consequences.	8/13/2020 5:06 PM
81	Public transit is expensive and has not been demonstrated to be effective. Everyone prefers to have their own cars. The city could encourage walking and biking within the city limits by providing shaded areas for rest and safe bike/pedestrian routes off 89-A.	8/13/2020 2:34 PM
82	I support the above AS LONG AS there are other, less popular decisions made on present city policies which are enacted. See item #6.	8/12/2020 11:50 AM
83	Funding	8/12/2020 10:11 AM
84	Housing for our wonderful and needed worker population. Suggestion: Build NO more new hotels; transform existing hotels that for whatever reason are no longer profitable into low-income housing for our workers.	8/12/2020 8:33 AM
85	Much of this effort is beyond the power of the City. Even large municipalities would have problems doing all that is recommended here.	8/10/2020 2:26 PM
86	use positives for participants rather than negatives for those who dont	8/10/2020 2:16 PM
87	the problem lies with the tourists. how do you stop them? people who can afford electric cars buy them. also electric cars need to be able to handle the vast distances we travel. if the city fleet is electric well great. Most people who live here dont use their cars much. how about giving locals bike paths and walking paths so we can access 89a without getting run over then that will cut down on emissions	8/10/2020 1:03 PM
88	A local city government that is doing this from a practical standpoint and not	8/10/2020 10:51 AM

Sedona Community Survey - Strategies and Actions

	AOC/Sanders/Biden fake leftist politics.	
89	What residents drive is no business of the city and funds should not be spent on this endeavor.	8/10/2020 9:16 AM
90	Fully onboard now.	8/8/2020 11:55 AM
91	Refocus the program to better address tourist traffic as the number of tourist vehicles and miles traveled are like at least 100 - 1000 times that of local residents and local government.	8/7/2020 8:19 PM
92	This is a good start but not many people have electric vehicles so can we do a parking and shuttle/ride share program to the major park areas.. also create public transit that is more energy efficient.	8/7/2020 5:42 PM
93	I would never support these.	8/7/2020 7:57 AM
94	If the people and the market demands electric vehicles, it is up to the people on a personal level to make that decision. Using money that the city does not have to build an infrastructure when we only have two roads, is not only Ludacris, but shows a total lack of Common Sense.	8/7/2020 6:23 AM
95	Focus on converting city vehicles to electric and increasing necessary infrastructure to facilitate electric vehicles (but not cars). I will oppose anything that is for bikes, increased public transportation or neighborhood connections. I strongly oppose the transit plan, which your consultant said would absolutely not improve traffic at all until the last phase that the city doesn't even know it can implement. That last phase should have been put first as everything else hinges on it and holds all the benefits. The city should NEVER consider diesel vehicles -- electric only as that is the very near future. Huge advances in batteries are in progress and UPS and FedEx are already ordering fleets of electric vehicles in preparation. BUT in this time of COVID which will last for a very long time, especially given Arizona's poor leadership and response and our tourist population from all around the country and world, now is not the time to push forward on any public transit plan as the required response to COVID will likely shift things drastically. Any past surveys about transit are now obsolete in light of COVID. I am also wholeheartedly opposed to bike lanes, pathways and connector roads through neighborhoods. We do not want any infrastructure that increases neighborhood traffic (vehicle, bike or foot) that makes neighborhoods more accessible, noisier, trashier and thus brings strangers or homeless into neighborhoods. Fix the tourist, trash, short-term-rental, and increasing crime problems first. City policies are bringing noise, traffic, strangers, nuisances, trash and crime into our neighborhoods.	8/6/2020 8:34 PM
96	If I felt better about how we produce electricity to begin with, I could better support its usage.	8/6/2020 5:33 PM
97	Costs will not be worth it or effective. Let free market do it if it is worth it,	8/5/2020 9:53 PM
98	Review of past surveys and voters vote.	8/5/2020 7:48 PM
99	Incentives to switch jeep companies and ATV rentals to all electric vehicles.	8/5/2020 7:15 PM
100	I'm all for electric vehicles but there's an equity issue that needs to be addressed. It might be more helpful to push for electric buses and electric bike/car/scooter sharing programs.	8/5/2020 12:27 PM
101	I'm ready.	8/5/2020 11:26 AM
102	Prioritize transit options, which allows all citizens to be able to move around the area. Focusing only on buying new and expensive electric vehicles does not promote affordable living for all.	8/5/2020 11:25 AM
103	Already support	8/5/2020 8:40 AM

Q14 Do you have any other comments related to these strategies and actions?

Answered: 82 Skipped: 143

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	Before you do these things, start with the obvious. Sedona should NOT be allowing OHV/ATV's on public streets -- at least without noise or pollution controls on them. They STINK as they pass, no doubt they are FAR more polluting than the average vehicle, and they are incredibly loud.... Change that and then do these next steps	8/26/2020 12:58 PM
2	See above but think transit oriented/ mixed use development needs to be clarified. Do these go together always? Maybe I'm not understanding this or it's part of the transportation planning effort. I understand that economically, transit like buses needs volume and frequency of passengers to support the operation. Might better define what is meant by "transit oriented"? It seems like bus stops are something that can go lots of locations. Combining these two might be more understandable if better defined. Are residents really creating a majority of transportation emissions? Transportation emissions seems tourism driven? Tell the Forest Service to not allow private cars at West Fork and high use destinations. This will drive bus use. Regular bus service to existing neighborhoods vs just along 89A would also help. Service industry drivers could use transit from Cottonwood and camp verde or Cornville. Maybe encourage or offer incentives for hospitality industry or resorts to provide electric vans for their workers to get to work.	8/26/2020 10:14 AM
3	Not to mention the horrible pollution from the rare earths mining in China to produce the Lithium batteries.	8/25/2020 9:10 PM
4	"Introduce local incentives to accelerate the adoption of electric vehicles." What kind of incentives? How much will incentives cost, and where will the money come from?	8/25/2020 4:30 PM
5	Neither residents nor visitors will use public transit in the numbers needed to make any economic sense.	8/25/2020 3:26 PM
6	some great ideas here to discuss.	8/25/2020 2:38 PM
7	City code should be amended to ban loud, non-electric ATV's. They should be included in the city noise ordinance. ATV rental companies within the city should be required to only rent out quiet, electric atv's. It is not right that they are the main source of noise and air pollution in many residential neighborhoods and trails. The city should protect what makes Sedona special. Let the polluters go elsewhere. Protect Sedona, or else it may no longer feel like something worth protecting.	8/24/2020 9:16 PM
8	Most of the issues and resulting air quality problems, which our minimal in Sedona, pertaining to the above can be attributed , for the most part, to the day trippers visiting our area. Why should the residents bear the cost? Wrong on all counts .	8/24/2020 5:18 PM
9	Honestly I do not want to see Sedona become like Zion, for example, where no private vehicles are permitted on a road for 6 months a year. I don't want to live where buses flood the roads and stop with tourists getting on an off constantly. I think you will spend a tremendous amount of money on electric vehicles or charging stations when the majority of people are visitors in rental cars. Also, no matter the incentive, I will not own an electric vehicle. They have their own set of problems.	8/24/2020 12:21 PM
10	no	8/23/2020 11:52 PM
11	Institute a building moratorium. The only way to prevent pollution and preserve resources is to control population. By limiting the population, you can control emissions, garbage/landfill, control water and preserve the beautiful landscape all while increasing property value. If you institute the Zion bus plan to move tourists you will benefit even more because tourists are easily directed to parks, trails and shopping without driving around lost.	8/23/2020 4:47 PM
12	Focus on traffic slowdowns which lower gas use. Very little is being done. All I hear is planning.	8/23/2020 3:22 PM
13	To the degree possible the transit system should be targeted at reducing tourist traffic. We do not have a traffic problem when there are no tourists in town.	8/23/2020 2:26 PM
14	Just concerned about development. I'd like Sedona to remain as 'rural' as possible.	8/23/2020 12:27 PM
15	No.	8/23/2020 11:19 AM
16	I believe Sedona and USFS need to collaborate on public transportation strategies to alleviate congestion and enhance safety in Oak Creek Canyon	8/22/2020 1:46 PM

Sedona Community Survey - Strategies and Actions

17	Again this is largely out of the City's control	8/22/2020 1:39 PM
18	Again...the government is way too involved on how people should live their lives already...this would only increase that action...for a un-proven non peer reviewed global warming philosophy.	8/22/2020 12:47 PM
19	Go to a single trash & recycling provider instead of multiple trucks every day. They damage roads, diesel pollution, wasted energy and continual noise. This makes huge sense.	8/22/2020 9:54 AM
20	I think that most of the use of a transit service would benefit workers coming into Sedona from other areas. The exception would be shuttles to/from Hillside/uptown.	8/22/2020 9:42 AM
21	full disclosure of action to Sedona citizens BEFORE it is implemented	8/22/2020 8:01 AM
22	As a "destination vacation city", mandate destination EV chargers at hotels and motels.	8/22/2020 7:22 AM
23	An appropriate phased plan is crucial.	8/22/2020 6:43 AM
24	EVs are the cars of the futue. Sedona could be a model on how to implement infrastructure in a community.	8/22/2020 6:15 AM
25	We need connector road (s) to and from the Village. What is being proposed is not of any importance at ALL.	8/21/2020 3:03 PM
26	The transit system should be broadened to help employees get here from flagstaff, cottonwood, and other towns	8/20/2020 8:43 PM
27	Please do this in small steps, give incentives to households and businesses and let people choose for themselves. As technology improves we can grow with it, and become more efficient as the technology becomes efficient.	8/20/2020 8:10 PM
28	I vote for Freedom.	8/20/2020 12:43 PM
29	I do favor the quick replacement of fleet and public transit with more EV's, and think broader support for delivery and commercial vehicles is a priority over individual vehicles.	8/20/2020 9:38 AM
30	You're concerned about air pollution- what about the pollution shown to fry birds and plants...and people- 5G? The mayor etc refuses to read the research and address it. If we all get sick (and we will) none of the above will matter. Some other communities and countries have banned it, so can we	8/19/2020 10:28 PM
31	How can planting trees in Sedona help with shade, reduction of pollutants and still be fire wise and conserve water? Can we promote green bikes in Sedona or bikes people rent or use for free? Can we ride and walk through Sedona on seperated pathways from the electric vehicles? Can the speed limit be reduced so that if your driving it takes the same amount of time as if your bicycling? How can we have incentives to share cars, leave cars parked 3-4 days per week? How can we promote all tourism vehicles to be electric and quite with low tire tread noise? Yes we want it easy to recharge EV at home, hotel or restaurants or while shopping. What streets could be closed and just be used for pedestrian promenades and restaurants and bars and dancing? Music and street performers? How can people be the incentive in planning rather than planning for cars as the driver of the design?	8/19/2020 4:23 PM
32	I really wish the VOC is included in a public transportation plan. The traffic backup begins in the VOC.	8/19/2020 8:54 AM
33	See 12...	8/18/2020 11:01 AM
34	Solve the traffic congestion problem instead, That will likely reduce emission more than all of your programs combined, while also giving deference to each individual's personal transportation needs.	8/17/2020 6:49 PM
35	Too costly. Residents & businesses will be responsible for the cost of the above strategic plan. The American taxpayer is subsidizing wealthy people who own their electric vehicles.	8/17/2020 2:01 PM
36	Great ideas! Sedona is the perfect place for city cycling- that is, not as a sport, but as a means to get to from point a to point b. Look at countries where cycling is safe and done in all occasions & across ages (Denmark, Netherlands! Etc) the Netherlands has an amazing biking system with a whole economy around it: cyclist cafes, tea shops, & hotels. I think people just don't know how great it can be until they've seen and tried it themselves. Make cycling safe: biking lanes apart from main road (as in divided- with plants or something separating Kane from cares) clear signage for motorists and cyclists. Traffic lights for both cyclists and	8/17/2020 12:16 AM

Sedona Community Survey - Strategies and Actions

motorists!! Make some roads where cyclists have priority for the whole road. Make biking accessible: have a fleet of bikes for Sedona such as in many countries across Europe! Make membership costs low. Make it attractive: apart bike lanes, where cyclists and pedestrians have priority. You could also have electric scooters (with maximum speed of course). Use local plants/ trees to creat proper shading for hot summer months. Perhaps have a bike-bus between up-town and lower town. Sedona is perfect for this kind of system. This will reduce traffic and pollution and connect the city better to the beautiful naturally surroundings which is in danger from too much traffic! You could also have local shuttles to popular destinations - reduces traffic and reduces type of access to key locations. We really need to re-think transportation in AZ - let Sedona lead by example!

