Assumptions and Limiting Conditions

Summary

This Tree Report was prepared at the request of the property owner, R.D Olson. The owner is preparing to redevelop the property with the new Oak Creek Heritage Lodge.

The property is located in Sedona and is surrounding 115 Schnebly Hill Road Sedona, AZ 86336. It primarily consists of a mixture of residential homes and minimally touched open land and riparian zones.

Assignment

The assignment included the compilation of a tree inventory within the property line boundaries to aid with determining the impact of development to all trees on site.

Data Points Recorded:

- Numerical ID
- Date Tagged
- Common Name
- Botanical Name
- Approximate Height Range
- Approximate DBH/Caliper Range
- Health
- Approximate Canopy Spread Range
- Latitude
- Longitude

Considerations:

- Being that most trees on site are deciduous, exact tree species identification on some trees was difficult without leaves, and species should be considered approximate.
- GPS accuracy is affected when under tree stands and locations are approximate.

Tree Characteristics and Site Conditions

The trees within the riparian zones lie mostly untouched in their natural setting. The area contains large amounts of volunteers from natural tree reproduction habits over the years.

Streets and open fields contain many native trees that have largely remained untouched aside from clearance pruning from streets, utilities, driveways, etc.

Around the structures, many deliberately planted trees exist and appear to have been maintained over the years.

Overall, the health of the entire stand of trees throughout the property is well above average when taking the setting into consideration.

Development Impact

As with all construction projects, construction that takes place in areas where trees are currently standing will require relocation or removal of select trees. There are many trees on site which would not reasonably be recommended to be boxed up and relocated due to health, structure, and species; although this is likely subject to local ordinance.

Trees that stand *near* future structure or hardscape construction should have tree protection zones (TPZ) established to manage impact to the trees both above (canopy), and below ground (root system).

Visual Tree Map

Assumptions and Limiting Conditions

No warranty is made, expressed or implied, that problems or deficiencies of the trees or the property will not occur in the future, from any cause. The Arborist shall not be responsible for damages or injuries caused by any tree defects and assumes no responsibility for the correction of defects or tree related problems.

The owner of the trees may choose to accept or disregard the recommendations of the Arborist or seek additional advice to determine if a tree meets the owner's risk abatement standards.

The Arborist has no past, present or future interest in the removal or retaining of any tree. Opinions contained herein are the independent and objective judgments of the Arborist relating to circumstances and observations made on the subject site.

The recommendations contained in this report are the opinions of the Arborist at the time of inspection. These opinions are based on the knowledge, experience, and education of the Arborist. The field inspection was a visual, grade level tree assessment.

The Arborist shall not be required to give testimony, perform site monitoring, provide further documentation, be deposed, or to attend any meeting without subsequent contractual arrangements for this additional employment, including payment of additional fees for such services as described by the Arborist.

The Arborist assumes no responsibility for verification of ownership or locations of property lines, or for results of any actions or recommendations based on inaccurate information.

This Arborist report may not be reproduced without the express permission of the Arborist and the client to whom the report was issued. Any change or alteration to this report invalidates the entire report.

Should you have any further questions regarding this property, please contact me at (602)245-7076.

Respectfully,

Antone Silva
