- 48.9% of total population has been fully-vaccinated (71,939) (up from 44.5% on 6/7)

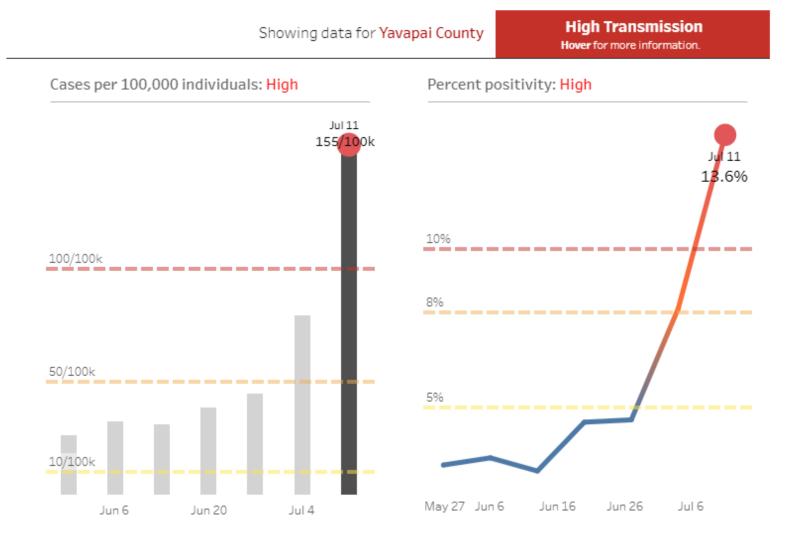

Community Transmission: Coconino

Community Transmission: Yavapai

Updated CDC Guidance – July 27, 2021

- Updated information for fully vaccinated people given new evidence on the B.1.617.2 (Delta) variant currently circulating in the United States.
- Added a recommendation for fully vaccinated people to wear a mask in public indoor settings in areas of substantial or high transmission.
- Added information that fully vaccinated people might choose to wear a mask regardless of the level of transmission, particularly if they are immunocompromised or at increased risk for severe disease from COVID-19, or if they have someone in their household who is immunocompromised, at increased risk of severe disease or not fully vaccinated.
- Added a recommendation for fully vaccinated people who have a known exposure to someone with suspected or confirmed COVID-19 to be tested 3-5 days after exposure, and to wear a mask in public indoor settings for 14 days or until they receive a negative test result.
- CDC recommends universal indoor masking for all teachers, staff, students, and visitors to schools, regardless of vaccination status.

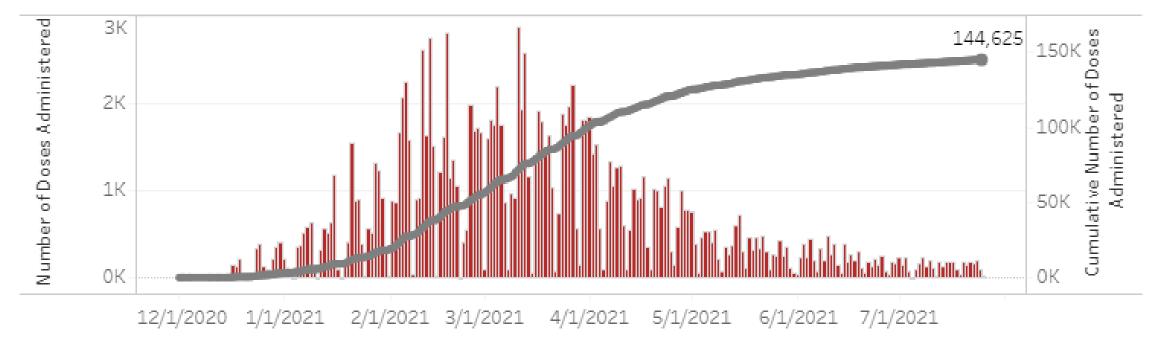

Questions?

Vaccinations: Coconino

The number of doses administered by administration date (■ cumulative sum ■ doses by day)

Vaccinations: Yavapai

The number of doses administered by administration date (= cumulative sum = doses by day)