37	The city should only allow residents to part at trail heads. All visitors should be required to take a bus. Many other tourist attractions already do it. Example is the Grand Canyon	8/16/2020 6:43 PM
38	Maintains the roads instead.	8/16/2020 12:06 PM
39	Electric vehicles obviously need more electricity to be provided. This raises costs again.	8/16/2020 6:55 AM
40	These 'plans' will cost millions of dollars to implement; the increased governmental power is frightening.	8/16/2020 1:14 AM
41	You were voted in you work for we the people...	8/15/2020 8:30 PM
42	Safe traffic lanes for bikes..ebikes..trikes..where doesn't feel dangerous like 89a.	8/15/2020 7:18 PM
43	Focus in incentives for Tourists to park their cars and use city transportation. Imagine a natural gas powered double decker half bus, beautifully wrapped with red rocks - wonderful views from the second level, guaranteed access to trailheads with no worry of parking, safe transportation for teenagers if the parents want to rest at the hotel! Pay the hotel and tourist to park their car and ride.	8/15/2020 5:56 PM
44	Electric care is poor solution. More wate. Stop all off rad turist cars	8/15/2020 4:23 PM
45	Codes can be changed without additional cost. The other ideas cost money.	8/15/2020 4:21 PM
46	Let the free market and individuals drive these outcomes.	8/15/2020 4:19 PM
47	Just don't do this - wrong path city of Sedona. Just be a good community that takes care of its residents and visitors by having quality roads - not full of cars - good policing (that is a MUST) and all should be just fine.	8/15/2020 3:48 PM
48	Stop being retarded.	8/15/2020 3:44 PM
49	Do not waste our money!	8/15/2020 2:36 PM
50	When will commit to public transportation?...Its always about money, but helping the community is last on the list...Businesses come first, then tourist, then us	8/15/2020 8:13 AM
51	Again, this must be the electric companies that are pushing this agenda. WAKE up. There is no real advantage to implementing these measures.	8/14/2020 9:00 PM
52	Not your place to do! Our schools suck and you want to do your own Green New Deal. Our tax money is not for you to play with when you can not even get the basic's done right.	8/14/2020 6:40 PM
53	The city would be best to just get out of the way and let future logical development happen on its own, less regulation, allow rather than coerce, no incentives, outside your scope again, do you really have that much money to spend? Just be business friendly, it will happen "organically" reduce regulation.	8/14/2020 2:05 PM
54	I want to be sure the City is not inserting hidden deeper agendas under the guise of sustainability. Protection for what is important to maintain here with the quality of living must be addressed and known. Every detail in these plans being introduced must be clear, easy to understand and post all potential results that may ensue with such changes.	8/14/2020 10:20 AM
55	The city refuses to take any action, in part due to conflict of interest by certain council members on things such as requiring that any jeep operator have alternative energy vehicles. Also, atvs should not be allowed to drive on the streets creating incredible noise and air pollution. We were shocked to see this here, other cities and towns do not allow this. Greed in action drives the agenda here - not what is right for the environment or the residents.	8/14/2020 9:23 AM
56	I strongly support bike and pedestrian traffic and the facilitation of bike lanes, and user-friendly	8/14/2020 9:01 AM

Sedona Community Survey - Strategies and Actions

sidewalks large enough and safe enough to encourage use. I support the adoption of electric vehicles but the infrastructure needed for charging stations should be the purview of the manufacturers and not a burden to all tax payers. This takes funds from projects that can be used for uses that are traditionally viewed as the responsibility of the government.

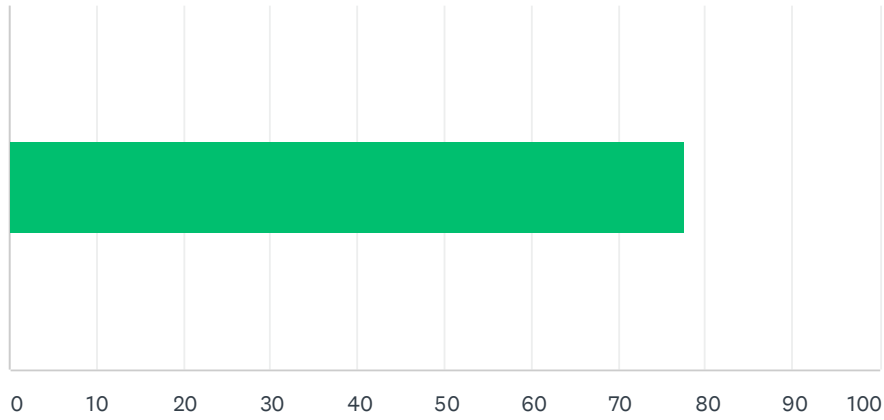

57	How do you finance such a project	8/14/2020 8:42 AM
58	Compact affordable housing is again part of Agenda 2030. We want single family homes on large lots, less houses with more space, more privacy, less humans, less crowding. Keep Sedona Exclusive. It sounds like you are working toward complying with the Affirmatively Affirming Fair Housing Act? You should do everything you can to never implement that here; let Cottonwood and Rimrock do it. I am firmly against social engineering. We all worked hard to be able to afford to live here, we don't want to change our town. Living in Sedona is a privilege, not a right.	8/13/2020 10:30 PM
59	Fire the Sustainability Coordinator	8/13/2020 5:50 PM
60	There are already government programs that support the above	8/13/2020 5:45 PM
61	Transit is perhaps the one area that local governments should encourage and subsidize. All are money losers everywhere, but traffic reduction provides a community benefit which is worthy of tax support.	8/13/2020 5:06 PM
62	Please do not spend city funds to provide public transit for visitors! This is an insane and ineffective approach to our traffic congestion problem!	8/13/2020 2:34 PM
63	We have major problems in Sedona related to tourism auto traffic, especially on 179. We can't be afraid to build roads/routes which eliminate cars standing in traffic. Additionally, how can we support "Jeep" tourism when the on and off road traffic continues to exacerbate the GHG problem?	8/12/2020 11:50 AM
64	Do they have solar powered cars?	8/12/2020 10:11 AM
65	Ban the off road razr vehicles.	8/10/2020 5:35 PM
66	When we have a reliable, regular, affordable transit system, we will use it. The current system is none of those things.	8/10/2020 2:26 PM
67	Need TRANSIT!!!!	8/10/2020 1:36 PM
68	put in bike paths and walk paths so locals can access 89a, more electric city vehicles is good, tourists would have to stay home for us to cut down on emissions. locals are not the problem	8/10/2020 1:03 PM
69	Look to Europe for progressive programs	8/9/2020 2:38 PM
70	Sadly, any more housing built in Sedona will further erode the natural beauty. While everyone believes they deserve affordable housing, it is unlikely that any new structure will be truly affordable--and who is going to choose who gets this housing among the many who desire it? When I was young, I worked in Beverly Hills. I took a bus to work. Beverly Hills did not feel they had to build affordable housing. Again, for the sake of the environment, we need to REDUCE construction, which damages our views, our natural areas, our wildlife, and simply adds more pollution. High-density housing will mean more cars, more air conditioners, more fossil fuels consumed, and contradicts everything for which we are striving...and again, it is extremely unlikely that it will be even remotely affordable.	8/8/2020 12:51 PM
71	Do all of this ASAP.	8/8/2020 11:55 AM
72	Some of your current SIM projects encourage more vehicular traffic and discourage pedestrians. I'm not sure you have a "vision" of a pedestrian friendly community...eventhough you claim you do.	8/8/2020 1:17 AM
73	So many resources are used to reconfigure roads to accommodate the growing number of tourists. Rather than expanding trail parking, on and off street parking, there should be a coordinated effort between local government, hotels, and businesses, including transportation businesses such as Pink Jeep, to provide shuttle and bus service to areas such as Slide Rock, West Fork Trail, all major trailheads within the greater Sedona limits, restaurants, supermarkets, and major shopping areas so that tourist cars can be left at the hotel. In addition, all off-road vehicle tour and rental companies must be incentivized to go to electric vehicles to reduce noise pollution, emissions and the leaking of gasoline, oil, and other engine fluids on public trails in order to better preserve our greatest economic driver, our environment.	8/7/2020 8:19 PM

Sedona Community Survey - Strategies and Actions

74	Not a fan of public transportation	8/7/2020 6:03 PM
75	Stop trying to run people's lives. Use of electric vehicles may be fine, but not one person on the city council takes one second to understand the cost and resources for the development of electric vehicles, especially batteries, and the disposal that waste product. It's single-minded myopia that causes issues in government, and with two roads and only two roads, these proposals are a bit past insane. With three million visitors bringing their vehicles to Sedona, playing around with EV products and thinking you're making a difference is one of the most ridiculous statements I have ever seen.	8/7/2020 6:23 AM
76	I would like to see something done about ATVs and the airport that has grown too big with too much traffic and too many noisy planes that have become worse than helicopters. Plus, the planes dump a lot of GHG emissions. There should be requirements and restrictions implemented similar to the Grand Canyon to protect our environment and reduce unbearable noise pollution. Planes should meet maximum noise regulations. Regarding ATVs someone mentioned the city could implement regulations requiring a certain ATV technology that minimizes noise (similar to mufflers required on cars) and then do a partnership to provide technology to convert/retrofit and make existing ATV fleets quieter. Then all future ATVs must conform to regulations. I also don't want to see any dense housing -- this will hurt property values. The affordable housing problem within Sedona is a non-issue for me. People across America cannot afford to live where they work and commute from more affordable areas. I don't see anything wrong with this and I don't want city property values damaged for the sake of low-income housing. Sedona is becoming increasingly trashy.	8/6/2020 8:34 PM
77	Even though today's automobiles emit very low levels of harmful tail pipe gases, the sheer quantity of vehicles standing in traffic on Hwy 179, trying to get into Sedona, negates the benefit of vehicle emission control. Mass transportation is paramount in reducing that negative effect. INCREASING PARKING SPACES IS COUNTERPRODUCTIVE. reduce parking spaces and require mass transportation use as Zion National Park has done. We are facing an epidemic of tourism and must act quickly and decisively to protect our natural environment.	8/6/2020 6:59 AM
78	Costs will not be worth it or effective. Let free market do it if it is worth it,	8/5/2020 9:53 PM
79	Development of a parking area and city run shuttle service for Highway 179 and 89A up in the canyon would be a big help to alleviate much of the vehicle emission issues, especially if that were tied to more consistent enforcement of illegal parking up in the canyon.	8/5/2020 4:01 PM
80	I believe there are some health risks related to electric vehicles, and I understand that statistically speaking they are not always reliable	8/5/2020 1:26 PM
81	Absolutely, the City should have a right-sized green fleet strategy. Transit needs to be frequent/convenient (like every 15 min), and developed primarily for tourists (major attractions, trail heads) as well as park and rides during major events.	8/5/2020 12:27 PM
82	Focusing first on EV incentives and municipal fleet might have the quickest impact. (But I'll miss out since I already bought my EV!)	8/5/2020 8:40 AM

Q15 What is your level of support for these strategies?

