\$ FY22 Project Budget: \$60,000

Total Project Budget: \$60,000

In 2011, in conjunction with the SR179 Realignment Project, an 8-inch dryline sewer was installed for future use. In order to make the dryline active, approximately 200 linear feet of sewer will be installed in Juniper Trail to tie the dryline into the active collection system. The extension will allow for the potential connection of up to 31 properties, 9 of which are undeveloped.

Status: Wastewater staff will be assessing the condition of the existing dry line in September 2021. Once the condition is known, design of the extension will begin. It is anticipated that installation of the new sewer extension will be complete in Spring 2022.
