\$ FY25 Project Budget: \$300,000

The existing recharge well filter system utilizes disposable filters, resulting in excess cost and waste for filtration. This project will replace the existing filtration system for the recharge well pump station with a new backwash filtration system.

Status: Design is ongoing. It is expected that a 60% design review will be completed in October 2024, with final design anticipated to be complete by December 2024.

Construction is planned to begin in winter 2025.

PROJECT STATUS

SEPTEMBER FY25

Project Phase	% Completion	Completion Date
Design	50%	December 2024
Construction	0%	Winter 2025