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	i support them	8/26/2020 12:58 PM
2	Again, subsidizing the wealthy on the backs of the poor.	8/25/2020 9:12 PM
3	support these ideas/	8/25/2020 2:40 PM
4	We do not need you ,or the City, controlling our daily activities and attempting to control our behavior.	8/24/2020 5:31 PM
5	I would like to know how you are going to reduce water use when builders are constantly building houses and multi-unit structures? And this seems to be encouraged for tax revenue? Like the Spring Creek Ranch proposal. How are you going to expand green spaces and reduce water use? Maybe vote for new county supervisors?	8/24/2020 12:24 PM
6	nothing more. please proceed	8/23/2020 11:52 PM
7	Many of these proposals burden the individual and manufacturer implying that you need someone else to do it for you. That seems beyond the scope of government and those ideas should be set aside for private enterprise to take up, not government. Incentives are confused, cost tax payers more money than benefits received and rarely produce enough benefit to stem the problem.	8/23/2020 4:59 PM
8	Waste of time implement water saving. Most people have desert landscapes already. Low flush are being implemented.	8/23/2020 3:25 PM
9	Action.	8/23/2020 11:20 AM
10	All government offices need to follow the Red Rock Ranger Station's strategy of using native plants and grasses for landscaping. Be an example.	8/22/2020 7:45 PM
11	I am assuming that #1 might include incentives for homeowners to use recycled gray water use for landscaping; rainwater harvesting barrels, xeriscaping etc.	8/22/2020 1:54 PM
12	Where is the funding for the incentives?	8/22/2020 1:42 PM
13	Restoration of natural features usually ends badly unless well done. Generally, prohibiting the use of any large gas-powered machinery prohibits even the most ill-advised "restoration" from doing too much permanent damage.	8/22/2020 10:54 AM
14	a more defined explanation of what exactly you are referring to and a general vote from Sedona citizens before any project is implimented	8/22/2020 8:35 AM
15	See previous comment re: limiting growth to solve all these problems.	8/22/2020 7:57 AM
16	Water is precious - and often wasted. Incentives are good, but there should be firm mandates so the worst offenders still do the right thing. New buildings should have rainwater capture to reduce flooding runoff and store water for later use.	8/22/2020 7:50 AM
17	Spraying the desert with waste water effluent may be the best solution but it sure looks ludicrous to visitors.	8/22/2020 7:28 AM
18	I fully support.	8/22/2020 6:47 AM
19	I would not ever support.	8/21/2020 3:05 PM
20	Nothing here sounds like there will be any impact on private citizens, so I have no concerns about these initiatives.	8/21/2020 1:44 PM
21	I would like to read more on your integrated plan it is ok to go back and fix thing but not at the cost of property owners.	8/20/2020 8:16 PM
22	I fully support these programs, and they must include robust education and services to implement. We need to implement a smart use of wastewater to consider it the valuable resource that it is.	8/20/2020 9:43 AM
23	Assurance that increases in population, building AND tourism will be limited as the hotels use LOTS of water as do the golf courses!. YOU NEED TO PROTECT US, NOT TOURISTS. STOP ENCROUCHING ON NEIGHBORHOODS WITH CRAZY SIDEWALKS. WE WILL FIGHT YOU	8/19/2020 10:36 PM

Sedona Community Survey - Strategies and Actions

24	No kentucky blue grass or grass that require watering in the desert once established. Have golf courses make their courses rough grass that is not dependent on water and herbicides. Yes definitely have new construction and retrofits to plant native and collect water from their streets and roofs for shade and wildlife habitat. Create water and energy and waste audits to help residents and businesses learn how they can conserve water and go to zero waste. Gray water use in homes for toilets and ??? Protect our rapairian habitats from polluted runoffs and cutting of vegetation. Have monthly Oak creek clean ups and dry creek clean ups. Yes plan for 100's years of water. Reduce and incentive home use 50% less water to keep our Colorado River Flowing.	8/19/2020 4:35 PM
25	close the canyon to all parking. why doesn't the city have a office policy to the governor to make slide rock limited daily totals and by reservation only....just like the other large state parks. oh yea....\$40k a day in parking fees. meanwhile we risk the lives of ones parking and walking on the road.	8/19/2020 12:18 PM
26	I work for Friends of the Verde River but I live in Sedona. We are getting close to launching a new program called River-Friendly Living. It will be instrumental in the planning of the strategies and actions above. Please include Max Wilson (maxwellw@verderiver.org in your discussions.	8/19/2020 8:57 AM
27	Would not support	8/18/2020 1:02 PM
28	I am concerned that incentives might be used in a counter-productive way. In other words, raising fees and taxes to those who resist the strategy. I have seen this happen in states like California.	8/18/2020 11:12 AM
29	Imposition of personal views on others through law is something I can never do. The maintenance of washes and creeks is the first truly "public" function mentioned in this survey, which is something that a city council should actually do.	8/17/2020 6:50 PM
30	NOTHING	8/17/2020 2:06 PM
31	Stay out of my house	8/17/2020 12:24 PM
32	What is meant with restoration and maintenance of creek and washes? When would you be restoring these and what kind maintenance (removing non native species? Perhaps this needs to be more clearly defined. It could be that the "problem" lies somewhere else which causes a large amount of run off and the water to not be absorbed etc.	8/17/2020 12:24 AM
33	I would never support this.	8/16/2020 6:56 AM
34	Much, much more detail on these programs.The 'programs to retrofit inefficient water fixtures' sounds like it would be a huge burden on low income-fixed income families.	8/16/2020 1:20 AM
35	Stop development of wild lands. Keep wild spaces wild.	8/15/2020 7:48 PM
36	Focus on the millions of gallons of wastewater sprayed to the desert. How can we better utilize that? Community gardens to improve availability of fresh produce and provide oxygen to the air?	8/15/2020 6:02 PM
37	Entire water infrastructure here	8/15/2020 4:25 PM
38	Keep Sedona government out of this.	8/15/2020 4:23 PM
39	Don't touch water - there is no reason for the city to even try to maintain the sewer. I'm aware of the 20,000 gallons of sewage leaking into the creek. Just stop.	8/15/2020 3:49 PM
40	Nothing you do will impact the environment, sorry. Look at what China is doing.	8/15/2020 3:45 PM
41	Do not force seniors and retirees to spend money. Water management is a state issue, less a local one. We are currently wasting water by having sprayers off 89A spraying the dessert.	8/15/2020 2:44 PM
42	This last one sounds more like you want to take over the wells we own on our private property and limit what we use. People who have bought and paid for the drilling of their wells should never be asked or as you would say, strongly encouraged to let a meter be installed. I think that would be asking for a large lawsuit and a very long petition. Don't go there.	8/14/2020 9:05 PM
43	the more you waste our tax dollars on your feel good stuff the harder you make it for young family's and retiree's to live here. You are driving us all out. So you will only have the uber rich. Totalitarian impulses are showing.	8/14/2020 7:04 PM

Sedona Community Survey - Strategies and Actions

44	Folks don't understand how much of an issue water will be as it's so cheaply priced, and AZ does an excellent job managing water, but we are going to be in serious trouble in the next 10-20 years if we don't take bold action now!	8/14/2020 6:54 PM
45	Yes, encourage xeriscape don't incentivize or start banning plants, low water use is smart, this is all mandated at the federal level, you won't be getting my support on most of this no matter what?	8/14/2020 2:09 PM
46	Again here, great ideas but what are their impacts to the residents and guests? what are the costs for these plans?	8/14/2020 10:24 AM
47	These all require the strong leadership which we do not have here.	8/14/2020 9:25 AM
48	I personally need a lot more information on items 1 & 2, and generally support items 3 & 4 with the caveat they are done correctly.	8/14/2020 9:05 AM
49	The cost of such a program	8/14/2020 8:45 AM
50	Water conservation is a great goal and reasonable measures should be taken. Incentives are good in any aspect.	8/14/2020 5:55 AM
51	I can see over reach coming here. Incentivize means penalties, and intrusion.	8/13/2020 10:30 PM
52	Need to know if incentivize will not turn into mandate.	8/13/2020 5:55 PM
53	Minimize government interference in implementation and incentivization	8/13/2020 5:52 PM
54	Existing users of well water do not report consumption at the county, state or federal level. So, we do not know their usage impact on the water table, nor what our available water supply is. This is critical to knowing what water resources we have, and how best to create an integrated water resource plan. This is a state and federal issue — not the city of Sedona. The only subsidies local government should use to fix inefficient water fixtures and landscaping is to eliminate red tape to install fixes. Let the price of water be the means to promote water conservation.	8/13/2020 5:19 PM
55	There are better ways to deal with rainwater than to get rid of it. Please consider rainwater harvesting (passive) strategies to effectively USE rainwater and consider it an asset rather than something to get rid of!	8/13/2020 2:51 PM
56	We need to make it easier for property owners to implement rainwater storage and appropriate maintenance. Maybe less stringent overseeing from city planners?	8/12/2020 11:53 AM
57	Cooperation from the actual water company?	8/12/2020 10:12 AM
58	Incentivize and teach small berm construction in all back yards, to plant all rain that falls into the ground -- not as run off for the Salt River Project in Phoenix. That is create a hydration rather than the current dehydration land use plan. Incentivize, ie reduce summer water costs, to all who maintain backyard food forests and gardens. MY summer water bill, because of the garden, is a killer for anyone on low or fixed income. Teach all to direct compost into the ground. Do in ground worm farms. Permaculture the land with water conserving mulch surface. I would be happy to use my land as a permaculture demo garden for future food security. Welcome manual help and water cost reductions. Glad to accept organic food scraps contributions. Finally, in order to continue to live in Sedona, I need an electromagnetically safe environment in which to live.	8/12/2020 8:43 AM
59	The Sedona WaterWise Alliance has supported these approaches for years. We created a comprehensive water management plan and vetted it with businesses and environmental groups. It stalled at the City. It would work today.	8/10/2020 2:31 PM
60	Finally something he city should explore. Private landscaping should not include plants threquire a lot of water.	8/10/2020 9:18 AM
61	I do fully support water conservation, but all my other priorities are higher, and something has to give. Besides, if we do everything else, our water use will significantly decrease anyway.	8/9/2020 8:13 PM
62	Fully onboard now.	8/8/2020 11:55 AM
63	STOP the expansion of hotels within the Sedona area. Hotel guests use a greater proportional amount of water for residents from numerous showers each day, daily laundry of sheets, towels, etc., hotel landscaping and spa/swimming pool services. The local water supply cannot	8/7/2020 8:25 PM

Sedona Community Survey - Strategies and Actions

support this level of current expansion as it also means more water used by restaurants for food prep, cooking, and dishwashing. Managing these sources of growing water use must be a high priority along with residential reductions.

64	The word incentivize means government interference and the rights and freedoms of people. It's a phony word, and the city government knows it. Common sense and education is fine. When you start using the word incentivize, that means you are now interfering again in people's lives.	8/7/2020 6:26 AM
65	I would like to see a huge budget and effort to buy up land to preserve open spaces and green spaces and better control and manage development that is destroying our community. It would have to be effective and cost-effective, and not just a plan to accommodate more tourists. I am opposed to treated sewage water for drinking and home use. I am opposed to water treated with chlorine and other chemicals. I am probably opposed to any plan that raises taxes. The sewage plant is an example of a good idea turned into a disaster and too expensive for residents. Because of increased tourism, infrastructure must be expanded and residents foot the bill even though their quality of life is hurt by the tourists. Tourism is important, but there needs to be a better balance. Our environment and boundaries dictate a maximum. It is not incumbent upon the city to accommodate ever increasing numbers that is cannibalizing the tourism and hurting tourists experience, resident quality of life and the city.	8/6/2020 8:56 PM
66	Maintenance is questionable for me. Example: burning underbrush pollutes our air - we'd be better off turning it into biofuel. If that's creeks/washes maintenance, I am opposed.	8/6/2020 5:36 PM
67	Engage with local community groups such as Friends the Verde River, Oak Creek Watershed Council and the Sustainability Alliance in a meaningful way to support their missions.	8/6/2020 11:07 AM
68	Strict construction codes that are enforced.	8/6/2020 7:01 AM
69	What plans in past gave succeeded?	8/5/2020 7:49 PM
70	I'm not you have to 'incentivize' drought tolerant landscaping. Why not just require it like Clarkdale (except water for food crops)? Have an exception for plants watered with graywater.	8/5/2020 12:31 PM
71	I'm ready.	8/5/2020 11:27 AM
72	Engage and direct change to state Groundwater water Use in our region. Influence this chapter in the county comprehensive plans to implement water conservation overlay districts or an AMA for the VV / rural Az so groundwater is conserved and reused.	8/5/2020 9:12 AM
73	Already support	8/5/2020 8:40 AM

Q18 Do you have any other comments related to these strategies and actions?

Answered: 58 Skipped: 167

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	Water is critical to our future. Must be a major focus.	8/26/2020 8:07 PM
2	Do-gooders always think their "good" intentions outweigh the consequences of their policies.	8/25/2020 9:12 PM
3	What does any of this have to do with reducing the greenhouse gas emissions that drive climate change?	8/25/2020 4:33 PM
4	sounds doable.	8/25/2020 2:40 PM
5	Regarding the water issue, the city does not own or control the two water purveyors in the City. Both entities already have measures and incentives in place to ensure water quality and its supply.	8/24/2020 5:31 PM
6	no	8/23/2020 11:52 PM
7	Understanding water volume and historical rainfall should give us a good idea of how much water is usable without damaging the eco-system. Once an amount of volume that is available for consumer use is known then we will know what the maximum population for the valley can be. Therefore, annual water volume can determine total maximum population for a comfortable and sustainable valley that we can all enjoy for the future.	8/23/2020 4:59 PM
8	NO.	8/23/2020 3:25 PM
9	We use far too much water in Sedona. Water use regulations should be implemented as they have been in many other Arizona towns.	8/23/2020 2:28 PM
10	No.	8/23/2020 11:20 AM
11	These actions should be fairly inexpensive to implement, yet will make a dramatic influence on the local environment. Educate on zero scape landscaping. Educate on the use of Native plants.	8/22/2020 7:45 PM
12	In the future, can Sedona become the owner of water supply(ies) for the City? This move would enhance the progress for sustainable water management.	8/22/2020 1:54 PM
13	Sedona WaterWise Alliance did much of this work, years ago. Build on it.	8/22/2020 1:42 PM
14	Residences on larger lots usually have natural vegetation in areas at least 10 feet below their house level. Rather than increasing drainage capacity as engineers and builders instinctively do, home owners need to be assisted and incentivized to reduce water flow, allowing infiltration entirely within their lot boundaries. This is easy to do, no water ever drains from my personal 2.5 acre lot unless there is more than 2" of rain in an event.	8/22/2020 10:54 AM
15	Highly incentivize water conservation by steeper rate scales.	8/22/2020 9:44 AM
16	I would like better specifics on proposed projects and questions that don't mix apples and oranges in the same question	8/22/2020 8:35 AM
17	The biggest issue I see with Sedona residence is the very high standard of living. Not uncommon for people to spend >\$500/month on electricity running pools, water features, A/C etc. If people want this lifestyle and can afford it, they can and ought to pay for the effects of it.	8/22/2020 7:28 AM
18	Again an appropriate strategy must be developed to make these things happen.	8/22/2020 6:47 AM
19	We in the Southwest have been in a drought condition for many years. These measures are imperative to implement asap.	8/22/2020 6:16 AM
20	How much money are you wasting on this. DO SOMETHING ABOUT SEDONA TRAFFIC.	8/21/2020 3:05 PM
21	How much will our taxes increase to support these things?	8/21/2020 1:44 PM
22	Stop growing grass for golf courses, and more gardens.	8/20/2020 8:16 PM
23	The city should lead by example. The Splash Pad at Sunset park is an example. Non recycled water.	8/20/2020 12:46 PM
24	Sedona needs to look to other communities that have already implemented and incentivized residential conservation to lower water use, such as Scottsdale, and municipal codes such as in Flagstaff and Tucson, to address a broader range of water and habitat preservation.	8/20/2020 9:43 AM

Sedona Community Survey - Strategies and Actions

25	Protect our creek. stop injection wells giving everyone chemically filled water. You cannot remove drugs and chemicals from water. No such thing as A+ water really. Baloney. No one needs water filled with estrogen and Lexapro! Get more creative.	8/19/2020 10:36 PM
26	Water pumping takes fossil fuels. Encourage the Sedona Water companies to install solar panels and battery back up when cost effective to pump water. Monitor high users. Educate and help find leaks. Educate with a team of Americore workers develop the expertise to help Sedon become water wise.	8/19/2020 4:35 PM
27	Pursue only public functions a city should, such as maintenance of washes and creeks. Lose your tendency toward home invasions through regulations.	8/17/2020 6:50 PM
28	Do not need another bureaucracy management. Use existing government departments	8/17/2020 2:06 PM
29	Yes, how much did the compilation of this survey cost?	8/16/2020 1:20 AM
30	Doesn't the state manage the water utilization? How do we better influence them? Low flow products are already mandated. Don't go there!	8/15/2020 6:02 PM
31	Smart water mobile	8/15/2020 4:25 PM
32	Free markets and individuals will determine the efficacy and timing of these initiatives. Sedona city government lacks the judgment and wisdom for any of this.	8/15/2020 4:23 PM
33	Incentives are fine but does that mean the city is shelling out money for the incentives? Will incentives turn into requirements?	8/15/2020 4:23 PM
34	Just don't go down this road, it is a very bad idea. Put your efforts into your own foundations if you want to do this kind of "charity" but don't muddy the waters for your local gov.	8/15/2020 3:49 PM
35	derp	8/15/2020 3:45 PM
36	We need to manage the sewer system better and prevent sewage from flowing into Oak Creek.	8/15/2020 2:44 PM
37	as long as you allow grass, tree's and bushes that are non native, you are screwing us all on the water sustainability. So until you make the biggest wasters correct their impact, you will not be taken seriously and folks will push back. Come for my grass while you allow the resorts and golf courses, you will get a fight.	8/14/2020 7:04 PM
38	Stop with the over reaching utopian bureaucrat regulation, this stuff is taken care of at the federal and state level, you do know how government works, I hope?	8/14/2020 2:09 PM
39	What time frames are being taken into consideration to implement such plans? Are they to be done at once or are they going to be done in incremental steps? Lets know more please.	8/14/2020 10:24 AM
40	How many city dollars and assets have gone to support the Friends of the Verde River our local leaders protecting our state treasure of the Verde River and its tributaries like Oak Creek. Oh, none? What a surprise.	8/14/2020 9:25 AM
41	The exploitation of our natural resources such as water, in the pursuit of creating an economy based almost exclusively on tourism, is the basic problem here. If we had a diverse economy, we would have less people trafficking in annually, and therefore less demand on our water supply. Food for thought.	8/14/2020 9:05 AM
42	no	8/14/2020 8:45 AM
43	A water resource management plan would entail preventing high density, compact, affordable housing and stopping any further hotels and golf courses from being built here.	8/13/2020 10:30 PM
44	Fire the Sustainability Coordinator	8/13/2020 5:52 PM
45	The code currently promotes xeriscape and native plans and low flow fixtures. Look at flood control and code already in place the cover the Creeks and washes. Also the City should look at neighborhood flooding issues that have been unfunded by the City.	8/13/2020 5:50 PM
46	Restoration of creeks and washes should be business as usual for counties and the forest service. The city should only step in selectively for important projects that are not being addressed by other government entities.	8/13/2020 5:19 PM
47	The city should lead by example: use native/low water adapted plants, passively harvest and use rainwater, and use drip irrigation at most effective times of day (evenings and very early	8/13/2020 2:51 PM

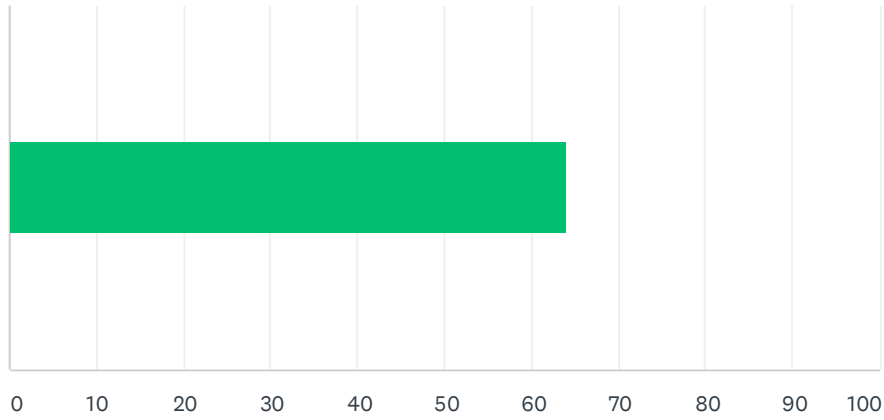

Sedona Community Survey - Strategies and Actions

mornings) and these strategies should be mandated for all new residential and commercial construction and should be phased in for all existing commercial developments. Landscaping of parking lots with appropriate plants and directing runoff to water plants can effectively reduce heat buildup (therefore, less demand on air conditioning) in addition to making the city more beautiful and providing pleasant places to park. Elimination of asphalt in parking areas and replacing with porous surfacing such as gravel or decomposed granite both reduces heat and mitigates runoff problems by allowing rainwater to soak into the ground.

48	Unsure if catching rain water for home use such as plant watering is allowable here.	8/12/2020 10:12 AM
49	These recommendations (all sectors) are ambitious and familiar. They have been in discussion before the City many times - and never been initiated for many reasons. Aside from more hot, dry days, has anything happened to make these actions more realistic?	8/10/2020 2:31 PM
50	I don't see anything about reusing our wastewater or providing requirements and incentives for rainwater harvesting, especially for new building.	8/9/2020 8:13 PM
51	Look to other high desert communities for any beneficial progressive programs	8/9/2020 2:40 PM
52	Water usage in Sedona is of EXTREMELY high concern. Visitors in hotels and Air B'nBs should have placards encouraging them to reduce water consumption.	8/8/2020 12:53 PM
53	We are a city of 10,000, and probably now a lot less than that. Because of our insane promotion of Sedona, 1000 Airbnb, plus a hotel industry that could care less about the items you're talkin about, thinking that putting an additional burden on local residents is going to make a difference it's just plain foolish. If you want to put education programs out for people to voluntarily act on them, that's one thing.	8/7/2020 6:26 AM
54	There should be stiff penalties and fines for contractors that have accidents like the recent sewage spill into Oak Creek. Water AND soil samples must be taken all along upriver and down river even miles away by third-party independent parties. ALL development should require environmental impact studies AND adequate WATER supply since Arizona aquifers are running dry and not being replenished. State water laws grossly favor developers and will destroy Arizona if not remedied. Something must be done to clean up Oak Creek -- Slide Rock and our water ways. The city can't rely on volunteers. If you are going to bring in millions of tourists, you must allocate a budget and staff to clean up after them, even on state or forest land - possibly giving the oversight agencies a budget specifically for that purpose. We don't need a budget for the Chamber -- as the city says, tourists will come regardless of what we do... I would rather see that budget used to buy up land to keep open and green and protect it from overdevelopment and overtourism.	8/6/2020 8:56 PM
55	Water is so important	8/6/2020 6:12 AM
56	We need to take water reuse seriously. Injection doesn't really qualify. With yet another non-soon we are in a serious position re water availability. We need to regularly communicate the state of our water supply to residents--aquifer levels, rainfall vs historical averages--and incentivize retrofits.	8/5/2020 12:31 PM
57	Collaborate with regional groups to influence county and state regulations on water use.	8/5/2020 9:12 AM
58	Retrofitting existing properties seems like a very high impact short term action	8/5/2020 8:40 AM

Q19 What is your level of support for these strategies?

Sedona Community Survey - Strategies and Actions

- LOW - I have major concerns
- MEDIUM - I have some concerns but generally support
- HIGH - I have no concerns and strongly support
- UNKNOWN/ UNSURE

	LOW – I HAVE MAJOR CONCERNS	MEDIUM – I HAVE SOME CONCERNS BUT GENERALLY SUPPORT	HIGH – I HAVE NO CONCERNS AND STRONGLY SUPPORT	UNKNOWN/ UNSURE	TOTAL	WEIGHTED AVERAGE
Encourage the City and community to hire community-based organizations/businesses whenever possible.	18.97% 33	25.29% 44	53.45% 93	2.30% 4	174	2.30
Expand community facilities for cooling during heat waves, including expanded cooling centers and increased park hours and access.	30.46% 53	28.16% 49	36.21% 63	5.17% 9	174	1.95
Design and invest in community Resilience Hubs. These Hubs are community-serving facilities augmented to support residents and coordinate resource distribution and services before, during, or after a natural hazard event.	24.28% 42	30.06% 52	42.20% 73	3.47% 6	173	2.11
Measure and monitor the level of environmental impact and investments being made in each neighborhood to help prioritize investments in areas with the greatest need.	33.33% 58	22.41% 39	40.80% 71	3.45% 6	174	2.01
Develop volunteer program to assist homeowners with FireWise implementation on their properties.	20.93% 36	20.35% 35	55.81% 96	2.91% 5	172	2.29

Q21 What would be needed for you to fully support these strategies and actions?

Answered: 71 Skipped: 154

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	This is lower priority as compared to other Strategies and Actions being considered	8/27/2020 2:00 PM
2	With pandemic may need to consider subsidizing cooling systems for people/homes with low income rather than cooling centers	8/26/2020 8:14 PM
3	Sedona is extremely high risk for a fire disaster like that in Paradise CA. I would love to see more community talks on fire preparedness and what action citizens can take to be prepared for a disaster. We used to have fire drills at school. A city wide fire drill, even just a virtual one, would be really helpful	8/26/2020 8:10 PM
4	I like them all, but could be expensive...	8/26/2020 1:00 PM
5	You've laid out a set of programs with huge costs and no way to fund them.	8/25/2020 9:16 PM
6	Will not support.	8/25/2020 3:31 PM
7	I'm supportive.	8/25/2020 2:43 PM
8	Firewise implementation program is a great idea.	8/24/2020 9:23 PM
9	Education	8/24/2020 5:17 PM
10	I need to know what community-based organizations entail. Sometimes they are not the most efficient, or ethical.	8/24/2020 12:27 PM
11	nothing. please proceed	8/23/2020 11:53 PM
12	Strategies that use current government assets without costing additional funds or requiring new buildings can produce benefits that are commensurate with budgets so in that way these are good ideas. Implementing new bureaucracies and buildings cost the community and may not provide an acceptable cost/benefit ratio, so in this way no.	8/23/2020 5:12 PM
13	Does "community-based" business simply mean "local" business? Do we actually have cooling centers? Does anyone use them? "Community Resilience Hubs" sound like a good idea but I only have a vague notion of what the term means.	8/23/2020 2:33 PM
14	Action.	8/23/2020 11:22 AM
15	Every time we try to do something positive for the community, a loud group including the local media cry government overreach and higher taxes. Need to know how you will deal with that.	8/22/2020 1:47 PM
16	Measure and monitor the level of impacts and investments in each neighborhood? Are you right in the head? We barely have a town, much less, actual neighborhoods. We do have HOAs.	8/22/2020 11:08 AM
17	I think the strategies above that I rated Medium would be minimally effective/needed.	8/22/2020 9:51 AM
18	again, general consensus of Sedona citizens	8/22/2020 8:48 AM
19	See previous comments	8/22/2020 7:59 AM
20	Focus on GHG reductions first (prevention), but change is already happening, so some adaptation strategies are needed. Sedona will always have tourism, but you should stop advertising and bringing so many people there and look for ways to support more local businesses that support the resident population. The AZ rule allowing home rentals has been a disaster for building a strong and stable community.	8/22/2020 7:54 AM
21	The overall cost of these strategies must be addressed to prioritize the tasks.	8/22/2020 6:50 AM
22	Quite wasting the City's money on this nonsense.	8/21/2020 3:06 PM
23	The knowledge that someone with integrity was making the decisions.	8/20/2020 8:49 PM
24	. I would like to see the budget of how this is going to implicated.	8/20/2020 8:26 PM
25	A strategy that is missing is the reduction of "heat island" effects that could be mitigated by the planting of more shade trees and vegetation to cover and cool landscaped areas. This would also sequester carbon and eventually could help produce a net negative carbon emission while providing cooling relief to homes and public spaces.	8/20/2020 9:48 AM

Sedona Community Survey - Strategies and Actions

26	I can't trust a city government that continues to give millions to the Chamber when we can't even drive within our own communities because there are already too many tourists here already. I can't support the above measures that "sound good" when I've seen how things have been decided and implemented so far.	8/19/2020 10:46 PM
27	We really need to educate and promote the cobenefits and synergies of these cross cutting strategies with dollars, long term benefits to health clean air, water and mental well being. Heat sheltering facilities for the underserved may be paramount but are challenging with covid 19 precautions. How can we help and secure the safety, and health and mental well being of the underserved and at the same time reduce GHG? Create a vision for what Sedona. What would Sedona need to look like to be fire wise and not another Paradise fire. We need to show the vision of smiling faces, equity and wildlife and ecosystems coexisting in this beautiful Place that is carbon neutral. People need to see what it would look like, feel, hear, and experience Sedona in new ways that are fulfilling and rewarding. Remember how clean the sky and quiet Sedona was during the beginning of cover 19. Clean electric renewable energy can help us in so many ways. The vision shows People helping people, people that are kind, people that are healthy and content. Happy Sedona. People before fossil fuels and the cobenefits are visualized to bring everyone on board.	8/19/2020 4:52 PM
28	These strategies are the lowest in priority in my opinion. There are rarely natural disasters here.	8/19/2020 9:03 AM
29	Would not support	8/18/2020 1:03 PM
30	I equate "investments" with taxation and will not approve this. More information is needed. Where is the money for the "investments" going to come from?	8/18/2020 11:17 AM
31	I would need to completely forget about the Milankovitch cycles (NASA has great lit on this, it relates to earth's orbital and axial tilt cycles, which raise temperature by 12% at the peak) and I would also have to forget about the Vostok ice core data, which not only showed 1) we are currently at the temperature peak of the 100,000 year Milankovitch cycle, and 2) that over the last 4 cycles CO2 levels have lagged the Milankovitch related temperature change by 800 years. That means CO2 levels are caused by the temperature rise (i.e. are an effect of, and not a cause of, global warming).	8/17/2020 7:08 PM
32	NOTHING	8/17/2020 2:10 PM
33	What is meant with cooling systems/ facilitates? This needs to be more clearly defined.	8/17/2020 12:27 AM
34	These are simply ways to increase the cost of living in Sedona. I do NOT support these.	8/16/2020 6:58 AM
35	Any program that contains the word 'educate' is one that I cannot support. The local government is developing 'programs' that appear to only develop more governmental power.	8/16/2020 1:27 AM
36	Fire is our greatest risk with extended dry spells. Controlled burns in the National Forests and brush removal around homes is critical	8/15/2020 6:10 PM
37	Sedona will waste whatever it invests	8/15/2020 4:25 PM
38	Don't tread on me	8/15/2020 3:45 PM
39	Never.	8/15/2020 2:49 PM
40	we cant get people to wear masks because its about freedom....Do you think any of this wont get massive push back?	8/15/2020 8:16 AM
41	Why don't we do something really smart like Cottonwood did and charge 1 cent on some purchases like gas and build a beautiful indoor pool and sport center for residents only. We would get a yearly pass for our family. We would pay extra for classes etc. Cottonwood did this beautifully. What are we thinking about? Asking street people from all over to come here and get cool?	8/14/2020 9:15 PM
42	I don't have an opinion on these projects because there isn't enough information here for me to understand what is entailed.	8/14/2020 9:01 PM
43	We all buy local when we can. But with your high taxes, super high permit costs and overbearing government no local wants to open a business that will fail in our town. They go to Cottonwood, and Camp Verde. Just like Flag is losing businesses. Yes, increase park hours if you have police enough to keep them safe and not drug hangouts. Other then that want to make cooling centers??? for who? the homeless? The use the library and the coffee shops and	8/14/2020 7:17 PM

Sedona Community Survey - Strategies and Actions

grocery stores. This just shows that you are not aware of the real life in Sedona. If we have a Natural Disaster, the Churches and the State, who's job it is, will get our "resilience" hubs moving. Already part of DEMA! No measuring the level of environmental impact and investment. So they don't spend money to keep up their homes so you will do it for them? Just keep up the streets, drainage and our LE to keep us safe. Stay in your lane!

44	I would love to take a Fire Smart class, how can we incentivize all residents to do this? When to stay, when to go, what should be I. Your to go kit, where do we if we need help with a place to stay?	8/14/2020 6:57 PM
45	Firewise and being prepared is smart	8/14/2020 2:13 PM
46	Waste of time and money to the city. Why do we even need or pay a City Sustainability Coordinator?	8/14/2020 12:05 PM
47	Real leadership.	8/14/2020 9:30 AM
48	Much more information.	8/14/2020 9:11 AM
49	these seem very impractical measures to try and implement. Not necessary.	8/14/2020 5:56 AM
50	Cooling centers for people with air conditioning and natural hazards that do not exist. I do not support creating an attractive environment for homeless people to enjoy our city.	8/13/2020 10:40 PM
51	Once again, I see the likelihood that the city will become too invasive in our lives and costs to taxpayers will skyrocket.	8/13/2020 5:57 PM
52	Minimize government role in all of this.	8/13/2020 5:53 PM
53	Very few Sedona residents do not have air conditioning or options when summer heat prevails. No Sedona tax dollars should go toward "cooling centers." Frivolous expenditure.	8/13/2020 5:28 PM
54	Expenditures of public funds should be based helping those RESIDENTS who cannot help themselves, and should not be used for businesses.	8/13/2020 3:01 PM
55	Volunteers and community support. Funding	8/12/2020 10:13 AM
56	Incentivize rents for community based organizations and businesses. Make housing locally available for those who serve the community's needs.	8/12/2020 8:46 AM
57	Great objectives, but how will the little City of Sedona do these things? Before I could support a couple of the strategies, I would need to be made aware of the resources and commitment to accomplish them.	8/10/2020 2:40 PM
58	again the city does not need to educate locals on this. if the city council would think about locals and actually walk the neighborhoods to discuss clean up of our enviroment that may work. we all talk out here you just do not hear us or you do not care.	8/10/2020 1:06 PM
59	There is a plethora of information already available to the public. The city doesn't need to spend tax dollars on that. Cooling center would be good for those that need it.	8/10/2020 9:20 AM
60	1. Just another form of provincialism. 2. Seems to me this can be implemented fairly quickly if/when the need arises. 3. Our most likely natural hazard event is a wildfire, for which evacuation plans, not hubs, is necessary. 4. Seems like a lot of work for something that'll probably be pretty obvious. Just err on the side of helping the underserved. 5. Volunteer? Just fund the fire department to do this, which will also ensure it's done properly.	8/9/2020 8:24 PM
61	Leadership	8/9/2020 2:44 PM
62	The problem with volunteers is that some are well trained and some just think they are. Those who think they already are well trained can often do more damage than if no one assisted.	8/8/2020 11:59 AM
63	Education of several of these initiatives must be extended to hotels, STRs and their guests in terms of their impact on the environment and what they must do as our guests to support our community and natural resources.	8/7/2020 8:28 PM
64	Not the cities business	8/7/2020 7:58 AM
65	Please stay out of our neighborhoods. Putting up passwords and education is fine. Monitoring what goes on in a neighborhood is not what we do here in America.	8/7/2020 6:28 AM
66	The city should have disaster preparedness plans as part of normal planning. Our city has too	8/6/2020 9:00 PM

Sedona Community Survey - Strategies and Actions

many conflicts of interest. In hiring, supporting or funding projects, ensure there are no conflicts of interest or pet projects with city officials.

67	It seems as if the resilience hubs could also be the cooling centers. Why do we need both? Preference for local purchasing is fine; it just doesn't seem that related to climate change except transportation impacts. We do need to identify critical products like food that we can source from multiple directions (in case one of the major roads is blocked). If you're going to have a local purchasing policy, give preference to certified sustainable enterprises.	8/5/2020 12:36 PM
68	I'm ready.	8/5/2020 11:29 AM
69	look into ICF construction methods that greatly reduce the danger of wild fires on buildings.	8/5/2020 11:28 AM
70	Engaging neighborhood leaders and community groups is essential. Hiring climate ambassador is an excellent way to help those in need of employment to gain new skills while earning salaries	8/5/2020 9:16 AM
71	Already support	8/5/2020 8:40 AM

Q22 Do you have any other comments related to these strategies and actions?

Answered: 50 Skipped: 175

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	Question whether Fire Wise is enough and tl encourage that this effort should not just be a volunteer program. Fire is a severe threat and should have higher level of city engagement. It's old thinking to believe its the job of the fire department and the Forest Service . Are they going to be able to reduce fuels and engage residents in their fire future through occasional volunteer efforts. Suggest encourage the city to hire a position to coordinate the Fire Wise volunteer effort as a start. But there needs to be a wider civic and organizational engagement to reduce risk and plan for the future. The weather projection maps and existing fuel types tell us a story. This needs to be more widely shared with residents. There are some communities nationally that are pushing forward with creative ideas for getting help with fuels reduction and Sedona could consider some of those strategies. Fire is a big threat to Sedona's residents. Im glad you have it as an element but hire somebody to work on organizing volunteers or getting grants etc.	8/26/2020 10:26 AM
2	Until you people proposing these inane policies understand that neither you nor the scientific community can even begin to analyze and quantify GHG impacts, nothing should be done in the fool's errand of "saving the Planet.	8/25/2020 9:16 PM
3	A cooling center would attract vagrants -- terrible idea. Measuring & monitoring environmental impacts in neighborhoods would be an expensive boondoggle.	8/25/2020 3:31 PM
4	This is long time needed to be implemented.	8/25/2020 2:43 PM
5	You can't do everything and these are a lower priority.	8/24/2020 6:12 PM
6	We don't need to pay for services already available through our fire department and non profit organizations.	8/24/2020 5:34 PM
7	no	8/23/2020 11:53 PM
8	Larger cities that implement plans for cooling areas, requiring businesses provide cooling stations and making "at risk" programs their goal are now experiencing high levels of homeless people moving to their areas for those benefits. Ensuring the citizens who live here are the people benefiting from our resources is top priority. Spend the money and time on neighborhood parks and in school programs where the citizens are benefiting.	8/23/2020 5:12 PM
9	I think these strategies need much community education.	8/23/2020 2:33 PM
10	No.	8/23/2020 11:22 AM
11	Provide free brush and tree removal (one time per household) would help residents dispose of fire materials. If not free, then at least free wood and limb disposal. More than once a year.	8/22/2020 7:50 PM
12	This entire section was cut-and-pasted from a real city somewhere. It is inappropriate for a tiny city of up-scale residents surrounded by millions of acres of open "parks".	8/22/2020 11:08 AM
13	yes, e.g., is it ergonomic to lay down more concrete, 10 to 12 ft wide, when 4 ft would accommodate a sidewalk?	8/22/2020 8:48 AM
14	My observation is that the longer the time delay between cause and effect, the harder it is to convince the public to do the right thing. Just forget about educating them about climate change. Tax those activities that cause it - make the time delay shorter. Tax combustion. Tax fossil fuels. harvard Medical school did a study on the deleterious effects of burning coal costing the US over \$300 Billion a year. Add that cost to the APS rate payers and we'd see some real change.	8/22/2020 7:34 AM
15	Check out Building Resilient Neighborhoods, an approach to teaching communities on how to respond in case of a heat wave with power outages.	8/22/2020 6:17 AM
16	Address the real problems in Sedona, traffic. Stop this nonsense.	8/21/2020 3:06 PM
17	The "at-risk" population in Sedona is very different than the "at-risk" population in less affluent areas, so... you do you boo.	8/21/2020 1:46 PM
18	I feel that parks are nice and we need more of them. I would be nice to see that subdivision use waterways for parks and this would allow us to grow grasses or have turf in waterways to slow and remove suspended solids from down stream. This is the one I have agreed with so far and I would still be worried of how you would use the inch that would be given.	8/20/2020 8:26 PM

Sedona Community Survey - Strategies and Actions

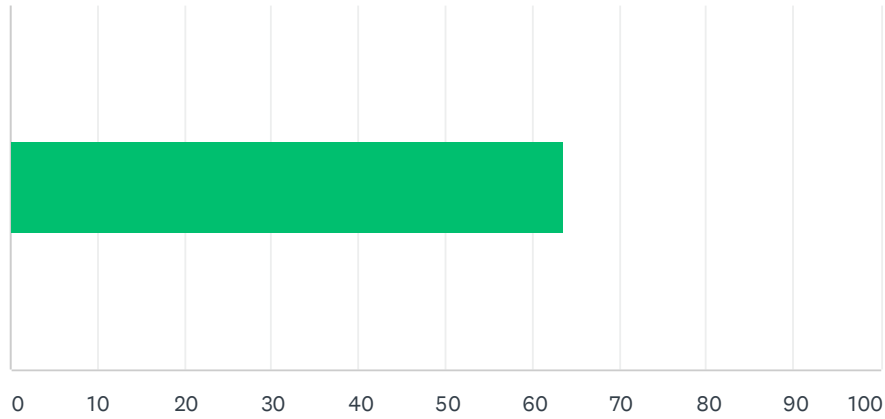

19	This is not a city function. It is state and federal.	8/20/2020 12:49 PM
20	See above comment.	8/20/2020 9:48 AM
21	More housing means more people pulling on our resources. Golf courses use 50,000 gallons of drinking water a day but they are not limited...The above sounds good but I can't trust implementation from what I have seen so far	8/19/2020 10:46 PM
22	Lets do it. And Have fun doing it. Create a new electric and people powered sedona with smiling healthy residents and visitors. We still conserve electricity but we have become carbon neutral.	8/19/2020 4:52 PM
23	I think a true engaging and active community center would be amazing, not just a Community Resilience Hub. The Cottonwood has a great place!	8/19/2020 9:03 AM
24	No...	8/18/2020 11:17 AM
25	Is there anybody on the city council that understands the difference between "cause" and "effect" and has a basic knowledge of science? I would love the send them these 2 studies so they can make rational decisions based on the underlying science. Also, please don't bother reading any of the \$ 350 million in studies funded by the old EPA. There is no worst science than propaganda science .	8/17/2020 7:08 PM
26	We don't need more government. All that you mentioned above is already in place here.	8/17/2020 2:10 PM
27	What does it mean 'expand cooling facilities'? This doesn't sound like a proper governmental function, unless it means another swimming pool. Then I would be for it.	8/16/2020 1:27 AM
28	Was the first one a very complicated way of saying buy local??? Don't build facilities that will have to be maintained. If it is too hot, maybe the tourists will stay away- that would reduce our carbon footprint!	8/15/2020 6:10 PM
29	Sedona city government should stay out of it	8/15/2020 4:25 PM
30	bye	8/15/2020 3:45 PM
31	Waste of money. Repair the roads instead. Reduce traffic congestion by taking away tax money from the Chamber of Commerce used to promote daytrippers. Promote vacationers staying in Sedona instead.	8/15/2020 2:49 PM
32	If people live here, they don't need a cooling center. It is only the vagrants that live in our forest and on our streets that would benefit. So once again we would be encouraging pan handlers and endangering our residents since many of them need mental help. How do you come up with these ideas?	8/14/2020 9:15 PM
33	Folks don't volunteer in our town. The uber rich don't do it and your running all the regular folks out with your spend and tax stupidity.	8/14/2020 7:17 PM
34	in general sounds good, I don't know what a cooling center is, I have A/C in my house, that's a good plan, why do we need the Gov't to provide "cooling centers"? Stupid really...	8/14/2020 2:13 PM
35	How about understanding the impact of over tourism on our environment and complete a tourism carrying capacity study? I have written to every council member on these issues and have never had so much as the courtesy of a reply that my emails were even received.	8/14/2020 9:30 AM
36	Item 1 sounds like nepotism to me, and instead of providing the members of our city with the lowest cost solutions or services, would be a program that would subsidize otherwise non-competitive businesses, possibly owned or connected to our political leadership. I STRONGLY oppose such a plan. Items 2 & 3 are a very high cost solution to a low cost problem in my estimation. Would it not be more cost effective to help people afford air conditioning in their homes?? It also sounds as though we would be assuming roles typically handled by FEMA, in which case we should have an action plan in place to accept FEMA assistance, but why would we want to take on this amount of cost ourselves? I'm clearly not understanding the intention here?	8/14/2020 9:11 AM
37	Hiring local groups = Nepotism and lining friends pockets who are not qualified. We do NOT need cooling centers, is this the ghetto? Who are you trying to get into these cooling centers? What natural hazards? This is a waste of money, as are the cooling centers. Yes, climate change and water are an issue. Less pavement, less houses, less cars, less people. decrease the visitors who come here and use our water.	8/13/2020 10:40 PM

Sedona Community Survey - Strategies and Actions

38	Fire the Sustainability Coordinator	8/13/2020 5:53 PM
39	No problem with education or volunteer groups. That's why this country has succeeded. Now many call on the government to provide solutions when charity and volunteering are the most effective tactics.	8/13/2020 5:28 PM
40	Use existing city properties and charitable organizations instead of designing and building HUBS. New buildings are costly and involve use of energy and resources. Let's use what we already have!	8/13/2020 3:01 PM
41	BIG QUESTION: The City had budgeted \$264,000 to support local nonprofits through this next year. Most of the NPOs depend upon this support, but this year, the City withheld more than 80% of that support. So, if the City cannot support the organizations that make Sedona a wonderful place to live, how will it begin to do any of the things presented here?	8/10/2020 2:40 PM
42	My major problem with all adaptation actions is that they seem to imply that the need is inevitable, which de-motivates and diverts funds from mitigation efforts.	8/9/2020 8:24 PM
43	The Phoenix mayor has a working group that targets hottest neighborhoods and develops and implements heat mitigation strategies with community input. That's a good starting place.	8/9/2020 2:44 PM
44	That are developed by the Sedona fire district, for the implementation of brush control and other environmental issues that protect all of us. It's their job, not yours.	8/7/2020 6:28 AM
45	Sedona's constant efforts to create and pave so many roads, which destorys the environment and ecosystems, only increases the impact of climate change and will raise our temperatures unnecessarily. It can also destroy waterways and natural resources and change our climate. Sedona's budget, policies and practices are such that the city needs to stop relying on volunteers to mitigate the impact of adverse consequences from its decisions. I am opposed to any new climate plan however until the city solves the overtourism and overdevelopment problems.	8/6/2020 9:00 PM
46	Might you be able to train the unemployed in our city, giving them some official certificate after they've learned to assist homeowners with FireWise implementation on their properties? Then they could work for tips from the homeowners when they go out - helping them earn some much-needed revenue and completely voluntary by the homeowners - although they would be informed about this project, of course.	8/6/2020 5:41 PM
47	I have concerns relative to expanding park hours and cooling facilities there. This will attract increased transient use.	8/6/2020 7:04 AM
48	Assisting homeowners to firewise	8/6/2020 6:14 AM
49	It's a lot about nothing	8/5/2020 6:21 PM
50	I think weak disaster preparedness is a huge and dangerous issue for our community	8/5/2020 8:40 AM

Q23 Please rate your overall level of support for the development of a Climate Action Plan.

Q30 Is there anything else you would like us to consider in the development of the Sedona Climate Action Plan?

Answered: 111 Skipped: 114

Sedona Community Survey - Strategies and Actions

#	RESPONSES	DATE
1	It should be the wish of the people and not of the City Council. It is imperative to get citizens' support first and find the right people to "drive" each Action.	8/27/2020 2:02 PM
2	McKenzie Jones is fantastic. Thank you for all your hard work.	8/26/2020 8:12 PM
3	New-ish full-time resident of Sedona, having lived in other beautiful places. The embrace of noisy and smelly OHV/ATV's on public streets is in conflict with the stated goals in this survey and has been a major disappointment in coming to an otherwise enlightened and naturally extraordinary place.	8/26/2020 1:05 PM
4	Thank you for all you are doing. It's not an easy task. I appreciate all your hard work on the plan.	8/26/2020 10:28 AM
5	You shouldn't have listened to Greta Thunberg. She is an entitled, petulant child who has no idea of what she speaks. If you want to look at global CO2- take a view of the Grand Canyon. Those 3,000 feet of limestone sediments were once atmospheric CO2. And man was more than a quarter billion years from appearing on the planet.	8/25/2020 9:21 PM
6	It is beyond ridiculous for a small city with as few residents as Sedona to employ someone to manage a Climate Action Plan. We have no industrial development here. The most effective way to decrease our impact on climate would be to end tourist traffic, which, of course, Sedona will not do.	8/25/2020 3:36 PM
7	Figure out how to cut back on tourism and AirB&B's. They are KILLING SEDONA!!!! This the worse thing that could have happened to beautiful Sedona. Shame on the Chamber of Commerce. It seemed to me that within the last couple of months, the traffic lights were sychronized and one was able to drive all the way through town from uptown to the Library with out stopping doing 35 mph.. That was so great! No emissions from the cars!!! But this is a variable/or stopped...why? Is this ADOT or the City? I'm not certain living in Sedona much longer is where I want to be. And are the NEW residneces complying to Dark Skies? And all all businesses?	8/25/2020 2:54 PM
8	Do whatever is possible to prevent naive tourists from causing fires in the wilderness areas and on the trails. Let's keep Sedona peaceful and safe.	8/24/2020 9:25 PM
9	Cardboard recycling ordinance	8/24/2020 6:14 PM
10	Do not burden residents with matters predominantly due to tourists and more precisely, day trippers.	8/24/2020 5:40 PM
11	Outcome measurements of effectiveness to health and environment and overall feedback regularly from this action plan. Bring it to schools and church's and synagogues and community on any way. Civic or religious or businesses	8/24/2020 5:20 PM
12	I did not see anything in the transportation section about building more bike and pedestrian paths and encouraging those modes of transportation. I hope they would be a primary area of focus as part of the Climate Action Plan.	8/24/2020 11:02 AM
13	no	8/23/2020 11:55 PM
14	EMF is causing many people to have mild to critical health issues. As technology advances into household items and 5G I think it would be wise to carefully investigate the health impact vs the tourism to Sedona for our natural beauty and the local vortices and how they will be impacted if Sedona becomes like any other city.	8/23/2020 5:16 PM
15	How do you propose to do all this in a manner which does not interfere with individual property rights and raise taxes. This kind of plan takes thought and time not just rush to push change no matter what the cost.	8/23/2020 3:56 PM
16	I believe water is our most limited resource and should be given highest priority in the Climate Action Plan.	8/23/2020 2:36 PM
17	Conservation and the caring for all creation.	8/23/2020 11:24 AM
18	Thank you for doing this.	8/22/2020 7:53 PM
19	Thank you for offering this survey, and for tackling these urgent issues. These efforts of mitigation will enable us to continue to live healthy lives here in Sedona.	8/22/2020 1:57 PM

Sedona Community Survey - Strategies and Actions

20	The government is way too involved on how people should live their lives already...this would only increase that action, for a un-proven, non peer reviewed global warming philosophy. Why doesn't Sedona focus on real problems like reducing congestion from too many tourist and being overrun by Airbnbs.	8/22/2020 12:55 PM
21	Going entirely net-zero in both housing and transportation is remarkably easy. I have a small house (~1800 sq. ft) recently constructed by a local energy efficient builder with some assistance from my personal labor. It has graywater diversion, passive solar, and was rated to use only 22% of the energy of other houses its size. Throw on some solar panels and buy a Tesla and it's all you need. The main thing our community needs is another Tesla supercharger in west Sedona. But that's not our decision to make.	8/22/2020 11:20 AM
22	What can be done to help wildlife cope with climate change?	8/22/2020 11:11 AM
23	Develop a Community wide fire mitigation effort.	8/22/2020 9:57 AM
24	It's extremely important to coordinate as much as possible Sedona strategies with the rest of the Verde Valley and work with other communities to address climate concerns.	8/22/2020 9:54 AM
25	Time for the City of Sedona to start serving Sedona Citizens instead of serving Chamber of Commerce and tourists and a Sedona Citizen vote on projects before they are started.	8/22/2020 8:59 AM
26	See previous comments	8/22/2020 8:00 AM
27	With COVID showing that working from home is more acceptable now Sedona should shift away from a tourism based economy and look to have more people move and live there full time. Well paid corporate employees working/living in Sedona can support local businesses. Full time homeowners have a much more vested interest in their community vs part-timers and renters.	8/22/2020 7:59 AM
28	Have a beautiful solar day! The energy solution comes up every morning.....	8/22/2020 7:39 AM
29	Reduce or eliminate the use of single use plastic bags and bottles.	8/22/2020 7:29 AM
30	Follow through to get the plan in place.	8/22/2020 6:52 AM
31	I hope this can be implemented soon. We are in a crisis situation.	8/22/2020 6:19 AM
32	Stop this nonsense. Address the real issues in Sedona. What a waste of time and money. Can't believe this is even being considered. GET TO WORK.	8/21/2020 3:08 PM
33	Don't force people to do things.	8/21/2020 1:46 PM
34	Planting trees.	8/20/2020 8:51 PM
35	I feel like this was a general push for the next fad.	8/20/2020 8:29 PM
36	This is a monumental waste pf money.	8/20/2020 12:50 PM
37	It is important for the City take the lead in order to help implement the urgent changes needed to reverse the climate crisis. This must be a collaborative and region-wide effort.	8/20/2020 9:51 AM
38	Remember, buses don't work well here if you have to walk far to get to the highway. Buses would be awful in neighborhoods. Support and respect residents above anyone else- even tourism	8/19/2020 10:50 PM
39	We need to be bold. We need to be inclusive and have informal collaboration be our model for problem solving, learning, designing, construction and living towards a net zero energy. It is the new challenge verses having as much energy as your willing to pay for. We can simply live with less and have more time to enjoy each other, family and friends and nature. It is not the more you buy the happy you are. It is the more you collaborate, share, learn, experiment and live earth friendly is what matters to be content and with purpose. What will be are targets to be carbon neutral for Sedona? How can we make living toward net zero energy apart of our educational system? apart of a growing culture that respects earth and all life on earth?	8/19/2020 5:02 PM
40	we have the waste water plant. why isn't that wetlands constructed for all water. great, we put in the smaller pond. go for it people. it could be one of the greatest wetlands examples in the states. what a draw too. and lead by example. the whole facility could also be a solar farm. why don't we have every high school class out there learning, training, interning etc....lets go we don't have time to wait. Adam	8/19/2020 12:21 PM

Sedona Community Survey - Strategies and Actions

41	Thank you to McKenzie for getting this survey out! Great work team.	8/19/2020 9:05 AM
42	No...	8/18/2020 11:19 AM
43	Stay out of regulating people's life choices. Fix the Traffic congestion problem instead. If not for the quality of life improvement for the people, which you seem to care nothing about, then for reduction in carbon emissions, which you seem to care a lot about.	8/17/2020 7:15 PM
44	We don't need a Sedona Action Plan.	8/17/2020 2:13 PM
45	All of the above would be fantastic!	8/17/2020 1:24 PM
46	Need proof that fossil fuels are causing climate change.	8/17/2020 12:28 PM
47	Purchase land for a park w trees along commercial area of 89A in W. Sedona. VErde School Road connector bridge to alleviate traffic from Village to W Sedona. Solar requirements for new construction.	8/17/2020 6:50 AM
48	See previous comments about cycling. About non organic wastes, Sedona could also strive to reduce single use plastics and improve the recycling facilities.	8/17/2020 12:31 AM
49	Bus tourists to trail heads. Do not allow anyone to burn for heat. Do not allow any wood burning under any condition. Have easy way to compose yard waste	8/16/2020 6:51 PM
50	Don't do it. It destroys local businesses and people on fixed incomes. Water is a state issue.	8/16/2020 12:17 PM
51	Trash the whole idea!	8/16/2020 7:00 AM
52	This entire program sounds like a lot of what I call 'double speak'. It obviously means a great intrusion into the personal lives of the Sedona citizens, the waste of tax payer dollars and a great expansion of government. How many more 'committees'? employees? administrators?	8/16/2020 1:32 AM
53	Back off take care of the problems that are here now in this community the roads the traffic problems the day trippers	8/15/2020 8:33 PM
54	Need alternative roads to 89a and 179...or additional lanes on 179.	8/15/2020 7:20 PM
55	I am interested in participating in this activity if you focus on a few pragmatic, cost effective strategies.	8/15/2020 6:14 PM
56	forget a climate action plan and do something about paving roads in West Sedona Many residential roads are not much better than gravel roads	8/15/2020 4:30 PM
57	Better put priorities	8/15/2020 4:29 PM
58	This does not seem the time to be spending money on a project like this. The city budget was just cut by \$200,000. Let's stick to current projects right now. Finish the transportaion project.	8/15/2020 4:27 PM
59	Please stop doing these things. The new zoning plan was bad enough. We don't need these types of things. We're doing fine.	8/15/2020 4:26 PM
60	Cease and desist	8/15/2020 4:26 PM
61	Just don't do it. Go join a charitable group and work your magic there. Thank you.	8/15/2020 3:50 PM
62	Lower taxes and stop being socialists. This country was built on freedom - try not to destroy everything.	8/15/2020 3:47 PM
63	Do not do it! It destroys local businesses and people on fixed income.	8/15/2020 2:57 PM
64	Best of luck and will support you on everything....if we do nothing, nothing will change	8/15/2020 8:17 AM
65	Please look at the underlying motivation of anyone or any company pushing this agenda. Projected climate change figures are just that, projected and an educated guess. History has shown that weather has changed dramatically all by itself for hundreds of years. We can do some things to help and we should, but most of the ideas are not worth the expense because we can only guess at the outcome. Watch those electric companies, they will twist information for their benefit and you won't know what happened until you get the bill.	8/14/2020 9:24 PM
66	That you are just a bunch of posers is clear. If you really cared about our "climate" you would not allow ATV's and go carts. If you really cared you would not allow Jeep tours or rentals. They waste gas, leave oil and trash in the woods and destroy our forests and cause a haze	8/14/2020 7:30 PM

Sedona Community Survey - Strategies and Actions

with all the dust they cause. But you wont do the easy, free things, because your on the take. You will try to spend 500k doing studies while our schools have terrible scores and you can not even keep the pool open year round and are not smart enough to sign it over to the swim club folks. They could not do any worse of a job then you do. This environmental BS is not your in your lane. If you can't keep up what you already have responsibility for, you need to quit or be fired so we can get someone in who can actually do the job.

67	If you start a citizens action cttee, would love to be involved	8/14/2020 6:58 PM
68	Consider being open on Friday, just provide traditional city services: police, fire, hmmm, what on earth do I need beside that? Take 50% of the money from the Chamber and spend it building trails and parking lots for all of the tourists... Try being business friendly like Cottonwood, get off your high horse with respect to short term rentals, people who don't like it can live somewhere with an HOA, there are plenty of HOA's in Sedona and almost all of the VOC, we don't need the city buying a fleet of electric vehicles or buses or anything...	8/14/2020 2:19 PM
69	First, we should question all the suppositions you make in your report and survey. Then take a look at your responses and choices for implementing "needed?" actions. Many of your proposed actions include verbs such as: "Incentivize, encourage, measure and monitor". This means spending more money, i.e. more staffing and programs. More sources of revenue (taxes) would be needed. Assuming we do need to address these issues, please read article in NY Times, "How to Reduce Your Carbon Footprint". In part, it states "In Nov. 2017 carbon dioxide emissions from transportation surpassed emissions as the top source of greenhouse gases. Going carless (one car) for a year could save 2.6 tons of carbon dioxide." Why are we promoting the tourist industry that encourages driving to, in and around Sedona? (Let alone the flying into cities, i.e. Phx.) Also, the demographic questions are irrelevant. Ask the citizens of Sedona! All opinions of persons in Sedona should be considered notwithstanding their gender, ethnic make-up, age, income, etc. Thank You	8/14/2020 12:45 PM
70	I still feel over crowding is our areas biggest threat, not the locals of this small town.	8/14/2020 12:33 PM
71	I would like to see the city INCLUDE residents that are pro=active in environmental impacts. We have people here that are quite knowledgeable in these areas and have a trust with other local residents. I also find that you have not addressed BIGGER issues and that is of small cell wireless and 5G radiation. With these two issues being implemented in our city, the health and wellness of the population is in jeopardy, so much so that the need for environmental changes will be futile, the residents will be developing far greater health issues. This has not been addressed and MUST be.	8/14/2020 10:29 AM
72	If you look at communities, such as Flagstaff, that have a real commitment to addressing climate change, you see leadership in action. Sedona will offer "window dressing" in order to say "we are doing something" when no one at the city level really cares about this critically important issue at all. Just look at the name which means absolutely nothing and that is intentional. Sedona Climate Action Plan? Really? Residents are not the fools you think we are. You can't even call it what it is. The issue is climate change - not "climate action", what we need is urgency and a plan to do everything we can to tackle the very real impacts, including the threat to "life as we know it" in this state.	8/14/2020 9:40 AM
73	This needs to be slowed way, way down. Facts need to be presented, cost analysis need to be done and presented, and to be quite honest, while I agree with a few of the bullet points, overall this plan seems to be a wide-reaching and esoteric plan based on a vision of social engineering that is quite frankly, intrusive and a bit frightening. I would MUCH prefer to see our leadership focused on decoupling our economy from the tourism trade where possible, protecting our environment, bringing in a more diverse population with children and families, creating jobs that pay well and can support a much wider cross section of our community.	8/14/2020 9:19 AM
74	As much community input as possible	8/14/2020 8:47 AM
75	Sedona city should do more for residents . The city is becoming more tourist oriented	8/14/2020 8:41 AM
76	I believe a few items in this initiative are worthy of consideration but most are not practical nor necessary. Our community is fine.	8/14/2020 5:58 AM
77	reduce tourism	8/14/2020 5:26 AM
78	This plan has an awful lot to do with non climate related issues. Affordable housing and cooling centers are not climate related. I find your plan intrusive. For the record, I am a Democrat.	8/13/2020 10:43 PM

Sedona Community Survey - Strategies and Actions

79	Immediately fire the Sustainability Coordinator	8/13/2020 5:54 PM
80	When the city is cutting 75% from non-profit support (who have proven benefits to the community), it is wrong to divert these funds to a local climate change program that should be handled by market forces or at the state or local level. Most of the proposals assume the wrong role for a small city government.	8/13/2020 5:33 PM
81	Consider NOT considering it.	8/13/2020 3:09 PM
82	Please do not hire a commercial "planning company" to develop this plan. There are plenty of knowledgeable and interested city staff and residents to do the job, and we know the city better than outside professionals. We'll do a better job at far less cost!	8/13/2020 3:05 PM
83	Understanding of scope in relation to Village of Oak Creek as we are county and not city.	8/12/2020 10:14 AM
84	I would like you to Listen to 5G Sedona. There are loop holes in the legalities of all the installations happening. Let Sedona become a leader in a 5G-free community. To boot, support us reverting to pre-Smart Meter technologies. The old Analog meters are cheaper, do not microwave the population, have meter readers who walk the community and have a first hand feel for what is happening in neighborhoods (as do our postal workers) -- this is a huge integral safety factor for our communities. We need more interconnection, not the continued disconnect that has been rolling out. Thank you. Marianna Hartsong	8/12/2020 8:52 AM
85	There are still people in Sedona who do not think climate chaos is real. Many of these people also do not understand how communities work together and view as negative anything they perceive as infringing on their personal rights. Therefore, I recommend the City work with some of the local groups who have been dealing with these Sedonans to present the strategies and actions as directly benefiting residents. You will need to demonstrate how these activities will not increase their taxes (because there are people who will threaten tax increases for any of these recommendations). Perhaps you should present your approach as ways to deal with the drought and help prevent catastrophic fires. The City should be seen as wanting to prevent water restrictions and traffic restrictions. If people see the negatives of doing nothing as costly and inevitable, perhaps they will be more willing to support and participate with your plan. This is experience talking.	8/10/2020 2:51 PM
86	talk to locals. too big of plan since we have so many tourist. tackle something you can actually fix. we need road repair, bike and walk paths, a community center. start spending money on these issues first. these issue may actually cause climate change.	8/10/2020 1:09 PM
87	The city should prioritize the spending of tax dollars on more pressing issues.	8/10/2020 9:21 AM
88	Leadership, community involvement and a marketing plan directed at Tourists to get and keep them on board while visiting our community are key.	8/9/2020 2:46 PM
89	1. I don't know if this would be part of the plan, but we could use some door-to-door public transportation to local businesses (due to steep hills and hot climate, I'm not likely to walk down to 89A), and offer incentives to encourage hotels to take guests to the hiking paths/sites. 2. It would also be great to offer incentives/perks to residents to install things like green-water systems, sustainable landscaping, etc. 3. Pesticides and herbicides were not addressed in this, but I know quite a number of people in Sedona who wish taht residents would be better educated on the increasing damage done to pollinators, butterflies, and songbirds by backyard pesticide/herbicide use. Even better, I would love to see Sedona become a pollinator-friendly city, such as those now labeled Bee Friendly Cities (check out Xerxes website). This is hugely important for our overall ecology, far more than most people realize. Thanks for asking for our input. I appreciate this effort!	8/8/2020 1:04 PM
90	I see very little about sidewalks mentioned in the plans. There are many neighborhoods without sidewalks (including mine) and I walk my dog twice a day on a combination of streets and trails. If people do not feel safe, they are unlikely to walk or bike more. If there were sidewalks (even narrow ones) on at least one side of all streets, it would get a lot more people out walking.	8/8/2020 12:05 PM
91	I am very impressed that Sedona can be a leader on this initiative and a model for each citizen and city doing their part to lower our destructive impact on Earth and add to a healthier planet.	8/8/2020 9:07 AM
92	For every regulation you create you take away someone else's rights.	8/8/2020 1:24 AM
93	So many strains on local resources, both natural and financial, are placed on the town and residents by the high volume of tourists. This takes on the form of high level of traffic, overuse	8/7/2020 8:35 PM

Sedona Community Survey - Strategies and Actions

of trails and waterways, litter and other pollution, direct and indirect use of limited water supplies, etc. Because of that, not only must this group and the companies that house them during their stays here be included in education programs, they must also bear a proportional share of the costs. The small number of city and area residents cannot bear either the financial or participation burden alone for the millions of tourists who, in greater numbers and proportion, use these resources and pollute our land, air and water through car use, ATV rentals, guided Jeep tours, multiple trips to markets, stores, restaurants and trails. Some added revenue to support the development and execution of this plan and its programs must come from hotels, STRs and their guests.

94	We NEED to deal with the tourist waste and parking issues. That is a top priority around the major parks (slide rock, red rock crossing, grass hopper point, west fork). Before we spend money on new issues we need deal the current issues facing our city!	8/7/2020 5:47 PM
95	Stop the proliferation of wireless technology. Openly microwaving the atmosphere harms all life. Wireless communications operate on the same and similar frequencies as a microwave oven, but the pulse modulation makes it even more biologically harmful.	8/7/2020 3:55 PM
96	This survey is designed to be highly misleading. If this is how you plan to carry out a plan, it will not have credibility.	8/7/2020 1:01 PM
97	Eliminating it	8/7/2020 7:59 AM
98	It is frustrating that the city keeps adding on big initiatives before it has control of the ones in progress. Stop steamrolling the residents please. I can only support a Climate Action Plan when the city resolves the issues of overtourism and overdevelopment that heavily contribute to the problems the Climate Action Plan would be designed to solve. And I am not willing to have my taxes increased to pay for such things. We see with COVID that we need to decrease the budget -- Sedona has taken on too much. A city of our size doesn't need such a large budget. The city is creating problems unnecessarily that we then need extra infrastructure and employees to address, which requires a bigger budget. It's mostly unnecessary. The city is already too big for our environment, boundaries and existing geological limitations. Just stop already.	8/6/2020 9:03 PM
99	I would like to see a short, one-topic column in the Red Rock News for each specific action the community might take - as a way of educating us what WE can do and the effects of just that one action (or refraining from doing something) would have on the city/area. Maybe a text box in the blank area of the posted City Council meetings???	8/6/2020 5:46 PM
100	Thanks for doing this	8/6/2020 8:43 AM
101	The City of Sedona must start supporting it's residents, make them a priority and put much less emphasis on tourism. Tourism here, as it exists today, is counterproductive to most of the strategies and actions proposed in this survey. We are town with a population of 10,000 but in reality it is many times larger due to the daily influx of tourists.	8/6/2020 7:11 AM
102	Cleaning up Oak Creek Canyon	8/5/2020 7:51 PM
103	How to communicate with Mother Nature and take careful notes	8/5/2020 6:29 PM
104	Banning plastic bags	8/5/2020 3:40 PM
105	I would love to see a program where there are parking lots for visitors to leave their cars and take public transit around town so that 179 between the Village and Sedona and 89A through Sedona don't get so bogged down with traffic.	8/5/2020 3:05 PM
106	I would like the community to be able to vote on changes	8/5/2020 1:31 PM
107	Do what you can to make your results easily applicable to the other municipalities in the area. They may not have the resources to pay for such a study but they need a plan, just the same. Maybe you could create a generic version of the plan, stripping out any Sedona-specific issues, so that other communities could simply adapt it.	8/5/2020 12:39 PM
108	off road bike paths allowing us to use bicycles instead of cars for short hops around Sedona.	8/5/2020 11:31 AM
109	incentivize only.	8/5/2020 9:19 AM
110	Great? Informative survey! I hope we will county on this path!	8/5/2020 9:17 AM
111	Thank you for doing this work!	8/5/2020 8:41 AM
